SALAZAR ROBINSON

Gemalter Stein Simon and Schuster

La exposición presenta un recorrido por cada una de las etapas artísticas de Orlan: el primigenio "Le baiser de l'artiste", en que la artista es una máquina expendedora de besos a cinco francos; las interpretaciones barrocas de madonnas y santas, y las intervenciones de cirugía estética, en las que Orlan es la paciente-artista que moldea su cuerpo a su propio antojo, y que constituyen un alegato contra los corsés sociales y contra el dolor.

"Scientific Investigation of Copies, Fakes and Forgeries is a comprehensive guide to the technical and scientific study of the authenticity of a wide range of antiquities and artworks. It is the first book to provide a full survey of the subject of forgery from a scientific basis, examining a wide range of materials and techniques." "The demand for copies, fakes and forgeries is driven by rising prices in an international marketplace. The book

examines the available new technologies and ever more sophisticated forging techniques, looking at production and distribution of fraudulent artworks. The subject is exemplified by numerous internationally based case studies, some turning out not to be as conclusive as is sometimes believed." "The book is aimed at those who need to understand the available approaches to and methods of scientific and technical authentication, be they curator, collector, conservator or scientist." --Book Jacket.
