Definitions of Surveying and Associated TermsSurveying: Theory and Practice: James Anderson ...To determine the stadia interval factor, a theodolite is set up at a distance C back of the zero end of a level base line 240.0 m long, the base line being marked by stakes set every 30.00 m. A rod then is held at successive stations along the base line. The stadia</p>
--	---	---

interval and each half-interval observed at each location of the rod are in the following table. To determine the stadia interval factor, a theodolite is used. Cadastral surveying is the sub-field of cadastre and surveying that specialises in the establishment and re-establishment of real property boundaries. It is an important component of the legal creation of

properties. A cadastral surveyor must apply both the spatial-measurement principles of general surveying and legal principles such as respect of neighboring titles. Cadastral surveying - Wikipedia The book deals with the entire surveying theory and practice to be studied by civil engineering students. It covers all basic methods of surveying like chain surveying, compass

surveying, plane table surveying, theodolite surveying and explain use of levels, contouring etc. It also covers modern methods of leveling like stations, photogrammetric ...
