According to the American Association of Nurse Anesthetists (AANA), it generally takes a minimum of seven years postsecondary education and experience to become a certified registered nurse anesthetist (CRNA). An average student will complete approximately 2,500 clinical hours and administer 850 anesthetics before obtaining his or her certification.How do I become a Nurse Anesthetist?Lumbosacral plexus lesions usually are

divided clinically into those affecting the upper lumbar plexus and those affecting the lower lumbosacral plexus, analogous to the underlying anatomic division. Lumbar plexopathies affect predominantly the L2-L4 nerve fibers, resulting in weakness of the quadriceps, iliopsoas, and hip adductor muscles (femoral and obturator nerves).

The Nurse Anesthesia (CRNA) Program at Wake Forest School of Medicine is a recognized leader in the field. This program offers a rigorous curriculum, advanced training settings and global health opportunities.
