On the heels of a decade of scandals and the new pressures brought on by the Sarbanes-Oxley Act, corporations expect far more from their CFOs than simply managing the numbers. They expect decision-making support and performance insights that can improve bottom-line results. Unfortunately, the complexity and detail inherent in CFOs' jobs keep them shackled to budgeting and transaction-processing systems that leave little time for value-adding activities. Grounded in extensive research, *Reinventing the CFO* outlines seven critical roles—from streamlining redundant processes to regulating risk to identifying a few key measures—that CFOs must take on in order to successfully transform the finance operation.

It provides examples of how Huawei focuses on customers to pursue sustainable and profitable growth rather than focusing on capital market valuation which is a familiar scenario among Western companies. It is the business departments that are the creators of value for Huawei, while the finance department is tasked to provide support and services to those business departments during the value creation process. The book illustrates how Huawei Finance sets rules, allocates resources, and builds centers of expertise all over the world to address future uncertainties. More than a decade ago Huawei dedicated seven years to implement the Integrated Financial Services (IFS) Transformation Program with the help of IBM consultants. This book also draws on the leading concepts and successful experience of the IFS Transformation Program. Huawei Finance adopts three types of centralized vertical management from the top down: treasury, accounting, and auditing. It does not transfer such central authority down to lower levels, but delegates all other authority to business organizations across all levels. This management model represents the focus of this book. Built on

Value provides an overview of Huawei's finance management and will help academic researchers in Business/Management, as well as practitioners in industry, an accurate and in-depth understanding of Huawei as a company.
