This edition of Digital Image Processing is a major revision and is based on the most extensive survey the authors have ever conducted. The survey involved faculty, students, and independent readers of the book in 134 institutions from ... Gonzalez & Woods, Digital Image Processing: International ... Digital image processing is the use of a digital computer to process digital images through an algorithm. As a subcategory or field of digital signal processing, digital image

processing has many advantages over analog image processing. It allows a much wider range of algorithms to be applied to the input data and can avoid problems such as the build-up of noise and distortion during processing. Digital image processing - Wikipedia California Institute of Technology
