 This book offers students a uniquely concise, accessible and comprehensive introduction to hotel accommodation management that covers the range of managerial subjects and disciplines in the sector. The book focuses on enduring aspects of the accommodation management function (front office management, housekeeping, revenue management); the changing context of hotel accommodation provision (the move to 'asset light', the supply of accommodation, trends in hotel investment and asset management, the challenges engendered by social media and the collaborative economy to the hotel market); and the role of accommodation in additional and integrated facilities and markets (spas, resorts, MICE markets). International case studies illustrating examples of practice in the

industry are integrated throughout, along with study questions and other features to aid understanding and problem solving. This is essential reading for all hospitality and hotel management students.

Hotel Housekeeping Professional Management of Housekeeping Operations
 From the man the Wall Street Journal hailed as "the guru of Revenue Management" comes revolutionary ways to recover from the after effects of downsizing and refocus your business on growth. Whatever happened to growth? In Revenue Management, Robert G. Cross answers this question with his ground-breaking approach to revitalizing businesses: focusing on the revenue side of the ledger instead of the cost side. The antithesis of slash-and-burn methods that left companies with empty profits and dissatisfied stockholders, Revenue Management overturns conventional thinking on marketing strategies and offers the key to initiating and sustaining growth. Using case studies from a variety of industries, small businesses, and nonprofit organizations, Cross describes no-tech, low-tech, and high-tech methods that managers can use to increase revenue without increasing products or promotions; predict consumer behavior; tap into new markets; and deliver products and services to customers effectively and efficiently. His proven tactics will help any business dramatically improve its bottom line by meeting the challenge of matching supply with demand.

The Mine Maintenance Management Reader is an indispensable handbook for maintenance managers and supervisors, and mine and plant managers in heavy industry. Virtually every aspect of this essential function is addressed, from organizing maintenance around a plant-level production strategy, to how maintenance professionals can provide a road map for creating a more efficient organization. These critical big-picture issues are brought to life through engaging vignettes of maintenance men and women dealing with real-life, day-to-day problems and concerns. You'll learn how Charlie, a plant manager, gets into trouble when he adopts a team approach to maintenance without doing his homework. You'll see how Vivian, a haulage truck driver, sets a new standard for the quality of preventive maintenance inspections. And you'll read how Jerry, a general manager, establishes responsibilities for maintenance support that increase the production capacity and profitability of his mining operation. Author Paul D. Tomlinson draws on his 35 years of maintenance management consulting experience to craft these compelling, yet highly instructional, stories. Each reveals a powerful lesson, providing you with ideas and techniques to help solve maintenance problems you may be grappling with today.

Anthropogenic transformation of the coastal zone continues at a steady pace, especially in the developing maritime countries, where coastal resources are often crucial to national economies. However, exploitation of these resources is often indiscriminate, ill planned, or carried out without adequate scientific knowledge. This leads to rapid resource depletion, and often irreversible environmental degradation. The 1992 Rio de Janeiro UN Conference on Environment and Development recognized the expediency of an integrated and sustainable use of all coastal resources, functions and services grounded on sound scientific data. The present volume is based on the 1994 international workshop Integrated Coastal Zone Management, and brings together contributions by leading specialists both on basic concepts and on applications of coastal management. The work is divided into six parts, dealing with the conceptual framework of ICZM; regional and global aspects of coastal management; environmental assessment in ICZM; capacity building and technology transfer; monitoring and environmental analysis; and case studies and status of ICZM plans. The book also incorporates

an interactive ICZM planning module, COSMO, which can be of use in designing a management plan for a coast. Attention is also given to long-term environmental effects of present-day actions. It is hoped that COSMO will prove an additional learning tool for ICZM practitioners and enhance the value of the book. This work is intended to give a broad coverage of conceptual and technical aspects of ICZM, and will be of use to operational executives as well as students of ICZM, environmental economists, policy-makers and senior managers in the international development agencies and governmental and non-governmental organizations. It can be recommended as a textbook and as a reference work.

The tourism industry is an industry of people and is directly dependent on the performance of activities, skills,

professionalism, quality, and competitiveness. Approaching the perspective of people management stresses the need to humanize companies, making empowerment and commitment easier. These are key to setting "talents" and, more importantly, to encouraging these individuals to put their creative capacities to the service of the companies for which they work. Only by being collaborative internally does business gain competitive capacity in the global marketplace. This aspect is crucial in tourism in the face of strong and growing competition in the sector. Human Capital and People Management in the Tourism Industry is a crucial reference source that reveals groundbreaking human resource policies for tourism destinations, revolutionary human capital managerial business approaches in tourism, innovative tourism training perspectives, and new tourism qualification prospects. Featuring research on topics such as intellectual capital, human resource management, and financial performance, this book is ideally designed for business managers, entrepreneurs, human resource officers, industry professionals, academicians, students, and researchers.
