This book addresses the impact of EU law beyond its own borders, the use of law as a powerful instrument of EU external action, and some of the normative challenges this poses. The phenomenon of EU law operating beyond its borders, which may be termed its 'global reach', includes the extraterritorial application of EU law, territorial extension, and the so-called 'Brussels Effect' resulting from unilateral legislative and regulatory action, but also includes the impact of the EU's bilateral relationships, and its

engagement with multilateral fora and the negotiation of international legal instruments. The book maps this phenomenon across a range of policy fields, including the environment, the internet and data protection, banking and financial markets, competition policy, and migration. It argues that in looking beyond the undoubtedly important instrumental function of law we can start to identify the ways in which law shapes the EU's external identity and its relations with other legal regimes, both enabling and constraining the EU's external action.

Context-Dependence in the Analysis of Linguistic Meaning John Wiley & Sons

What does it mean for a cinematic work to be "Chinese"? Does it refer specifically to a work's subject, or does it also reflect considerations of language, ethnicity, nationality, ideology, or political orientation? Such questions make any single approach to a vast field like "Chinese cinema" difficult at best.

Accordingly, The Oxford Handbook of Chinese Cinemas situates the term more broadly among various different phases, genres, and distinct national configurations, while taking care to address the consequences of grouping together so many disparate histories under a single banner. Offering both a platform for cross-disciplinary dialogue

and a mapping of Chinese cinema as an expanded field, this Handbook presents thirty-three essays by leading researchers and scholars intent on yielding new insights and new analyses using three different methodologies. Chapters in Part I investigate the historical periodizations of the field through changing notions of national and political identity -- all the way from the industry's beginnings in the 1920s up to its current forms in contemporary Hong Kong, Taiwan, and the global diaspora. Chapters in Part II feature studies centered on the field's taxonomical formalities, including such topics as the role of the Chinese opera in technological innovation, the political logic of the "Maoist film," and the psychoanalytic formula of the kung fu

action film. Finally, in Part III, focus is given to the structural elements that comprise a work's production, distribution, and reception to reveal the broader cinematic apparatuses within which these works are positioned. Taken together, the multipronged approach supports a wider platform beyond the geopolitical and linguistic limitations in existing scholarship. Expertly edited to illustrate a representative set of up to date topics and approaches, The Oxford Handbook of Chinese Cinemas provides a vital addition to a burgeoning field still in its formative stages.

Federal Trade Commission Decisions BRILL

This volume addresses several core questions regarding the nature of law in China and its future development. In

particular, these articles shed light on whether the rule of law ideal is commensurable with government based on the Chinese Communist Party. Beginning virtually from scratch, China has established a comprehensive legal system that boasts a constitution, primary and secondary legislation and plentiful regulations covering most areas of public and private life. Yet, as these articles discuss, its courts are enmeshed in Party and state hierarchies and are not empowered to directly apply constitutional principles or rights, ensuring that the law is subordinate to national public policy goals. Legal and extra-legal methods for punishing wrongdoing and resolving disputes also raise questions of due process of law. Ultimately, the question is therefore

whether China's legal system, if eschewing formalised human rights, is developing a capacity to protect fundamental human dignity. *Including the Statutes, the State Edition of the Codes, 1872, and Subsequent Amendments, and the Constitution of 1879 : Also, Tables of All Statutes and Code Sections which in Terms Have Been Amended, Supplemented, Or Repealed, and a List of the Statutes Intended by the Code Commissioner to be Repealed* Hodder Education

This collection of papers addresses context-dependence and methods for dealing with it. The book also records comments to the papers and the authors' replies to the comments. In this way, the contributions themselves are contextually dependent. It represents an inquiry into the activities on the semantics side of the pragmatics boundary.

The Extraterritorial Reach of EU Law

Stanford University Press

The rise of China has brought about a dramatic increase in the rate of migration from mainland China. At the same time, the Chinese government has

embarked on a full-scale push for the internationalisation of Chinese media and culture. Media and communication have therefore become crucial factors in shaping the increasingly fraught politics of transnational Chinese communities. This book explores the changing nature of these communities, and reveals their dynamic and complex relationship to the media in a range of countries worldwide. Overall, the book highlights a number of ways in which China's "going global" policy interacts with other factors in significantly reshaping the content and contours of the diasporic Chinese media landscape. In doing so, this book constitutes a major rethinking of Chinese transnationalism in the twenty-first century.

Improving Homeland Security Decisions

In this pathbreaking book, Xiaoyuan Liu establishes the ways in which the history of the Chinese Communist Party was, from the Yan'an period onward, intertwined with the ethnopolitics of the Chinese "periphery." As a Han-dominated party, the CCP had to adapt to an inhospitable political environment, particularly among the Hui (Muslims) of northwest China and the Mongols of Inner Mongolia. Based on a careful examination of CCP and Soviet Comintern documents only recently available, Liu's study shows why the CCP found itself unable to follow the Russian Bolshevik precedent by inciting separatism among the non-Han peoples as a stratagem for gaining national power. Rather than swallowing Marxist-

Leninist dogma on “the nationalities question,” the CCP took a position closer to that of the Kuomintang, stressing the inclusiveness of the Han-dominated Chinese nation, “Zhongua Minzu.”

How do leaders perceive threat levels in world politics, and what effects do those perceptions have on policy choices?

Mark L. Haas focuses on how ideology shapes perception. He does not delineate the content of particular ideologies, but rather the degree of difference among them. Degree of ideological difference is, he believes, the crucial factor as leaders decide which nations threaten and which bolster their state's security and their own domestic

power. These threat perceptions will in turn impel leaders to make particular foreign-policy choices. Haas examines great-power relations in five periods: the 1790s in Europe, the Concert of Europe (1815-1848), the 1930s in Europe, Sino-Soviet relations from 1949 to 1960, and the end of the Cold War. In each case he finds a clear relationship between the degree of ideological differences that divided state leaders and those leaders' perceptions of threat level (and so of appropriate foreign-policy choices). These relationships held in most cases, regardless of the nature of the ideologies in question, the offense-defense balance, and changes in the international distribution of power.

The Chinese Communist Party as Organizational Emperor John Wiley &

Sons

Mao Zedong's political career spanned more than half a century. The ideas he championed transformed one of the largest nations on earth and inspired revolutionary movements across the world. Even today Mao lives on in China, where he is regarded by many as a near-mythical figure, and in the West, where a burgeoning literature continues to debate his memory. In this book, leading scholars from different generations and around the world offer a critical evaluation of the life and legacy of China's most famous - some would say infamous - son. The book brings the scholarship on Mao up to date, and its alternative perspectives equip readers to assess for themselves the nature of this mercurial figure and his significance in

modern Chinese history.

What are the risks of terrorism and what are their consequences and economic impacts? Are we safer from terrorism today than before 9/11? Does the government spend our homeland security funds well? These questions motivated a twelve-year research program of the National Center for Risk and Economic Analysis of Terrorism Events (CREATE) at the University of Southern California, funded by the Department of Homeland Security. This book showcases some of the most important results of this research and offers key insights on how to address the most important security problems of our time. Written for homeland security

researchers and practitioners, this book covers a wide range of methodologies and real-world examples of how to reduce terrorism risks, increase the efficient use of homeland security resources, and thereby make better decisions overall.

This book closely examines one relatively small but significant political phenomenon OCo Suku in Revolutionary China through a matrix of western social theory: Freud, Marcuse, Arendt, and Ricoeur. Suku is the practice of confessing individual suffering in a political context and in a collective public forum. By interpreting Suku from the joint perspectives of political identity and subjective psychological identity,

the aim of the book is to postulate a new paradigm for discussing social suffering and collective confession in a political context that represents the radical transformation in China's modern history. This book presents an analysis of the transformation of identity from the traditional to the modern, both for the individual peasant and for the state of China.

Crystallographic Studies of Cytochrome C Peroxidase Taylor & Francis

This book focuses on the future of China and its sustainable development, and summarizes the implications, forms, causes, countermeasures and related rules of the main costs generated during a country's period of development, so as to provide a theoretical reference and decision-making consulting tools for

institutions and scientific governance and management professionals. Combining China's national situation and development characteristics with the country as a unit, it uses case studies to propose the concept of cost theory and the theoretical system of national development cost. Focusing on the goals of innovation in nation building, common development and prosperity, as well as enhancement of people's net welfare, the book summarizes and draws conclusions about various aspects of national development, including economic development cost; political, social and cultural development cost; foreign opening-up development cost and nature development cost. It primarily establishes an indicator system of national development cost for

promoting full-factor productivity and reducing development cost, and provides a theoretical basis for implementing the scientific political-achievement view.

Many books have tried to analyze the reasons for the Chinese communist success in China's 1945_1949 civil war, but Suzanne Pepper's seminal work was the first and remains the only comprehensive analysis of how the ruling Nationalists lost that war_not just

militarily, but by alienating the civilian population through corruption and incompetence. Now available in a new edition, this authoritative investigation of Kuomintang failure and communist success explores the new research and archival resources available for assessing this pivotal period in contemporary Chinese history. Even more relevant today given the contemporary debates in Hong Kong and Taiwan over the terms of reunification with a communist-led national government in Beijing, this book is essential reading for anyone seeking a nuanced understanding of twentieth-century Chinese politics.
