Communities in Action

Beacon Press

"Over the last half

century, there has been a marked increase in ideological conservatism among African Americans, with nearly 50% of black

Americans describing themselves as conservative in the 2000s, as compared to 10% in the 1970s. Support for redistributive initiatives has likewise declined. And yet, even as black Americans shift rightward on ideological and issue positions, Democratic Party identification has stayed remarkable steady, holding at 80% to 90%. It is this puzzle that White and Laird look to address in this new book: Why has ideological change failed to push black Americans into the

Republican party? Most explanations for homogeneity have focused on individual dispositions, including ideology and group identity. White and Laird acknowledge that these are important, but point out that such explanations fail to account for continued political unity even in the face of individual ideological change and of individual incentives to defect from this common group behavior. The authors offer instead, or in addition, a behavioral

explanation, arguing that black Americans maintain political unity through the establishment and enforcement of well-defined group expectations of black political behavior through a process they term racialized social constraint. The authors explain how black political norms came about, and what these norms are, then show (with the help of survey data and lab-in-field experiments) how such norms are enforced, and where this enforcement happens

(through a focus on black institutions). They conclude by exploring the implications of the theory for electoral strategy, as well as explaining how this framework can be used to understand other voter communities"--

Cultural Diversity, Families, and the Special Education System CQ Press

Previous edition written by: James A. McLoughlin, Rena B. Lewis.
1940 Edition One World
The second edition of this powerful book examines the disproportionate

placement of Black and Hispanic students in special education. The authors present compelling, research-based stories representing the range of experiences faced by culturally and linguistically diverse students who fall in the liminal shadow of perceived disability. They examine the children's experiences, their families' interactions with school personnel, the teachers' and schools' estimation of the children and their families, and the

school climate that influences decisions about referrals to special education. Based on the authors' 4 years of ethnographic research in a large, culturally diverse school district, the book concludes with recommendations for improving educational practice, teacher training, and policy renewal. Abolitionist Teaching and the Pursuit of Educational Freedom National Academies Press
African-American males are being imprisoned at an alarming and

unprecedented rate. Out of the more than 11 million black adult males in the U.S. population, nearly 1.5 million are in prisons and jails with another 3.5 million more on probation or parole or who have previously been on probation or parole. Black males make up the majority of the total prison population, and due to either present or past incarceration is the most socially disenfranchised group of American citizens in the country today. This book, which was penned by

Boothe while he was still incarcerated, details the author's personal story of a negligent upbringing in an impoverished community, his subsequent engagement in criminal activity (drug dealing), his incarceration, and his release from prison and experiencing of the crippling social disenfranchisement that comes with being an ex-felon. The author then relates his personal experiences and realizations to the seminal problems within the

African-American community, federal government, and criminal justice system that cause his own experiences to be the same experiences of millions of other young black men. This book focuses on the totality of how and why the U.S. prison system became the largest prison system in the world, and is filled with relevant statistical and historical references and controversial facts and quotes from notable persons and sources. *The Failures Of Integration* Flatiron Books:

An Oprah Book Urban Narratives foregrounds previously silenced voices of young people of color who are labeled disabled. Overrepresented in special education classes, yet underrepresented in educational research, these students - the largest group within segregated special education classes - share their perceptions of the world and their place within it. Eight 'portraits in progress' consisting of their own words and framed by their poetry

and drawings, reveal compelling insights about life inside and out of the American urban education system. The book uses an intersectional analysis to examine how power circulates in society throughout and among historical, cultural, institutional, and interpersonal domains, impacting social, academic, and economic opportunities for individuals, and expanding or circumscribing their worlds. A History of Racial Passing

in American Life Teachers College Press
WINNER OF THE 2018 NATIONAL WOMEN'S STUDIES ASSOCIATION ALISON PIEPMEIER BOOK PRIZE Linking powerful first-person narratives with structural analysis, The Pedagogy of Pathologization explores the construction of criminal identities in schools via the intersections of race, disability, and gender. amid the prevalence of targeted mass incarceration. Focusing uniquely on the

pathologization of female students of color, whose voices are frequently engulfed by labels of deviance and disability, a distinct and underrepresented experience of the school-to-prison pipeline is detailed through original qualitative methods rooted in authentic narratives. The book's DisCrit framework, grounded in interdisciplinary research, draws on scholarship from critical race theory, disability studies, education, women's and

girl's studies, legal studies, and more. *Portraits in Progress, Life at the Intersections of Learning Disability, Race, & Social Class* Liveright Publishing
 "A book that examines the growing population of mixed minority-white backgrounds and society"-
 -
How Poor and Minority Students are Shortchanged on Teacher Quality : a Report and Recommendations Bloomsbury Publishing
 Student retention continues to be a vexing

problem for all colleges and universities. In spite of the money spent on creating programs and services to help retain students until they achieve their academic and personal goals, and graduate, the figures have not improved over time. This is particularly true for minority students, who have a greater attrition rate than majority students. Demographic information shows that the minority population in the United States is growing at a faster rate than the majority. It is

imperative that educational institutions find ways to help improve retention rates for all students but particularly minority students. Retention rates should not differ appreciably among different racial/ethnic groups."The Journal of College Student Retention: Research, Theory and Practice" is the only scholarly, peer-reviewed journal devoted solely to college student retention. It has published many articles on minority student retention, and this topic continues to

garner much attention. This book is a compilation of the very best of these articles, selected on the basis of reviews by a cadre of experts in the education field. The articles discuss African American, Latino/Latina, Asian and Asian Pacific, Native American, and biracial students, and institutional commitments to retaining a diverse student population. For those interested in this vital area, the collection will teach and inspire them to achieve greater heights and pay additional

attention to retaining minority students in our colleges and universities. **How Affirmative Action Hurts Students It's Intended to Help, and Why Universities Won't Admit It** Princeton University Press
Greater racial diversity is good news for America's future Race is once again a contentious topic in America, as shown by the divisive rise of Donald Trump and the activism of groups like Black Lives Matter. Yet Diversity Explosion argues that the current period of profound

racial change will lead to a less-divided nation than today's older whites or younger minorities fear. Prominent demographer William Frey sees America's emerging diversity boom as good news for a country that would otherwise face declining growth and rapid aging for many years to come. In the new edition of this popular Brookings Press offering, Frey draws from the lessons of the 2016 presidential election and new statistics to paint an illuminating picture of

where America's racial demography is headed—and what that means for the nation's future. Using the U.S. Census, national surveys, and related sources, Frey tells how the rapidly growing "new minorities"—Hispanics, Asians, and multiracial Americans—along with blacks and other groups, are transforming and reinvigorating the nation's demographic landscape. He discusses their impact on generational change, regional shifts of major racial groups,

neighborhood segregation, interracial marriage, and presidential politics. Diversity Explosion is an accessible, richly illustrated overview of how unprecedented racial change is remaking the United States once again. It is an essential guide for political strategists, marketers, investors, educators, policymakers, and anyone who wants to understand the magnitude, potential, and promise of the new national melting pot in the twenty-first century.

A New York Times Best Seller Merging real stories with theory, research, and practice, a prominent scholar offers a new approach to teaching and learning for every stakeholder in urban education. Drawing on his own experience of feeling undervalued and invisible in classrooms as a young man of color and merging his experiences with more than a decade of teaching

and researching in urban America, award-winning educator Christopher Emdin offers a new lens on an approach to teaching and learning in urban schools. For White Folks Who Teach in the Hood...and the Rest of Y'all Too is the much-needed antidote to traditional top-down pedagogy and promises to radically reframe the landscape of urban education for the better. He begins by taking to task the perception of urban youth of color as unteachable, and he

challenges educators to embrace and respect each student's culture and to reimagine the classroom as a site where roles are reversed and students become the experts in their own learning. Putting forth his theory of Reality Pedagogy, Emdin provides practical tools to unleash the brilliance and eagerness of youth and educators alike—both of whom have been typecast and stymied by outdated modes of thinking about urban education. With this fresh and engaging new

pedagogical vision, Emdin demonstrates the importance of creating a family structure and building communities within the classroom, using culturally relevant strategies like hip-hop music and call-and-response, and connecting the experiences of urban youth to indigenous populations globally. Merging real stories with theory, research, and practice, Emdin demonstrates how by implementing the “Seven C’s” of reality pedagogy in their own classrooms,

urban youth of color benefit from truly transformative education. The Best of the "Journal of College Student Retention: Research, Theory & Practice"

Harvard University Press
The debate over affirmative action has raged for over four decades, with little give on either side. Most agree that it began as noble effort to jump-start racial integration; many believe it devolved into a patently unfair system of quotas and concealment. Now, with the Supreme Court set to rule on a case that could sharply curtail the use of racial preferences

in American universities, law professor Richard Sander and legal journalist Stuart Taylor offer a definitive account of what affirmative action has become, showing that while the objective is laudable, the effects have been anything but. Sander and Taylor have long admired affirmative action's original goals, but after many years of studying racial preferences, they have reached a controversial but undeniable conclusion: that preferences hurt

underrepresented minorities far more than they help them. At the heart of affirmative action's failure is a simple phenomenon called mismatch. Using dramatic new data and numerous interviews with affected former students and university officials of color, the authors show how racial preferences often put students in competition with far better-prepared classmates, dooming many to fall so far behind that they can never catch up. Mismatch largely

explains why, even though black applicants are more likely to enter college than whites with similar backgrounds, they are far less likely to finish; why there are so few black and Hispanic professionals with science and engineering degrees and doctorates; why black law graduates fail bar exams at four times the rate of whites; and why universities accept relatively affluent minorities over working class and poor people of all races. Sander and Taylor believe it is

possible to achieve the goal of racial equality in higher education, but they argue that alternative policies -- such as full public disclosure of all preferential admission policies, a focused commitment to improving socioeconomic diversity on campuses, outreach to minority communities, and a renewed focus on K-12 schooling -- will go farther in achieving that goal than preferences, while also allowing applicants to make informed decisions. Bold, controversial, and deeply

researched, Mismatch calls for a renewed examination of this most divisive of social programs -- and for reforms that will help realize the ultimate goal of racial equality. [Why are So Many Minority Students in Special Education?](#) Colchis Books This book features vivid case studies that bring to life real children, school personnel, and family members from the bestselling book *Why Are So Many Minority Students in Special Education?* Once again addressing the

disproportionate placement of minority students in special education programs, this new book includes the voices and perspectives of all stakeholders to show the tremendous complexity of the issues and the dilemmas faced by professionals, family members, and children. Challenging questions and scenarios are offered at the end of each case study to provide thoughtful follow-up activities and topics for further study. This collection of cases can be

used—on its own or as a companion to the main volume—in elementary and special education courses and professional development workshops. “This book provides a thorough and detailed description of the multiple factors that combine to provide inequitable educational opportunities for minority students living in poverty . . . the authors do not shy away from discussion of racism on the individual and institutional levels . . . they engage in this discussion in a

refreshingly detailed and nuanced way.” —TC Record “It is the best casebook on special education that I have seen.” —Velma L. Cobb, Vice President of Education and Youth Development, National Urban League [Diversity Explosion](#) Routledge Minorities and Representation in American Politics is the first book of its kind to examine underrepresented minorities with a framework based on four

types of representation—descriptive, formalistic, symbolic, and substantive. Through this lens, author Rebekah Herrick looks at race, ethnic, gender, and sexual minorities not in isolation but synthesized within every chapter. This enables readers to better recognize both the similarities and differences of groups' underrepresentation. Herrick also applies her unique and constructive approach to intergroup cooperation and intersectionality,

highlighting the impact that groups can have on one another.

Minority Student

Retention Routledge

This powerful book examines the disproportionate placement of Black and Hispanic students in special education. The authors present compelling stories representing the range of experiences that culturally and linguistically diverse students are apt to face in school. They examine the children's experiences,

their families, interactions with school personnel, the teachers, and schools' estimation of the children and their families, and the school climate that influences decisions about referrals. Based on the authors' work in a large, culturally diverse school district, the book concludes with recommendations for improving educational practice, teacher training, and policy renewal. This

"powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments gave rise to

and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only

suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, “virtually indispensable” study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

Mismatch Routledge
From a journalist on the frontlines of the Students

for Fair Admission (SFFA) v. Harvard case comes a probing examination of affirmative action, the false narrative of American meritocracy, and the attack on Asian American excellence with its far-reaching implications—from seedy test-prep centers to gleaming gifted-and-talented magnet schools, to top colleges and elite business, media, and political positions across America Even in the midst of a nationwide surge of bias and incidents against them, Asians from coast

to coast have quietly assumed mastery of the nation’s technical and intellectual machinery and become essential American workers. Yet, they’ve been forced to do so in the face of policy proposals—written in the name of diversity—excluding them from the upper ranks of the elite. In *An Inconvenient Minority*, journalist Kenny Xu traces elite America’s longstanding unease about a minority potentially upending them. Leftist agendas,

such as eliminating standardized testing, doling out racial advantages to “preferred” minorities, and lumping Asians into “privileged” categories despite their deprived historical experiences have spurred Asian Americans to act. Going beyond the Students for Fair Admission (SFFA) v. Harvard case, Xu unearths the skewed logic rippling countrywide, from Mayor Bill de Blasio’s attempted makeover of New York City’s Specialized School

programs to the battle over “diversity” quotas in Google’s and Facebook’s progressive epicenters, to the rise of Asian American activism in response to unfair perceptions and admission practices. Asian Americans’ time is now, as they increase their direct action and amplify their voices in the face of mounting anti-Asian attacks. An Inconvenient Minority chronicles the political and economic repression and renaissance of a long ignored racial identity group—and how they are

central to reversing America’s cultural decline and preserving the dynamism of the free world.

Urban Narratives Basic Books

The 1619 Project’s lyrical picture book in verse chronicles the consequences of slavery and the history of Black resistance in the United States, thoughtfully rendered by Pulitzer Prize-winning journalist Nikole Hannah-Jones and Newbery honor-winning author Renée Watson. A young student receives a

family tree assignment in school, but she can only trace back three generations. Grandma gathers the whole family, and the student learns that 400 years ago, in 1619, their ancestors were stolen and brought to America by white slave

traders. But before that, they had a home, a land, a language. She learns how the people said to be born on the water survived. And the people planted dreams and hope, willed themselves to keep living, living. And the people learned new words

for love for friend for family for joy for grow for home. With powerful verse and striking illustrations by Nikkolos Smith, *Born on the Water* provides a pathway for readers of all ages to reflect on the origins of American identity.
