 Many English language learners (ELLs) require extra support to become successful writers. This book helps teachers understand the unique needs of ELLs and promote their achievement by adapting the effective instructional methods teachers already know. Engaging and accessible, the book features standards-based lesson planning ideas, examples of student work, and 15 reproducible worksheets, rubrics, and other useful materials. It describes ways to combine instruction in core skills with ample opportunities to write and revise in different genres. Invaluable guidance is

provided for assessing ELLs' writing development at different grade levels and language proficiency levels.
Composition as Inquiry, Learning, Thinking, and Communication University of Hawaii Press
 This new edition of Teaching Secondary English is thoroughly revised, but its purpose has not changed. Like the popular first edition, it balances content knowledge with methodology, theory with practice, and problem-posing with suggested solutions. The tone and format are inviting, while addressing student-readers on a professional level. Rather than attempting to cover everything, the text provides a framework and materials for teaching a secondary English methods course, while allowing considerable choice for the instructor. The focus is on teaching literature, writing, and language--the basics of the profession. Attention is given

to the issues that arise as one seeks to explore what it means to "teach English." The problems and tensions of becoming a teacher are discussed frankly, in a manner that helps students figure out their own attitudes and solutions. Features: * Focuses on a few central concepts in the teaching of secondary English * Provides an anthology of 22 readable and challenging essays on key topics--allowing students to hear a variety of voices and opinions * Includes an applications section for each reading that extends the discussion and asks students to explore problems and grapple with important issues related to the articles * Offers short writing assignments in questions that follow the readings and in brief writing tasks in the applications, and a longer writing assignment at the end of each chapter * Addresses student readers directly without talking down to them New

in the Second Edition: * This edition is shorter, tighter, and easier to use. * The opening and concluding chapters more directly address the concerns of new teachers. * The anthology is substantially updated (of the 22 articles included, 14 are new to this edition). * Each essay is preceded by a brief introduction and followed by questions for further thought. * There are fewer applications, but these are more extensive and more fully integrated within the text. * A writing assignment is provided at the end of each chapter. * Interviews with college students--before and after student teaching--are included in Chapters 1 and 6. * The bibliographies at the end of each chapter are fully updated.

'I applaud the authors for this sizeable undertaking, as well as the care exercised in selecting and sequencing topics and subtopics. A major strength and salient feature of this volume is its range: It will serve as a key reference tool for researchers working in L2 composition and in allied fields.' - John Hedgcock, Monterey Institute for International Studies

Synthesizing twenty-five years of the most significant and influential findings of published research on second language writing in English, this volume promotes understanding and provides access to research developments in the field.

Overall, it distinguishes the major contexts of English L2 learning in North America, synthesizes the research themes, issues, and findings that span these contexts, and interprets the methodological progression and substantive findings of this body of knowledge. Of particular interest is the extensive bibliography, which makes this volume an essential reference tool for libraries and serious writing professionals, both researchers and practitioners, both L1 and L2. This book is designed to allow researchers to become familiar with the most important research on this topic, to promote understanding of pedagogical needs of L2 writing students, and to introduce graduate students to L2 writing research findings.

Stories from First-year Composition

Richard d Irwin

In the age of Buzzfeeds, hashtags, and Tweets, students are increasingly favoring conversational writing and regarding academic writing as less pertinent in their personal lives, education, and future careers. Writing and Literature:

Composition as Inquiry, Learning, Thinking and Communication connects students with works and exercises and promotes student learning that is kairotic and constructive. Dr. Tanya Long Bennett, professor of English at the University of North Georgia, poses questions that encourage active rather than passive learning. Furthering ideas presented in *Contribute a Verse: A Guide to First-Year Composition* as a complimentary companion, *Writing and Literature* builds a new conversation covering various genres of literature and writing. Students learn the various writing styles appropriate for analyzing, addressing, and critiquing these genres including poetry, novels, dramas, and research writing. The text and its pairing of helpful visual aids throughout emphasizes the importance of critical reading and analysis in producing a successful composition. *Writing and Literature* is a refreshing textbook that links learning, literature, and life.

In a time of declining resources in institutions of higher education, we grapple with how priorities are to be set for the limited resources available. Most vulnerable are those students labeled underprepared by colleges and universities. Should we argue that the limited resources available ought to be used to support these students through their undergraduate years? And, if we decide that we want to do that, what evidence of their potential for success can we provide that will justify the use of these resources? Through longitudinal research that follows students who have been so labeled over all their college years, we can begin to find answers to these questions. *Time to Know Them* is the first book that follows the experiences of a group of students over their entire academic experience. No previous studies have brought together the factors incorporated in this study: *examining writing and learning on a true longitudinal basis; *studying a multicultural urban population; *investigating the relationship between writing and learning by examining papers written over time for regularly assigned academic courses across a range of

disciplines; and *taking into consideration non-academic factors that influence academic performance such as race, gender, socio-economic status, and ideological orientation. Through interviews twice a semester over six years, the collection of papers written for all courses, observations of instructional settings, and analysis of required institutional tests of writing, the author has been able to pull together a more complete picture of writing and intellectual development over the college years than has previously been available in any study. Students are seen to acquire the ability to handle more complex reasoning tasks as they find themselves in more challenging intellectual settings and where risk-taking and exploration of new ideas are valued. The integration of students' previous life experiences into their academic studies allows them to analyze, critique, modify, and apply their previously held world views to their new learning. These changes are seen to occur over time with instructional settings and support providing key roles in writing development. Personal factors in students' lives present difficulties that require persistence and dedication to overcome. Never before have the complexities of real individual lives as they affect academic performance been so clearly presented. *Forum* University of North Georgia

Practice Tests for IGCSE English as a Second Language: Reading and Writing Book 1, with Key University of Michigan Press

In this seminal volume leading language and literacy scholars clearly articulate and explicate major social perspectives and approaches in the fields of language and literacy studies. Each approach draws on distinct bodies of literature and traditions and uses distinct identifiers, labels, and constellations of concepts; each has been taken up across diverse global contexts and is used as rationale and guide for the design of research and of educational policies and practices. Authors discuss the genesis and historical trajectory of the approach with which they are associated; offer their unique perspectives, rationales, and engagements; and investigate implications for understanding language and literacy use in and out of schools. The premise of the book is that understanding concepts, perspectives, and approaches requires knowing the context in which they were created, the rationale or purpose in creating them, and how they have been taken up and applied in communities of practice. Accessible yet theoretically rich, this volume is indispensable for researchers, students, and professionals across the fields of language and literacy studies.
