First, you are in shock, then denial, then you cry, and then you scream. You cry some more, scream some more, then try to work it out. You ask yourself why at least twenty times a day. You can't sleep. You blame him. You blame yourself. That's the nature of a breakup, and it's not easy. In *The Feisty Woman's Guide to Surviving Mr. Wonderful*, author Elizabeth Allen offers suggestions for surviving the journey through a middle-age breakup. Using examples from a host of breakup stories, including her own, Allen presents a humorous guide to help you get through the fiasco and come out of it a stronger, more vibrant, confident, powerful, and totally evolved woman. Allen presents strategies for dealing with the emotional issues that arise after such an event, and she explores other topics relating to women's health and well-being. With humor and sarcasm, *The Feisty Woman's Guide to Surviving Mr. Wonderful* shows that moving on with your life after a breakup provides a true testament to the strength of all women.

The book describes — How to shoot and process still image “nightscares” – images of landscapes taken at night by the light of the Moon or stars ... and ... How to shoot and assemble time-lapse movies of the stars and Milky Way turning above Earthly scenes, all using DSLR cameras. The 400-page multi-touch book includes — 50 embedded HD videos (no internet connection required) demonstrating time-lapse techniques. 60 multi-page tutorials with step-by-step instructions of how to use software: Adobe Bridge, Adobe Camera Raw, Photoshop, Lightroom, LRTimelapse, Advanced Stacker Actions, StarStaX, Panolapse, Sequence, GBTimelapse, and more. Numerous Photo 101 sections explaining the basic concepts of photography and video production (f-stops, ISOs, file types, aspect ratios, frame rates, compression, etc.). Numerous Astronomy 101 sections explaining the basics of how the sky works (how the sky moves, where the Moon can be found, when the Milky Way can be seen, when and where to see auroras). Reviews of gear – I don't just mention that specialized gear exists, I illustrate in detail how to use popular units such as the Time-Lapse+, Michron, and TriggerTrap intervalometers, and the All-View mount, Radian, Mindarin Astro, eMotimo, and Dynamic Perception motion-control units, with comments on what's good – and not so good – to use. You'll learn — What are the best cameras and lenses to buy (cropped vs. full-frame, Canon vs. Nikon, manual vs. automatic lenses, zooms vs. primes). How to set your cameras and lenses for maximum detail and minimum noise (following the mantra of “exposing to the right” and using dark frames). How to shoot auroras, conjunctions, satellites, comets, and meteor showers. How to shoot nightscares lit only by moonlit, and how to determine where the Moon will be to plan a shoot. How to shoot & stitch panoramas of the night sky and Milky Way, using Photoshop and PTGui software. How to shoot tracked long exposures of the Milky Way using camera trackers such as the iOptron Star Tracker and Sky-Watcher Star Adventurer. How to develop Raw files, the essential first step to great images and movies. How to process nightscape stills using techniques such as compositing multiple exposures, masking ground and sky, and using non-destructive

adjustment layers and smart filters. How to shoot and stack star trail images made of hundreds of frames. How to assemble time-lapse movies from those same hundreds of frames. How to plan a time-lapse shoot and calculate the best balance of exposure time vs. frame count vs. length of shoot, and recommended apps to use. How to process hundreds of frames using Adobe Camera Raw, Bridge, Photoshop, and Lightroom. How to shoot and process advanced “Holy Grail” time-lapse transitions from day to night. How to shoot motion-control sequences using specialized dolly and pan/tilt devices. How to use time-lapse processing tools such as LRTimelapse, Panolapse, Sequence, and Advanced Stacker Actions. What can go wrong and how best to avoid problems in the field.

The Declaration of Independence stated that all men are created equal, yet the long and continuing struggle for civil rights in the United States seems to indicate otherwise. This reference guide details the most critical civil rights laws in U.S. history, moving from the period of slavery, to the Civil War, to the Reconstruction, to the civil rights era of the mid- to late-20th century. An overview essay introduces each period, and 36 individual laws are examined in essays placing the bills in their historical contexts. Each law is then presented in an edited and, when appropriate, annotated form, so students can read and understand the actual words of the law. Many of the notable and notorious laws in U.S. legislative history have come in the area of civil rights. Among these are the Fugitive Slave Act, the Missouri Compromise, the Emancipation Proclamation, the 13th, 14th, and 15th Amendments, the Civil Rights Act of 1964, and the Voting Rights Acts of 1965. This uncommonly helpful guide to U.S. civil rights legislation also includes timelines, a bibliography, and an index.

Did you know that Santa used to wear a blue tricorne hat and yellow stockings before he traded it in for his trademark red suit? Did you know that chocolate coins are now available in pound sterling and euro currencies? And did you know that it would be far healthier to eat your vitamin-packed Christmas tree than your chocolate coins - and that artificial Christmas trees were originally made from toilet brushes? In this delightful gem of a book, Martin Pullen has put together the most exhaustive, witty - and completely useless - companion to Christmas you could ever want. Perfect as a stocking-filler or after-dinner entertainment, *The Useless Guide to Christmas* is filled to the brim with fascinating facts about everyone's favourite holiday that are sure to have you entertaining friends and family right through the festive season - and beyond!

Endorsed by CACHE, this is the ideal book for you if you are an early years professional, a Level 2 or Level 3 child care learner, are working in a pre-school or are working as a child minder. This book will de-mystify the revised 2012 Early Years Foundation Stage, and show how you can deliver the new EYFS using the best and most effective standards of professional practice. Each chapter explains a key theme of the EYFS and follows the same model to ensure ease of reading: 'Understanding this theme', 'Looking at children', 'What the experts say' and 'Effective practice'. The most important theory and research relating to each aspect of the EYFS is clearly and simply explained, and suggestions as to how this can influence effective practice are included. Links between child development and the EYFS are demonstrated using carefully analysed observations of children at different ages, highlighting not only common themes but also the uniqueness in every child's learning and development. Case studies in every chapter provide practical examples of best practice and activities help you reflect on and develop your own

practice.

With new medications, medical therapies, and increasing numbers of older and medically complex patients seeking dental care, all dentists, hygienists, and students must understand the intersection of common diseases, medical management, and dental management to coordinate and deliver safe care. This new second edition updates all of the protocols and guidelines for treatment and medications and adds more information to aid with patient medical assessments, and clearly organizes individual conditions under three headings: background, medical management, and dental management. Written by more than 25 expert academics and clinicians, this evidence-based guide takes a patient-focused approach to help you deliver safe, coordinated oral health care for patients with medical conditions. Other sections contain disease descriptions, pathogenesis, coordination of care between the dentist and physician, and key questions to ask the patient and physician.

Practical Guide to Evidence provides a clear and readable account of the law of evidence, acknowledging the importance of arguments about facts and principles as well as rules. The fourth edition has been revised and updated to address the radical changes brought about by the Criminal Justice Act 2003, particularly in relation to hearsay, character evidence and opinion evidence and to expand coverage of the Human Rights Act 1998. Particular attention is given to changes made by the revised Codes of Practice, and to the growing body of case law on topics such as reverse burden of proof, the cross-examination of rape victims, evidence obtained by entrapment, and silence in the face of police questioning. Now including enhanced pedagogical support such as chapter summaries, further reading advice and boxed examples, this leading textbook can be used on both undergraduate and professional courses.

Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it

is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn how to teach academic skills using nonacademic examples. Parts 1-3 are thus useful for anyone involved in teaching academic English, whether they have used the other books in the series or not. Part 4 suggests two syllabuses for teaching writing and presenting skills, based on the two core books: English for Writing Research Papers English for Presentations at International Conferences This book will help you i) understand the world of your students (i.e. academic research), ii) plan courses, and iii) exploit the What's the Buzz? sections in the books on Writing, Presentations, Correspondence and Interacting on Campus. Adrian Wallwork has written over 30 books covering General English (Cambridge University Press, Scholastic), Business English (Oxford University Press), and Scientific English (Springer). He has trained several thousand PhD students from all over the world to write and present their research. Adrian also runs a scientific editing service: English for Academics (E4AC).
