Ein besonderes Anliegen der Herausgeber war es, in den Abschnitten dieses Ergänzungsbandes zwischen den Ergebnissen der experimentellen Virologie und denen klinischer Forschung zahlreiche Brücken zu schlagen, und zwar im Sinne morphologischer und funktioneller Dermatologie. Gerade die dermatologische

Virusforschung zeigte uns in letzter Zeit, wie morphologische und funktionelle Arbeitsweisen miteinander verschmelzen können, z. Written by academics and practitioners from various fields and regions with a "farm to fork" understanding. Includes concise and accessible chapters, providing an authoritative introduction for non-specialists and

readers from undergraduat e level upwards, as well as up-to-date foundational content for those familiar with the field. **Bibliography of Agriculture with Subject Index** Scholarly Editio ns This book primarily focuses on the African Sahel region, shedding new light on the epidemiology, socio-economics, clinical manifestations and control approaches of transboundary

animal diseases (TADs) in this specific region. In addition to the description of TADs in Sahelian Africa and connected regions, several issues regarding the burden of TADs, the role of national/regional/international veterinary organizations in the surveillance process, animal mobility, one health and TADs in the dromedary are discussed. The book contains 22

chapters and is structured in three parts, i- general features and commonalities, ii- viral diseases, iii- bacterial diseases. Each chapter was written by a group of experts specialized in the topic. This work will be of general interest to researchers, veterinarians, veterinary public health officers, and students engaged in the surveillance and control of animal infectious diseases,

included those of zoonotic nature and that are prevalent in the Sahel. Virology & AIDS Abstracts Frontiers Media SA Avian Influenza (AI) and Newcastle Disease (ND) are two devastating diseases of poultry, which cause losses to the poultry industry and influence the liveability of rural communities worldwide. Following the H5N1 epidemic they appear to be endemic at least in Asia,

Eastern Europe, The Middle East and Africa. Particularly in case of AI outbreaks it is essential that infection is diagnosed promptly and that isolates are made available to the international scientific community. Currently, several organisations including OIE, FAO and the EC have organised training courses in affected areas. However, often these courses do not

cover all aspects of AI/ND diagnosis but only certain aspects. This results in fragmented areas of knowledge and in the application of different diagnostic protocols in different parts of the world. The objective of this book is to provide a comprehensive approach to AI diagnosis ranging from the clinical elements that should trigger a suspicion in the field, to the post mortem technique,

collection of samples, processing/ shipment of specimens, virological, serological and molecular diagnosis and guidelines for notification. *Transboundary Animal Diseases in Sahelian Africa and Connected Regions* Elsevier Eggs are economical and of high nutritional value, yet can also be a source of foodborne disease. Understanding of the factors influencing egg quality

has increased in recent years and new technologies to assure egg safety have been developed. Improving the safety and quality of eggs and egg products reviews recent research in these areas. Volume 1 focuses on egg chemistry, production and consumption. Part one sets the scene with information on egg production and consumption in certain countries. Part

two then provides essential information on egg formation and chemistry. Factors that impact egg quality are the focus of part three. Chapters cover the role of poultry breeding, hen nutrition and laying environment, among other significant topics. Part four addresses organic and free range egg production, the impact of egg production on the environment and non-

poultry eggs. A chapter on processed egg products completes the volume. With its distinguished editors and international team of contributors, Volume 1 of Improving the safety and quality of eggs and egg products is an essential reference for managers in the egg industry, professionals in the food industry using eggs as ingredients and all those with a research interest in the
