Develop compelling character arcs using the power of myth! In the best novels, characters undergo dramatic changes

that keep readers turning pages. A Writer's Guide to Characterization shows you how to develop such meaningful character arcs in your own work--stories of transformation that will resonate with readers long after the story ends. In this comprehensive guide, author Victoria Lynn Schmidt examines cross-cultural archetypes to illustrate how they can make your work more powerful and compelling. Plus, you'll learn how to draw from Jungian psychology to add complexity and believability to your characters. Schmidt also provides: 40 lessons on character development (with examples from well-known films and novels) that you can apply to your own work Questionnaires and exercises to help you select male and female archetypes and adapt them to your story

15 classic animal archetypes (including the coyote, snake, tiger, and butterfly) you can use to build convincing character profiles With *A Writer's Guide to Characterization*, you'll have the information you need to infuse the development of your characters with drama and authenticity.

B has spent the last few months bunking with the Angels, a group of teens dedicated to eradicating the evil dead from the face of the earth, beginning with the undead roaming the abandoned wreckage that was once London. But the Angels' mission is a bit more complicated than that, and B takes to the streets of a very changed London to decide: is it a mission really to be believed? But instead of answers, B finds

a horror beyond imagining.

Black Ice Graham & Whiteside Limited
In 1972 Lorene Cary, a bright, ambitious black teenager from Philadelphia, was transplanted into the formerly all-white, all-male environs of the elite St. Paul's School in New Hampshire, where she became a scholarship student in a "boot camp" for future American leaders. Like any good student, she was determined to succeed. But Cary was also determined to succeed without selling out. This wonderfully frank and perceptive memoir describes the perils and ambiguities of that double role, in which failing calculus and winning a student election could both be interpreted as betrayals of one's skin. *Black Ice* is also a universally recognizable document of a woman's

adolescence; it is, as Houston Baker says, "a journey into selfhood that resonates with sober reflection, intelligent passion, and joyous love."

Electrorheological Materials OECD

This treatise is a compendium of

refereed papers based on invited talks presented at the American Chemical Society Symposium on Electrorheological (ER) Materials and Fluids. ER fluids were first investigated 50+ years ago. These fluids, which change rheology when placed in an electric field, were recognized, from the beginning, for allowing an extremely efficient interface between electrical control and mechanical devices. Critical problems, however, existed with the initial fluids, which prevented them from serious consideration for large-scale applications. While over time some of the critical problems have been solved and activity in ER technology has increased, commercial success has remained elusive. A recent Department of Energy report concluded that a

primary reason for the failure to commercialize this promising technology is due to a lack in understanding the physics and chemistry of how the materials work. The goal of the symposium was to address the issue of understanding how ER materials work and how they can be used. One of the outcomes of the symposium, which we hope is conveyed in this book, is a feeling that if the mechanism of ER is to be fully understood and improved, expertise from diverse fields must be applied to the problem.

From one of Canada's most exciting writers and ecological thinkers, a book that changes the way we see nature and shows that in restoring the living world, we are also restoring ourselves. The *Once and Future World* began in the moment J.B. MacKinnon realized the grassland he grew up on was not the pristine wilderness he had always believed it to be. Instead, his home prairie was the outcome of a long history of transformation, from the disappearance of the grizzly bear to the

introduction of cattle. What remains today is an illusion of the wild--an illusion that has in many ways created our world. In three beautifully drawn parts, MacKinnon revisits a globe exuberant with life, where lions roam North America and 20 times more whales swim in the sea. He traces how humans destroyed that reality, out of rapaciousness, yes, but also through a great forgetting. Finally, he calls for an "age of restoration," not only to revisit that richer and more awe-filled world, but to reconnect with our truest human nature. MacKinnon never fails to remind us that nature is a menagerie of marvels. Here are fish that pass down the wisdom of elders, landscapes still shaped by "ecological ghosts," a tortoise that is slowly remaking prehistory. "It

remains a beautiful world," MacKinnon writes, "and it is its beauty, not its emptiness, that should inspire us to seek more nature in our lives."
