Growing Bonsai Bonsai Techniques II
Bonsai—the Japanese art of training plants to form elegant sculptures—is an age-old craft that appeals to gardeners and non-gardeners alike. Bountiful Bonsai presents a radical, new approach that applies bonsai techniques to everyday container gardening, instantly turning houseplants and herbs into beautiful and unusual bonsai sculptures! Bonsai expert Richard Bender not only

expects his plants to look good but also expects to yield pleasant fragrances, fresh herbs and fruits for his table. He shows readers how to create "instant bonsai" by shaping a range of common house plants, including: Fragrant hibiscus and jasmine Kitchen herbs such as rosemary and thyme Luscious fruits like cherries and oranges Medicinals such as tea tree and camphor laurel This beautifully illustrated volume provides all the information you need to get started, from plant choice advice to care requirements and bonsai "carving" tips. Suitable for indoor gardening, or shaping

exquisite bonsai fruit trees for outside gardens, Bender turns a finicky art into a hobby accessible to all. Bonsai have graced Japanese homes for centuries; now they can yield useful crops that will simultaneously satisfy your artistic sensibility and also provide some wonderful meals!

Learn all about bonsai tree design and care with this comprehensive Japanese bonsai gardening book. Japanese miniature landscapes and, particularly, dwarf trees-"bonsai," as they are frequently called even in the West-have long been admired throughout the world. It may come as a surprise to inexperienced gardeners but the creation and care of bonsai is a comparatively simple art which can actually be systematically taught rather than, as in earlier books on the subject, just talked about vaguely. Now, given a reasonably green thumb and a modicum of patience, anyone in any country can create his own bonsai. The Japanese art of Miniature Trees and Landscapes contains detailed instructions, together with many helpful diagrams and charts

and a treasury of photographs, on every phase of the art: propagation and training, with hints for those in a hurry and for small-apartment dwellers; daily and seasonal care, and treatment of pests; how to judge, select, and exhibit bonsai, with emphasis always upon the untold enjoyment they can provide. Included also, for those who want still more detailed information, are invaluable appendices concerning tools and equipment, soil analyses, and precise data on the more than three hundred species of plants used in making bonsai.

Bonsai with Japanese Maples

Kodansha International

This book tells the awe-inspiring stories of bonsai and penjing trees in the collection of the National Arboretum in Washington D.C. It details their valuable role in international diplomacy and as instruments of American presidential influence. It also describes their inclusion in world's fair exhibitions, in Asian-inspired gardens around the country, and as a window onto the extensive cultivation of bonsai in North America today. An extensive first-hand account by Dr. John L. Creech is included about the first extraordinary gift of 53 bonsai from Japan to the U.S. in 1976 which prompted the founding of the National

Bonsai & Penjing Museum. *Bonsai & Penjing, Ambassadors of Beauty and Peace* describes how Chinese penjing and North American bonsai were later added to the Museum, making its collection the most comprehensive in the world. Stories of individual trees and forest plantings are featured, as are the roles played by the skilled and talented creators of these living art forms—people such as John Naka, Saburo Kato, Yuji Yoshimura, Harry Hirao, and Dr. Yee-Sun Wu. Armchair travelers can experience what a visit to the Museum is like, including the discovery of its remarkable viewing stones. *Bonsai & Penjing, Ambassadors of Beauty and Peace* will delight anyone intrigued by these living works of art and curious about the stories they bring to

life.

"With 288 color pages, Liang's is one of the best [books on the subject]. Her book includes a breath-taking photo gallery of bonsai, basic styles, group planting, plant physiology, cultivation, propagation, transplanting and repotting, and training and dwarfing--in

other words, everything the bonsai grower needs to know."--Booklist
Cultivating bonsai is a fine art, and this extravagantly produced volume, filled with hundreds upon hundreds of lavish full-color photographs, showcases the very best and most beautiful specimens. Many of the trees have won international awards, were gifts bestowed by heads of state, and have been featured in TV documentaries. Some have even been the subjects of a commemorative stamp series. Professor Amy Liang, a world-famous leader in the field, surveys the history of bonsai in its many schools and styles, and offers practical techniques and highly detailed instructions for those who want to shape and nurture their own trees. The remarkable images display dazzling miniature evergreens,

flowering and fruited trees, and their foliage.
