This book is about supervision in the legal profession with a focus on the experience of novice lawyers. It is the first of its kind. Until now there have been a range of books dedicated to professional supervision in many disciplines, but not law. Supervision is an important link between formal university-based legal education and independent practice and is relevant to a range of contemporary legal practice issues including changes driven by technology, workplace culture, regulating law firm management, and well-being. This book aims to be scholarly and practical. It provides an overview of how supervision is positioned in the legal regulatory framework; it describes how supervision is conceived in the legal profession and practice management literature; and draws lessons from clinical legal education and other professional disciplines. By reporting on survey data, this book also provides insights into practitioners' attitudes and perceptions about supervision in legal practice.

"This course and this book are about management and managers. Managers are one thing that all organizations--no matter the size, kind, or location--need. And there's no doubt that the world managers face has changed, is changing, and will continue to change. The dynamic nature of today's organizations means both rewards and challenges for the individuals who will be managing those organizations. Management is a dynamic subject, and a textbook on it should reflect those changes to help prepare you to manage under the current conditions. We've written this 14th edition of Management to provide you with the best possible understanding of what it means to be a manager confronting change and to best prepare you for that reality. But not every student aspires to a career in management. And even if you do, you may be five or ten years away from reaching a managerial position. So you might rightly feel that taking a course in management now may be getting ahead of the game. We hear you. In response to these concerns, we've added new material to this book that is important and relevant to everyone working in an organization--manager and non-manager alike. Our "Workplace Confidential" pages identify, analyze, and offer suggestions for dealing with the major challenges that surveys indicate frustrate employees the most. You should find these pages valuable for helping you survive and thrive in your workplace. Surprisingly, this topic has rarely been addressed in business programs. Inclusion in an introductory management course appeared to us to be a logical place to introduce these challenges and to provide guidance in handling them"--
