UPCO's Physical Setting Review

Barrons Educational Series Explorations in Earth Science contains a collection of 68 laboratory investigations that can be incorporated into an Earth science course that covers geology, weather, climate,

astronomy, and environmental issues. The variety of the exercises contained in the manual provides instructors with the flexibility to use those that suit their individual preferences and which they view as essential for their students. Included is a Prologue that contains activities that address the skills and concepts that are integrated throughout an Earth science course. The investigations are aligned with the New York State Math, Science, and Technology Standards and the National Science Education Standards. Appendices in the manual correlate labs to the New York State Physical Setting/Earth Science Core Curriculum and several well-known

textbooks. Also included are appendices containing the Earth Science Reference Tables required by the New York State Physical Setting Core Curriculum and supplementary charts teachers will find useful in delivering their courses. Incorporated into the Teacher's Edition is an appendix suggesting Internet sites appropriate for each chapter. Each laboratory investigation contains clearly stated instructions, report sheets, and questions that reflect both the procedural techniques and results students should obtain. Many labs can be adapted to an inquiry/problem-solving approach in which the written

activity would often serve the teacher as a guide, but might not be used by students. The Teacher's Edition contains an array of suggested long-term investigations, an equipment and supplies list, and a comprehensive guide preceding each activity. This section is of great use to veteran teachers and is most valuable to teachers new to teaching Earth Science.

If Students Need to Know It, It's in This Book This book develops the Earth science skills of high school students. It builds skills that will

help them succeed in school and on the New York Regents Exams. Why The Princeton Review? We have more than twenty years of experience helping students master the skills needed to excel on standardized tests. Each year we help more than 2 million students score higher and earn better grades. We Know the New York Regents Exams Our experts at The Princeton Review have analyzed the New York Regents Exams, and this book provides the most up-to-date, thoroughly researched practice possible. We break down the test into individual skills to familiarize students with the test's structure, while increasing their overall skill level. We Get Results We know what

it takes to succeed in the classroom and on tests. This book includes strategies that are proven to improve student performance. We provide content groupings of questions based on New York standards and objectives detailed lessons, complete with skill-specific activities three complete practice New York Regents Exams in Physical Setting/Earth Science *Physical Setting* This lab manual provides Skill Sheets and includes traditional lab exercises as well as inquiry-based lab activities. Earth Science Review Book is user friendly for both the teacher and the student. Since the content is aligned with the New York State Core Curriculum

for Physical Setting/Earth Science, a teacher can feel confident that all the required topics are sufficiently developed. The suggested outline of units moves from the concrete material to the more abstract subjects such as meteorology and astronomy. Throughout the book there is ample opportunity for review of basic skills and ways to tie in the various units. For example, isolines are discussed early in the

year and then revisited later in the weather topics. The student has the opportunity to use the book as both a reference and a workbook. The extensive number of constructed response items as well as multiple choice questions found interspersed within the topics give ample practice. The multiple Regents Exams found at the back of the book can be used both at the end of the course for review and whenever appropriate throughout the year.
