Patterns of the Future explains the current world using the theory of long-term development waves (Kondratiev waves). Markku Wilenius, Professor of Futures Studies, argues that we are now entering the sixth wave: the age of intelligent, integrated technologies, helping to restore the balance between humans, technology and nature by radically improved material and energy efficiency and a wiser use of human potential. The unfolding sixth wave will challenge our current values, institutions and business models. Using a systems-based approach, Patterns of the Future

analyses how corporations and the public sector can navigate in the sixth wave. Case studies look at specific examples of this, using high-profile companies to demonstrate both the best- (and worst-) case scenarios of innovation for change. This book spans concepts from multiple disciplines in the social sciences, making it relevant not only to undergraduate and graduate students in futures studies, environmental studies, economics, and business, but also national policymakers, think tanks, corporate operators and indeed for any one seriously interested in the future. Making a Difference Springer Science & Business Media
Der Band sucht aus den Blickwinkeln der Sozialen Arbeit, der Sozialpolitik, der Verwaltungswissenschaften und der im Umbau der Sozialsysteme hereingeholten Wirtschaftswissenschaften eine Bilanz hinsichtlich der heutigen Steuerung der Organisationen im Sozialbereich zu ziehen. Was sich daraus für das Selbstverständnis des Sozialmanagements und seine zukünftigen Entwicklungen ergibt, wird kritisch beleuchtet und theoretisch zu begründen versucht.

Organizational Innovation by Integrating Simplification Kogan Page Publishers

This book explores a range of critical issues and emerging topics relevant to the linkages between information technologies and organizational systems. It encourages debate and opens up new avenues of inquiry in the fields of Information Systems, organization and management studies by investigating selected themes of growing research interest from multiple disciplinary perspectives such as organizational innovation and impact, information technology, innovation transfer, and knowledge management. The volume is divided into two sections, each of which focuses on a specific theme: ICT, organizational innovation and change; and ICT and knowledge management. The content of each section is based on a selection of the best papers (original double-blind peer-reviewed contributions) presented at the annual conference of the Italian chapter of the AIS, held in Genoa, Italy in November 2014.

Organizational Innovation and Change Oxford University Press
The way we manage organizations seems increasingly out of date. Deep inside, we sense that more is possible. We long for soulful workplaces, for authenticity, community, passion, and purpose. In this groundbreaking book, the author shows that every time, in the past, when humanity has shifted to a new stage of consciousness, it has achieved extraordinary breakthroughs in collaboration. A new shift in consciousness is currently underway. Could it help us invent a more soulful and purposeful way to run our businesses and nonprofits, schools and hospitals? A few pioneers have already cracked the code and they show us, in practical detail, how it can be done. Leaders, founders, coaches, and consultants will find this work a joyful handbook, full of insights, examples, and inspiring stories.

Coaching Self-Organising Teams Nomos Verlag
There is a tendency to assume that teams will naturally know how to self-organise and optimise their collective talents. This thoughtful and engaging book explores the practicalities of coaching teams and some of the challenges that naturally occur because of who we are as human beings. Part of The Professional Coaching Series, this book challenges the assumption that self-organising teams will work in all settings, answering some of the recurring questions and challenges observed in many organisations. How do we connect with each other, so we create trust? How do we work through conflict and see it as part of a natural ebb and flow in relationships? How do we create meaningful work in the context of an ever-changing environment? The opening chapter lays out some basic team coaching principles to help set the stage for coaching people in teams and there are coaching questions in each chapter to engage the reader, as well as tools they can use immediately. Coaching teams is more than just applying coaching skills. It requires a deep understanding of how people behave and an adaptive approach to coaching. This book provides both research references and practical tools to help team coaches start their team coaching journey.

A Guide to Creating Organizations Inspired by the Next Stage in Human Consciousness Harvard Business Review Press

"The Oxford Handbook of China Innovation provides a contemporary and authoritative view of the role of innovation in China's extraordinary emergence. The Handbook consists of chapters written by over sixty experts from universities and research institutions worldwide, who describe and analyze this phenomenon with criticism, discussion of policy issues, and views about further development. It focuses on the microeconomic factors in China's growth, of which the critical force has been the steady drive for innovation. It identifies the many factors instrumental in the development of innovation and evaluates those that are specific to China's context, and those applicable to other nations. The scope of topics is comprehensive, covering China's development policies, the place of innovation in national priorities, the components of the national innovation system and the resources required for their effective deployment. These include the institutions and policies that provide incentives and support to technological development, including people, financial mechanisms, private ownership, rule of law and culture. The issue of foreign influence is also addressed, including the evolution of policy towards inward foreign direct investment and knowledge transfer and China's goals for outward foreign direct investment. The chapters include discussion of the capabilities and strategies of world-class Chinese innovators, together with emerging issues such as environmental remediation, green energy, digital innovation, open innovation, mass innovation and China's future science and technology policy. As China emerges as a contender for global leadership in many fields, the Handbook provides a foundation for informed conjecture regarding the challenges ahead"--

The Pragmatic Theory of the Firm Begins with Purpose and Ends with Sustainable Capitalism Springer

Dieser Sammelband zeichnet ein umfassendes Bild der Selbstorganisation in den Humanwissenschaften und stellt sich den folgenden Fragen: Was ist Selbstorganisation? Welche Prozesse in den Humanwissenschaften sind selbstorganisiert? Was sind die Merkmale solcher Prozesse und wie kann man sie identifizieren? Welche Möglichkeiten der Steuerung gibt es? Wie können Prozessmonitoring und Prozessfeedback auch in Therapie und Beratung unterstützend helfen? Die Beiträge befassen sich mit einem breiten Spektrum an Themen, Methoden und Konzepten der Selbstorganisation komplexer Systeme, u.a. aus der Synergetik, nichtlinearen Dynamik und Chaostheorie.

Managing Information and Technology Springer

This textbook provides a clear understanding of leadership needs in today's business world, explained within the scope of hard and soft leadership skills. It captures qualities and skills such as spirituality, empathy, moral behavior, mindfulness, empathy, problem solving, self-confidence, ambition, knowledge, global understanding, and information technology. This text explains and provides guidelines for the implementation of each skill and includes examples from contemporary and historical leaders inviting the reader to consider each quality and engage in self-reflection. This book deviates from excessive theoretical descriptions presenting a timely, hands-on approach to leadership. Featuring contributions from academics and professionals from around the world, this text will be of interest to students, researchers, professionals in business and leadership who aspire to lead beyond their immediate environment.

Organizational Innovation by Integrating Simplification Oxford University Press (UK)

Die Digitalisierung der Pflege ist umstritten. Ist es legitim, ein Handlungsfeld zu technologisieren, das Sorgearbeit mit vulnerablen Menschen in den Mittelpunkt stellt? Die Debatte um die Entwicklung, Erprobung und Bewertung von neuen, digitalen Technologien für die Pflege boomt in Deutschland. Nach einer dynamischen Forschungs- und Entwicklungsphase zu digital gestützten Informationssystemen und Assistiven Technologien für die Pflege steht nun eine Auseinandersetzung um die Bedeutung von Autonomen und gegebenenfalls auch Lernenden Systemen für die Pflege und Pflegebildung bevor. Dieser Band versammelt grundlegende und pragmatische Reflexionen zum Thema, um Impulse und Orientierungen für eine systematische Diskussion um Chancen und Herausforderungen des Technikeinsatzes auf der praktischen Versorgungsebene der direkten Pflege, der Ebene der institutionellen Organisation von Versorgungsprozessen sowie einer übergeordneten gesellschaftlichen Ebene zu liefern. The discourse about the development, testing and evaluation of new, digital technologies for nursing is dynamic. Digitally supported information systems and assistive technologies to support nursing have become increasingly established in recent years. Currently, the importance of Robotics and Autonomous Systems as well as Learning Systems for nursing and nursing education is increasingly discussed. The volume presents fundamental and pragmatic reflections on the digitalisation of nursing in order to provide impulses and orientation for a systematic discussion about opportunities and challenges of the use of technology in nursing. The contributions deal with the possibilities and limitations of digitalisation for the practice of nursing, the institutional organisation of care and for the social understanding of care.

Select Proceedings of ICFMMP 2019 American Academic Press

This volume offers a simple, systematic guide to creating a knowledge sharing practice in your organization. It shows how to build the enabling environment and develop the skills needed to capture and share knowledge gained from operational experiences to improve performance and scale-up successes. Its

recommendations are grounded on the insights gained from the past seven years of collaboration between the World Bank and its clients around the world—ministries and national agencies operating in various sectors—who are working to strengthen their operations through robust knowledge sharing. While informed by the academic literature on knowledge management and organizational learning, this handbook's operational background and many real-world examples and tips provide a missing, practical foundation for public sector officials in developing countries and for development practitioners. However, though written with a public sector audience in mind, the overall concepts and approaches will also hold true for most organizations in the private sector and the developed world.

Der Band nimmt Erwerbsformen und -verläufe in den Blick, die zwischen abhängiger und selbstständiger Beschäftigung changieren. Sie haben - u. a. getrieben durch die digitale Transformation der Arbeitswelt - einen großen Variantenreichtum ausgebildet. Ihnen gegenüber stoßen wissenschaftliche Kategorien und politische Gestaltungskonzepte an ihre Grenzen, da sie entweder auf Selbstständigkeit und Unternehmertum oder auf Abhängigkeit und Beschäftigtenstatus ausgelegt sind. Mit dem Band werden neue Möglichkeiten der Erfassung, Beschreibung und der politischen Gestaltung von hybriden Erwerbskonstellationen ausgelotet.

Humanistic Management in Practice John Wiley & Sons

In this book, Sharda S. Nandram and Karel J. Samsom, entrepreneurial researchers at Nyenrode Business University, explore entrepreneurship through the lens of human behaviour. The study presents personal stories of 60 entrepreneurs and entrepreneurial executives, from CEOs to creative leaders in the public sector. The book shows how mutually beneficial results can occur when the pursuit of profit is balanced with the interdependent needs of individuals, the community and the planet.

Developing Informed Intuition for Decision-Making

Vandenhoeck & Ruprecht

The Innovating Organization is a systematic, empirical study of the change in forms from traditional multi-divisional hierarchies to flatter, less rigid networks. The rich array of data generated by the eight current international case studies provides fresh insights into the network organization, and suggests new methodologies for organizational research. Coopers & Lybrand, BP, Unilever, Rabobank and Saab are amongst the companies surveyed.

Servant Leadership, Social Entrepreneurship and the Will to Serve CRC Press

In this book, experts discuss whether volatility, uncertainty, complexity and ambiguity (VUCA) represent a challenge or a business opportunity. More intense debates on global climate

change, increased turbulence in financial quarters, increased job insecurity and high levels of stress at the workplace are attracting attention in the context of organization behavior and entrepreneurship. Fear and confusion have become part and parcel of business, often undermining trust, cooperation and inspiration. As a response, a new way of organizing self-

management has emerged. The book combines practical wisdom from East and West, to develop integrative self-management theory and practice; provides direction to support an integrative mind-set, integrative organization and integrative leadership; and presents VUCA as an opportunity and necessity for development and growth, rather than a threat.
