In the past half century, deadly disease outbreaks caused by novel viruses of animal origin - Nipah virus in Malaysia, Hendra virus in Australia, Hantavirus in the United States, Ebola virus in Africa, along with HIV (human immunodeficiency virus), several influenza subtypes, and the SARS (sudden acute respiratory syndrome) and MERS (Middle East respiratory syndrome) coronaviruses - have underscored the urgency of understanding factors influencing viral disease emergence and spread.

Emerging Viral Diseases is the summary of a public workshop hosted in March 2014 to examine factors driving the appearance, establishment, and spread of emerging, re-emerging and novel viral diseases; the global health and economic impacts of recently emerging and novel viral diseases in humans; and the scientific and policy approaches to improving domestic and international capacity to detect and respond to global outbreaks of infectious disease. This report is a record of the presentations and discussion of the event.

Proceedings of the Ocean Climate Data Workshop, February 18-21, 1992 Berghahn Books

Traumatic brain injury (TBI) accounts for up to one-third of combat-related injuries in Iraq and Afghanistan, according to some estimates. TBI is also a major problem among civilians, especially those who engage in certain sports. At the request of the Department of Defense, the IOM examined the potential role of nutrition in the treatment of and resilience against TBI.

*Biochar for Environmental Management* Alfred Music

Has a commercial ever brought you to tears? Has a movie ever inspired you so much you change your way of life? Has the series finale of a television show ever broken your heart? Has a video game ever altered your perception of reality? If you're like most consumers, you answered 'yes' to at least one of those questions. Whether you remember it or not, the music of that ad, film, show or game probably played a big role in influencing your emotional response during that experience. In fact, music is included in media specifically for the purpose of connecting with audiences on a deeper level that visuals alone cannot access. A strong music strategy is fundamental to the success of television, film,

brands and video games. Because of higher expectations for audiovisual content, it will take more than clever animation or a celebrity cameo to connect with consumers in an authentic, organic way. By providing audiences with a genuine music experience, whether with an exclusive song through an artist partnership or by featuring new music from an emerging band, you can build a bond that extends far beyond product experience. Music touches us emotionally in a way that words seldom do. We feel it - we remember it. In *Return of The Hustle*, a leading music and marketing industry insider discusses the diverse audio touchpoints for four key industries and shows how marketers, storytellers, and advertisers can use music to effectively guide audiences along the customer journey from passive consumers to brand advocates. *Return of The Hustle* provides readers with a blueprint for music strategy that professionals at any level in any industry can use to attract consumers, immerse them into the content, and extend relationships between them and the brand long after the commercial ends or the credits roll. With detailed case studies, exhaustive interviews, and thorough research, *Return of the Hustle* gives readers the playbook to use the marketing power of music to drive business results.

Implementing the IBM Storwize V3500 Wiley-Blackwell

Contrary to popular perceptions, cultural heritage is not given, but constantly in the making: a construction subject to dynamic processes of (re)inventing culture within particular social formations and bound to particular forms of mediation. Yet the appeal of cultural heritage often rests on its denial of being a fabrication, its promise to provide an essential ground to social-

cultural identities. Taking this paradoxical feature as a point of departure, and anchoring the discussion to two heuristic concepts—the "politics of authentication" and "aesthetics of persuasion"—the chapters herein explore how this tension is central to the dynamics of heritage formation worldwide.

Proceedings of the International Workshop held at Gakushi-Kaikan (University Alumni Association) Tokyo, Japan, April 14-15, 1980 iUniverse

Step by step instructions with plenty of photographs, plus detailed information on 6 cylinder 1HZ, 1HD-T, 1HD-FT and 1HD-FTE Toyota Landcruiser vehicles including turbo versions from 1990 to 2002, 4WD. for 70's, 80's and 100's Series body styles. Engines, all transmissions, axles, suspension, brakes, body, wiring schematics, problem solving, plus more. Tune-up, Maintenance, Repairs, Mechanical, Bodywork, Electrical diagrams, Specifications, Restoration. Worldwide specifications. Suitable for DIY, enthusiast or the mechanic.

*Emerging Viral Diseases* National Academies Press

The first part of this volume focuses on biosynthesis, metabolism, biodegradation, functions, properties and applications of miscellaneous polymers, such as hemozoin, thymine-containing styrene polymers, polythioesters, polyphosphate, polyhydroxymethionine, polyketides, and natural polyacetals. The second part then goes on to treat the biodegradation of a wide range of synthetic polymers, e.g. substituted cellulose nylon polycarbonate polyvinyl alcohol polyurethanes polystyrenes polyethylene polyanhydrides

**A Personal Program to to Activate Your Brain and Do Everything Better** Haynes Manuals

The research program in gamma-ray astronomy focuses on increasing our knowledge of the nature and origin of galactic and extragalactic gamma rays, and understanding high-energy processes in the Sun, celestial objects, interstellar medium, and extragalactic space. This book not only provides an overview of the latest research and future plans for space-borne and ground-based experiments dedicated to the observation of the gamma-ray sky, but also addresses the topic of variable gamma-ray sources from the perspective of their identification and counterparts at different wavelengths. It further gives an overview of the theory related to the most qualified emission processes that take place in these sources and of the nature of their variability. Sample Chapter(s). Integral: 4 Years in Orbit (767 KB). Contents: The Suzaku Mission (K Yamaoka); Gamma-Ray Astrophysics with AGILE (F Longo et al.); The GLAST Mission (J E McEnergy); Recent Results from CANGAROO (M Mori); VERITAS: Status and Performance (J Holder); Gamma Ray Pulsars in the GLAST Era (M Razzano); Supernovae and Gamma-Ray Burst (M Della Valle); Solving GRBs and SGRs Puzzles by Precessing Jets (D Fargion et al.); Multiwavelength Observations and Theories of Blazars (G Tosti); Gamma Ray Bursts (L Amati); X-Rays and GeV Flares in GRB Light Curves (A Galli et al.); The Online Monitor for the GLAST Calibration Unit Beam Test (L Baldini et al.); Gamma-Ray Burst Physics with GLAST (N Omodei); The Global Fit Approach to Time-Resolved Spectroscopy of GRBs (A Chernenko); and other papers. Readership: Gamma-ray astronomers; astrophysicists; students and researchers involved in gamma-ray astronomy, both theoretical and experimental; researchers in the development of new gamma-ray detectors.

Springer Science & Business Media

Hydrogen has been recognised as a universal, clean fuel which is expected to provide energy to our homes, industry and automobiles in the future. It is considered as one of the most interesting alternatives to petroleum fuels. A considerable amount of research and development work on production, storage and transportation, and utilisation of hydrogen is in progress all over the world. In India, several institutions have been working on the various aspects of the hydrogen considering it as an energy vector. A three-day National Workshop on Hydrogen Energy was organised at Indian Institute of Technology (IIT) Delhi to focus attention on developments in hydrogen energy at national and international levels and to provide a forum to coordinate contemporary research trends in the country in this field. The presentations made at the Workshop covered the topics which are considered to be of significance to work out the perspective, problems and promises for the future for transition to hydrogen energy. The proceedings of the Workshop are reported in this book, which include the inaugural address, description of the national research and development programme in the field of hydrogen energy, papers presented on production, storage and transportation, and utilisation of hydrogen and the panel report. In the inaugural address, emphasis is laid on the need for a transition from the presently used fuels to the newer ones, preferably to those which are renewable and non-polluting such as hydrogen.

*Global Challenges, Global Solutions: Workshop Summary* National Academies Press

Handbook of Biodegradable Polymers, the seventh volume in the Drug Delivery and Targeting book series, provides a source manual for synthetic procedures, properties and applications of bioerodible polymers. The authors describe widely available materials such as polyactides, collagen and gelatin, as well as polymers of emerging importance, such as the genetically-engineered and elastin-based polymers which are either proprietary or in early stages of development. Section 1 addresses synthetic absorbable polymers, and Section 2 profiles natural, semi-synthetic and biosynthetic polymers. Section 3 discusses the surface characterization of degradable polymers, the modeling of biodegradation and non-medical polymers. This book is ideal for researchers from academia and industry as well as chemists, pharmacists and physicians who deal with biopolymers, drug delivery and targeting, bioengineering and implantable devices.

Biopolymers, Miscellaneous Biopolymers and Biodegradation of Synthetic Polymers National Academies Press

Businesses of all sizes are faced with the challenge of managing huge volumes of data that are becoming increasingly valuable. But storing this data can be costly, and extracting value from the data is becoming more and more difficult. IT organizations have limited resources and cannot afford to make investment mistakes. The IBM® Storwize® V3500 system provides a smarter solution that is affordable, simple, and efficient, which enables businesses to overcome their storage challenges. IBM Storwize V3500 is the most recent addition to the IBM Storwize family of disk systems. It delivers easy-to-use, entry-level configurations that are specifically designed to meet the modest budgets of

small and medium-sized businesses. IBM Storwize V3500 features the following highlights: - Consolidate and share data with low cost iSCSI storage networking. - Deploy storage in minutes and perform storage management tasks quickly and easily through a breakthrough graphical user interface. - Experience peace of mind with proven IBM Storwize family high-availability data protection with snapshot technology and IBM warranty support. - Optimize efficiency by allocating only the amount of disk space needed at the time it is required with high performance, thin-provisioning capabilities.

A neuroscientist transforms the way we think about our brain, our health, and our personal happiness in this clear, informative, and inspiring guide—a blend of personal memoir, science narrative, and immediately useful takeaways that bring the human brain into focus as never before, revealing the powerful connection between exercise, learning, memory, and cognitive abilities. Nearing forty, Dr. Wendy Suzuki was at the pinnacle of her career. An award-winning university professor and world-renowned neuroscientist, she had tenure, her own successful research lab, prestigious awards, and international renown. That's when to celebrate her birthday, she booked an adventure trip that forced her to wake up to a startling reality: despite her professional success, she was overweight, lonely, and tired and knew that her life had to change. Wendy started simply—by going to an exercise class. Eventually, she noticed an improvement in her memory, her energy levels, and her ability to work quickly and move from task to task easily. Not only did

Wendy begin to get fit, but she also became sharper, had more energy, and her memory improved. Being a neuroscientist, she wanted to know why. What she learned transformed her body and her life. Now, it can transform yours. Wendy discovered that there is a biological connection between exercise, mindfulness, and action. With exercise, your body feels more alive and your brain actually performs better. Yes—you can make yourself smarter. In this fascinating book, Suzuki makes neuroscience easy to understand, interweaving her personal story with groundbreaking research, and offering practical, short exercises—4 minute Brain Hacks—to engage your mind and improve your memory, your ability to learn new skills, and function more efficiently. Taking us on an amazing journey inside the brain as never before, Suzuki helps us unlock the keys to neuroplasticity that can change our brains, or bodies, and, ultimately, our lives.

**Workshop** IBM Redbooks

Application of polymers from renewable resources - also identified as biopolymers - has a large potential market due to the current emphasis on sustainable technology. For optimal R&D achievements and hence benefits from these market opportunities, it is essential to combine the expertise available in the vast range of different disciplines in biopolymer science and technology. The International Centre of Biopolymer Technology - ICBT - has been created with support from the European Commission to facilitate co operation and the exchange of

scientific knowledge between industries, universities and other research groups. One of the activities to reach these objectives, is the organisation of a conference on Biopolymer Technology. In September 1999, the first international conference on Biopolymer Technology was held in Coimbra, Portugal. Because of its success - both scientifically and socially - and because of the many contacts that resulted in exchange missions or other ICBT activities, it was concluded that a second conference on Biopolymer Technology was justified. This second conference was held in Ischia, Italy in October 2000. And again, the scientific programme contained a broad spectrum of presentations in a range of fields such as biopolymer synthesis, modification, technology, applications, material testing and analytical methods.

The Shining Religion and the Samurai Passport Press Incorporated

In March and early April 2009, a new, swine-origin 2009-H1N1 influenza A virus emerged in Mexico and the United States. During the first few weeks of surveillance, the virus spread by human-to-human transmission worldwide to over 30 countries. On June 11, 2009, the World Health Organization (WHO) raised the worldwide pandemic alert level to Phase 6 in response to the ongoing global spread of the novel influenza A (H1N1) virus. By October 30, 2009, the H1N1 influenza A had spread to 191 countries and resulted in 5,700 fatalities. A national emergency was declared in the United States and the swine flu joined SARS and the avian flu as pandemics of the 21st century. Vaccination is currently available, but in limited supply, and with a 60 percent effectiveness rate against the virus. The story of how this new influenza virus spread out of Mexico to other parts of North America and then on to Europe, the Far East, and now Australia

and the Pacific Rim countries has its origins in the global interconnectedness of travel, trade, and tourism. Given the rapid spread of the virus, the international scientific, public health, security, and policy communities had to mobilize quickly to characterize this unique virus and address its potential effects. The World Health Organization and Centers for Disease Control have played critical roles in the surveillance, detection and responses to the H1N1 virus. The Domestic and International Impacts of the 2009-H1N1 Influenza A Pandemic: Global Challenges, Global Solutions aimed to examine the evolutionary origins of the H1N1 virus and evaluate its potential public health and socioeconomic consequences, while monitoring and mitigating the impact of a fast-moving pandemic. The rapporteurs for this workshop reported on the need for increased and geographically robust global influenza vaccine production capacities; enhanced and sustained interpandemic demand for seasonal influenza vaccines; clear "triggers" for pandemic alert levels; and accelerated research collaboration on new vaccine manufacturing techniques. This book will be an essential guide for healthcare professionals, policymakers, drug manufacturers and investigators.

**Report of the Workshop on Biology-based Technology to Enhance Human Well-being and Function in Extended Space Exploration** Springer Science & Business Media

This book contains the lectures presented at the International Workshop on Relation between Laboratory and Space Plasmas held at Gakushi-Kaikan (University Alumni Association) Kanda in Tokyo, Japan on 14 - 15 April, 1980. Its aim was to bring together laboratory, fusion and space plasma physicists and to highlight

the communality of basic plasma phenomena, similarities and differences observed in the laboratory and in space, thus exchanging information and views on new ideas to link both areas. Although similar type of conferences were held in Europe and recently in the States, this is the first time we have had in Japan for such an international meeting, which may be regarded as an extended version of our national Workshop held twice at the Institute of Plasma Physics of Japan (IPPJ) in 1976 and in 1977 (IPPJ Research Report No. 286 and No. 365). The Workshop consisted of seven regular sessions and one special session with approximately ninety participants from all over the world. Thirty-six papers, invited and contributed, were presented, nine from U. S. A., three from U. S. S. R., two of each from Germany, France, India, one of each from Sweden, Canada, Belgium and fifteen from Japan. The topics covered were: (1) The Critical Velocity (2) Beam Plasma Discharges and Interactions (3) Double Layers and Shocks (4) Instabilities in the Equatorial and Auroral Electrojets (5) Turbulent and Anomalous Plasmas (6) Plasma Irregularities (7) Solar Plasma Phenomena (8) Active Experiments in Space Plasmas and Their Simulation in the Laboratory.

The Food Forum convened a public workshop on February 22-23, 2012, to explore current and emerging knowledge of the human microbiome, its role in human health, its interaction with the diet, and the translation of new research findings into tools and products that improve the nutritional quality of the food supply. The Human Microbiome, Diet, and Health: Workshop Summary summarizes the presentations and discussions that took place

during the workshop. Over the two day workshop, several themes covered included: The microbiome is integral to human physiology, health, and disease. The microbiome is arguably the most intimate connection that humans have with their external environment, mostly through diet. Given the emerging nature of research on the microbiome, some important methodology issues might still have to be resolved with respect to undersampling and a lack of causal and mechanistic studies. Dietary interventions intended to have an impact on host biology via their impact on the microbiome are being developed, and the market for these products is seeing tremendous success. However, the current regulatory framework poses challenges to industry interest and investment.
