Boys' Life

In the tradition of Phil Knight's Shoe Dog comes the incredible untold story of how Netflix went from concept to company—all revealed by co-founder and first CEO Marc Randolph. Once upon a time, brick-and-mortar video stores were king. Late fees were ubiquitous, video-streaming unheard of, and widespread DVD adoption seemed about as imminent as flying cars. Indeed, these were the widely accepted laws of the land in 1997, when Marc Randolph had an idea. It was a simple thought—leveraging the internet to rent movies—and was just one of many more and far worse proposals, like personalized baseball bats and a shampoo delivery service, that Randolph would pitch to his business partner, Reed Hastings, on their commute to work each morning. But Hastings was intrigued, and the pair—with Hastings as the primary investor and Randolph as the CEO—founded a company. Now with over 150 million subscribers, Netflix's triumph feels inevitable, but the twenty-first century's most disruptive start-up began with few believers and calamity at every turn. From having to pitch his own mother on being an early investor, to the motel conference room that served as a first office, to server crashes on launch day, to the now-

infamous meeting when Netflix brass pitched Blockbuster to acquire them, Marc Randolph's transformational journey exemplifies how anyone with grit, gut instincts, and determination can change the world—even with an idea that many think will never work. What emerges, though, isn't just the inside story of one of the world's most iconic companies. Full of counter-intuitive concepts and written in binge-worthy prose, it answers some of our most fundamental questions about taking that leap of faith in business or in life: How do you begin? How do you weather disappointment and failure? How do you deal with success? What even is success? From idea generation to team building to knowing when it's time to let go, *That Will Never Work* is not only the ultimate follow-your-dreams parable, but also one of the most dramatic and insightful entrepreneurial stories of our time.

How to Cuss in Western

Published by the Boy Scouts of America for all BSA registered adult volunteers and professionals, Scouting magazine offers editorial content that is a mixture of information, instruction, and inspiration, designed to strengthen readers' abilities to better perform their leadership roles in Scouting and also to assist them as parents in strengthening families.

Industrial Engineering

When it was established in 1946, the Office of Naval Research was the main channel for Federal support of science in the United States. Since there are few fields of science or technology that cannot be related directly or indirectly to Navy requirements, the real choice becomes one of emphasizing areas of particular interest where anticipated results may have a direct bearing on future naval activities. Most research programs within ONR are organized along disciplinary lines, the main disciplines being the physical, mathematical, information, biological, medical, psychological, earth, material, and ocean sciences; but some programs center on such fields as aviation, vehicle, and sensor technologies. The Physical Science Program pursues research on radiation, lasers, acoustics, optics, electronics, superconductivity, magnetism, and surfaces. Research in the Mathematical Sciences Program covers the mathematical and computer sciences, the design of techniques for logistics and systems analysis, and the mechanics of fluids. The objectives of Biomedical research are to understand principles essential to maintaining the health and work capacity of personnel, to prevent disease, and to reduce stress factors such as pressure in diving. The Psychological Research Program seeks a better basis for understanding, improving, and predicting human performance in military environments. Thus, the reduction of manpower costs and the betterment of personnel effectiveness are anticipated benefits from investments in man-job and man-machine designs. The Earth Sciences Program has the objective of providing comprehensive knowledge of physical environments in which the Navy and Marine Corps must operate.

Boys' Life

Where nature writing meets humor—a raucous, hilarious look at life in the high desert of Nevada, from the author of *Raising Wild* and *Rants from the Hill*. Edward Abbey encouraged his readers to “be loyal to what you love, be true to the Earth, and fight your enemies with passion and laughter.” Here is Michael Branch’s response. Full of clear-eyed explorations of the natural world, witty cultural observations, and heart-warming family connections, *How to Cuss in Western* is a cranky and hilarious love letter of sorts to the western Great Basin Desert of Nevada.

Congressional Record

Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

That Will Never Work

The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).
