International Financial Reporting Standards: An Introduction Thomson South-Western
The book provides business students and accounting majors with a comprehensive introduction to practices and procedures. The text is well known for its highly respected author team, balanced approach, and real-world emphasis. The focus is primarily on the use of accounting information in today's business world. Content updates reflect current accounting and business practices, while greater attention is given to ethics, service enterprises and international issues. In addition, the text features a concise, accessible writing style; a design which emphasizes the user-oriented content; and technology components for both the instructors and students. The text features more than 230 publicly held companies as well as international, governmental and not-for-profit organizations to illustrate the real-world application of accounting principles. A company index at the end of the text includes web links to annual reports.

Principles of Financial Accounting offers balanced, flexible content supported by an array of truly integrated print and technology supplements. Whether an instructor wants to present a user or procedural orientation, incorporate new instructional strategies, develop students' core skills and competencies, or integrate technology into the classroom, the 2002e edition provides a total solution. This text--intended for use in a single semester or one-quarter course--assumes no previous training in accounting or business and is appropriate for both majors and non-majors. Principles of Financial Accounting is designed for financial accounting programs that prefer to start with a sole proprietorship approach and move at a slower pace than a corporate financial accounting course. New! Blackboard Course Cartridges and WebCT e-Packs deliver course content over the Internet and can be used in a traditional classroom setting or as a complete distance learning solution. Customized course materials include reviews, quizzes, activities, solutions, PowerPoint slides, and more. New! Teaching Accounting Online, an interactive Web-based workshop, allows faculty to design and deliver online accounting courses. New! Discussion and assignment materials include more financial statements and excerpts from real company reports to promote decision

making through the use of real-world financial information. New! An increased focus on cash flow throughout the text highlights the effect of business activities on cash flow. New! "Focus on Business" boxes emphasize business strategy as it relates to the key themes of ethics, practice, technology, and international issues. Each box provides insights into real companies, including start-ups and e-commerce businesses. New! "Decision Points," based on excerpts from annual reports and business journals, promote critical thinking and decision making by presenting students with a situation that requires them to make a decision using accounting information. Decision Points in the financial chapters are presented from "A User's Focus" while the Decision Points in the managerial chapters provide "A Manager's Focus." New! In most chapters, the opening Learning Objective highlights the focus on management by exploring how managers use accounting information to make decisions. New! The text examines performance measurement by integrating the concept of using financial information in performance evaluation. New! An annotated Chapter 1 helps students understand the purpose and value of the book's pedagogical framework and how to use it to their advantage.

As convergence becomes a closer reality, International Financial Reporting Standards are essential for both accounting students and CPAs to understand. By implementing first-hand experience of the IFRS coverage from past CPA exams, A GUIDE TO INTERNATIONAL FINANCIAL REPORTING STANDARDS, 3rd Edition provides the basics students need to know to pass the CPA exam. Updates to revenue recognition and leases, the differences between IFRS and U.S. GAAP, and coverage of the SEC's position on its adoption of IFRS have all been included in this booklet. Recent revisions by the IASB on conceptual framework have also been added. Written for learners who are new to IFRS, A GUIDE TO INTERNATIONAL FINANCIAL REPORTING STANDARDS continues to deliver content relevant to students, such as the history, structure, and status of IFRS, and its relationship to U.S. GAAP. This text works well as a standalone item or to supplement an existing course where IFRS will be covered in more detail. Needles/Powers/Crosson PRINCIPLES OF ACCOUNTING is continuously evolving to meet the needs of today's learner. This edition's new structure is based on research with students about the best way to deliver content in this course! The chapters in Needles/Powers/Crosson have been organized into the Three Section Approach, which helps you more easily digest the content. The first section is Concepts and focuses on the overarching accounting concepts that require consistent reiteration throughout the course. With a clear understanding of the concepts, you are then ready to experience the second section--Accounting Applications. Here you practice the application of accounting procedures with features like "Apply It" and a new transaction analysis model, which clearly illustrates how transactions are the result of business decisions and recorded in a way to show their effects on the financial statements. Finally, you utilize section three, Business Applications. This section illustrates how the concepts and procedures are used to make business decisions. Real company examples are used throughout the chapter to show students the relevance of the material. This logical progression through the material is further supported in the online environment in CengageNOW with the Tri-Level Problem. This problem mirrors the Three Section Approach and connects the sections to facilitate a more complete understanding. These substantial changes will make you a more efficient learner and are designed to prepare you for a business world increasingly complicated by ethical issues, globalization. managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Needles/Powers/Crosson's FINANCIAL AND MANAGERIAL ACCOUNTING continuously evolves to meet the needs of today's learner. This edition's new structure is based on research about how to deliver content to students and how to mirror the way instructors have told us they teach. The authors have organized this edition into a new three-section approach: 1. The CONCEPTS section focuses on the overarching accounting concepts that require consistent reiteration throughout the course. 2. The ACCOUNTING APPLICATIONS section helps students apply the accounting procedures with features such as "Apply It!" and a new transaction analysis model. 3. The BUSINESS APPLICATIONS section illustrates how concepts and procedures are used to make real-world business decisions. As students walk through the new three-section approach, they gain extra practice with new corresponding TriLevel Problems within CengageNOW. These problems mirror the three sections in each chapter--Concepts, Accounting Applications, and Business Applications--to foster a complete understanding of each section. These substantial changes make students more efficient learners and prepare them to face a business world that is increasingly complicated by ethical issues, globalization, and technology.
