Summary Peter H. Diamandis & Steven Kolter's Bold Kogan Page Publishers

Today, early-stage investors and entrepreneurs find themselves in a dilemma in which they must choose between profit and impact; between traditional, for-profit-only models on the one hand, and multiple-bottom-line structures with a positive social or environmental impact on the other. At a time in which climate change, exponentially growing technologies, social polarization, and looming pandemics are calling into question humanity's priorities,

this Report to the Club of Rome and the World Academy of Art and Science dissolves this dilemma by proposing a new investment paradigm, namely Integral Investing. Integral Investing incorporates and transcends the best practices of both traditional venture capital and impact investing. It provides a seamless integration and shows how technological progress need not be our rival, but can instead be our ally in ensuring the prosperous society we all want. Drawing on her own investments and stellar track record since 1995, the author reveals the mechanism of Integral Investing. At the heart of it is a powerful, 360-degree de-risking tool called the Theta Model, which

reveals how to make smart investment decisions based on the comprehensive integration of traditional due-diligence criteria, sustainability metrics, and assessments of the founders' and team culture. But it doesn't stop there. In turn, this handbook demonstrates how to use human-centered AI to scale and digitalize the investment process. The goal here is to accelerate the use of exponential tech, capital, and consciousness leadership to transition to a sustainable global society: a process the author refers to as the Investment Turnaround. The 21 principles of Integral Investing, which she defines using Ken Wilber's Integral

Theory, lead to her manifesto on how to implement the UN Sustainable Development Goals within Planetary Boundaries by 2050 through early-stage investing and entrepreneurship. Similar to the 15th century, when the Medicis inspired the Renaissance, today humanity is once again at a crucial turning point where pioneering public and private financiers, investors, entrepreneurs, and other committed individuals have the opportunity to leave behind the legacy of a prosperous society. This handbook provides a source of inspiration, and shows how self-actualization, a positive mindset, and a consciousness that is backed by a world-

centric desire can become the driving force for solving the global grand challenges.

This is a Summary of Peter H. Diamandis & Steven Kolter's **Bold: How to Go Big, Create Wealth and Impact the World** A radical, how-to guide for using exponential technologies, moonshot thinking, and crowd-powered tools, **Bold** unfolds in three parts. Part One focuses on the exponential technologies that are disrupting today's Fortune 500 companies and enabling upstart entrepreneurs to go from "I've got an idea" to "I run a billion-dollar company" far faster than ever before. The authors provide exceptional insight into

the power of 3D printing, artificial intelligence, robotics, networks and sensors, and synthetic biology. Times bestselling authors of Abundance and BOLD comes a practical playbook for how technology is converging to radically change our future. Technology is accelerating far more quickly than anyone could have imagined. During the next decade, we will experience more upheaval and create more wealth than we have in the past hundred years. In this gripping and insightful road map to our near future, futurist Peter H. Diamandis and science writer Steven Kotler investigate how wave after wave of exponentially accelerating technologies will impact both our daily lives and society as a whole. What happens as AI, robotics, and

virtual reality crash into 3D printing, blockchain, and global gigabit networks? How will these convergences transform today's biggest industries? What will happen to the way we raise our kids, govern our nations, and care for our planet? Diamandis and Kotler probe the science of technological convergence and how it will reinvent every part of our lives- transportation, retail, advertising, education, health, entertainment, food, real estate, and finance-taking humanity into uncharted territories and reimagining the world as we know it. As indispensable as it is gripping, *The Future Is Faster Than You Think* provides a prescient

look at our impending future. Book jacket.

Die verkannten Grundlagen der Ökonomie Lannoo Meulenhoff - Belgium
Digital technologies are now central to the machinations of capitalism. How are they giving rise to new forms of capital accumulation and domination? And in what terms are these changes being promoted and justified by a new and incredibly powerful elite? This book takes on such questions. Beyond demonstrating how digital technologies make new forms of capital accumulation possible, Huberman interrogates the ideological transformations that have accompanied the emergence of digital capitalism. She

examines how business gurus, entrepreneurs, and venture capitalists make claims about how digital technologies contribute to the common good, foster collaboration and connectivity, and render life more convenient, even if this convenience comes at the expense of values such as privacy and liberty. Ultimately, Huberman argues that the spirit of digital capitalism is Janus-faced and reveals deeper cultural contradictions at the heart of contemporary American society: promising, in the same moment, to liberate us and surveil us, enrich us, and yet render our lives more economically precarious. Smart and thought-provoking, this

book offers new perspectives that will speak to anyone interested in the contours of contemporary capitalism, particularly students and scholars of economic anthropology and sociology. *Speciesism in Biology and Culture* Routledge
Wir sind in einem Zeitalter angekommen, in dem der Mensch verschwinden könnte – und mit ihm die Welt, die er so gnadenlos ausbeutet. Denn was ist heute für uns nicht billig und schnell zu haben – auf Kosten der vielen Menschen, die weniger privilegiert sind als wir? Wir ruinieren unsere Erde, wenn wir nicht schleunigst kooperative Wege des Zusammenlebens und Wirtschaftens finden

und den westlichen Raubtierkapitalismus bändigen. Das ist die Botschaft des Ökonomen Raj Patel und des Historikers Jason W. Moore. In sieben Kapiteln widmen sie sich jeweils einem Aspekt dieser Entwertung der Welt: Natur wird ebenso entwertet wie Geld, Arbeit, Pflege, Nahrung, Energie und Leben. So eindrücklich wie umfassend schildern sie, dass die Krisen unserer Zeit in Wirklichkeit eine einzige Krise sind und dass diese einen langen Vorlauf in der Geschichte hat. Wenn heute billige Arbeitskräfte billige Chlorhühnchen zu billigen Chickenwings verarbeiten, dann ist das, wie sie exemplarisch schildern, ein

zerstörerisches Wirtschaftsprinzip, das sich über Jahrhunderte herausgebildet hat. Patel und Moore führen vor Augen, dass es an der Zeit ist, diese Entwicklung zu durchbrechen und unser Wirtschafts- und Sozialsystem anders zu denken, wenn wir unsere Welt verstehen und damit bewahren wollen.

 The individual consumer now wields more power than ever before, with increased exposure to global cultures and media. This means that customer perception is now critically important and as such must occupy the heart of any brand. This provides a wealth of opportunities to work with and adapt to customers' motivations, but at the

same time presents a series of challenges around retaining their attention and fostering positive relationships with them. The secret of a brand's success often lies in its ability to respond nimbly to the unexpected adoption of its products or services - essentially its ability to surprise its consumers. To all intents and purposes, brands must continue to introduce innovative and intriguing experiences to customers so that they can remain differentiated from the herd and deliver a human message amongst increasingly automated and unremarkable communications. Developed from experience at the forefront of new branding

developments at market-leading companies, and drawing on the lessons learned by cultivating start-ups with sponsors including Google, Customer Experience Branding expertly reviews the key considerations when devising brand strategy to introduce an element of newness and interest into customer interactions. Case studies are delivered from major brands that continually achieve this, including Apple, Starbucks, Virgin, LEGO, Google, GoPro, Uber, Instagram, KLM and Handelsbanken, and the Foreword has been provided by Sir Richard Branson, who has himself unfailingly responded to consumer need and overseen a remarkable

portfolio over the years as a result.

This book promotes the

development of nontraditional literacies in adult education, especially as these critical literacies relate to global citizenship, equity, and social justice. As this edited collection argues, a rapidly changing global environment and proliferation of new media technologies have greatly expanded the kinds of literacies that one requires in order to be an engaged global citizen. It is imperative for adult educators and learners to understand systems, organizations, and relationships that influence our lives as citizens of the world. By compiling a comprehensive list of foundational, sociocultural, technological and informational, psychosocial and

environmental, and social justice literacies, this volume offers readers theoretical foundations, practical strategies, and additional resources. Bold Routledge Simple is seldom easy to implement. However, as a recent Flow trainee puts it, "Flow 'plays nice' with everyone! And, it will enable you to successfully customize and implement whatever solution you choose." Flow is the distillation of over fifty years of successful, hands-on experience that has delivered more than 100 million US dollars in value-add to companies in Europe, the United States, and Asia. Putting Flow into practice, one company increased profit \$550,000 in one year

on \$2.5 million of revenue, and a large Asian telecom turned around a mission critical project from a projected 2-year schedule overrun and 300% budget increase to delivering seven months early and \$4 million under the original budget in a 90-day period. Ted and Andrew Kallman unify Traditional management and Agile methodologies enabling successful results, regardless of the existing leadership framework. Simple and easy to understand, Flow helps individuals, teams, and organizations create and sustain high performance. Summary: Bold Business Book Summaries Gegen den Big-Other-Kapitalismus ist Big

Brother harmlos. Die Menschheit steht am Scheideweg, sagt die Harvard-Ökonomin Shoshana Zuboff. Bekommt die Politik die wachsende Macht der High-Tech-Giganten in den Griff? Oder überlassen wir uns der verborgenen Logik des Überwachungskapitalismus? Wie reagieren wir auf die neuen Methoden der Verhaltensausswertung und -manipulation, die unsere Autonomie bedrohen? Akzeptieren wir die neuen Formen sozialer Ungleichheit? Ist Widerstand ohnehin zwecklos? Zuboff bewertet die soziale, politische, ökonomische und technologische Bedeutung der großen Veränderung, die wir erleben. Sie zeichnet ein unmissverständliches

Bild der neuen Märkte, auf denen Menschen nur noch Quelle eines kostenlosen Rohstoffs sind - Lieferanten von Verhaltensdaten. Noch haben wir es in der Hand, wie das nächste Kapitel des Kapitalismus aussehen wird. Meistern wir das Digitale oder sind wir seine Sklaven? Es ist unsere Entscheidung! Zuboffs Buch liefert eine neue Erzählung des Kapitalismus. An ihrer Deutung kommen kritische Geister nicht vorbei.

knapp, prägnant, unterhaltsam. Wer Macht haben will, darf sich nicht zu lange mit moralischen Skrupeln aufhalten. Wer glaubt, dass ihn die Mechanismen der Macht nicht interessieren müssten, kann morgen ihr Opfer sein. Wer behauptet, dass Macht auch auf sanftem Weg erreichbar ist, verkennt die Wirklichkeit. Beyond Market Assumptions: Oil Price as a Global Institution
Diversions Books

The first comprehensive leadership textbook with diversity at its heart, challenging traditional ways of thinking about leadership.

Leading into the Future Kodansha

This book defines oil price as a social institution that exists beyond supply-demand mechanisms.

Discussing oil markets in the context of the

broader sociology of prices, it covers a number of theoretical and practical dimensions, such as new market uncertainties and trends, and social perceptions of energy security and of power. Further, based on case studies it explores the implications for OPEC, Russia, and Central and Eastern Europe, as well as for the energy transition and for international investment arbitration. Featuring contributions from leading academics, researchers and business professionals, the book offers an interdisciplinary perspective on the oil price. "This book brings together an impressive team of scholars with fresh perspectives on the oil price. Even as

the world attempts energy transition, oil consumption continues and the oil price is likely to become even more unpredictable and unclear than in the past. This book helps make sense of this challenging topic." - Indra Overland is a Research Professor and Head of Centre for Energy Research, Norwegian Institute of International Affairs (NUPI) "A revealing and multidimensional analysis of oil price fluctuations in a market that seeks less uncertainty. This book discusses market and price evolution in the context of market theories, history and real-time market analysis. A welcome and timely contribution to our understanding of global energy markets." Dr. Sara

Vakhshouri is Founder and President of SVB Energy International and Professor of Energy Security at the Institute of World Politics.
