Materials informatics: a 'hot topic' area in materials science, aims to combine traditionally bio-led informatics with computational methodologies, supporting more efficient research by identifying strategies for time- and cost-effective analysis. The discovery and maturation of new materials has been outpaced by the thicket of data created by new combinatorial and high throughput analytical techniques. The elaboration of this "quantitative avalanche"—and the resulting complex, multi-factor analyses required to understand it—means that interest, investment, and research are revisiting informatics approaches as a solution. This work, from Krishna Rajan, the leading expert of the informatics approach to materials, seeks to break down the barriers between data management, quality standards, data mining, exchange, and storage and analysis, as a means of accelerating scientific research in materials science. This solutions-based reference synthesizes foundational physical, statistical, and mathematical content with emerging experimental and real-world applications, for interdisciplinary researchers and those new to the field. Identifies and analyzes interdisciplinary strategies (including combinatorial and high throughput approaches) that accelerate materials development cycle times and reduces associated costs Mathematical and computational analysis aids formulation of new structure-property correlations among large, heterogeneous, and distributed data sets Practical examples, computational tools, and software analysis benefits rapid identification of critical data and analysis of theoretical needs for future problems

Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in Arrow of God and No Longer at Ease.

Starting with an overview of the basic principles of TMD, such as the anatomy of the temporomandibular joint and its physiology and pathology in relation to clinical treatment, the book goes on to present the realities of managing patients, using a case-based approach to help readers understand and engage with the information. Each later chapter presents a different problem in the form of a case study, and each study features a systematic approach to aid learning. Temporomandibular Disorders: A Problem-Based Approach promotes learning as a dynamic process of active involvement. It encourages valuation by self-assessment with questions at the end of the book, and a unique link to an online interactive quiz where readers can test their knowledge of TMD. The final chapters include practical guides of how to make splints and samples of patient information sheets that can be used as templates. The book is illustrated in full colour, with helpful clinical images and diagrams. A thoroughly revised and updated edition of Thomas C. Foster's classic guide—a lively and entertaining introduction to literature and literary basics, including symbols, themes, and contexts—that shows you how to make your everyday reading experience more rewarding and enjoyable. While many books can be enjoyed for their basic stories, there are often deeper literary meanings interwoven in these texts. How to Read Literature Like a Professor helps us to discover those hidden truths by looking at literature with the eyes—and the literary codes—of the ultimate professional reader: the college professor. What does it mean when a literary hero travels along a dusty road? When he hands a drink to his companion? When he's drenched in a sudden rain shower? Ranging from major themes to literary models, narrative devices, and form, Thomas C. Foster provides us with a broad overview of literature—a world where a road leads to a quest, a shared meal may signify a communion, and rain, whether cleansing or destructive, is never just a shower—and shows us how to make our reading experience more enriching, satisfying, and fun. This revised edition includes new chapters, a new preface, and a new epilogue, and incorporates updated teaching points that Foster has developed over the past decade. *Holt People, Places, and Change* Stylus Publishing, LLC In order to get the best out of people in organisations, managers need to address the fundamental principals of people management: those of motivation, ability and confidence building. This proposed book aims to bring together clarity and understanding of these three main areas in one text with anecdotes and practical examples to enable managers to gain demonstrable improvements in organisational performance through their people. The material will be underpinned with just enough theory to establish a rationale for practice. While a highly practical text, the aim is to meet many of the learning outcome requirements of the Certificate in Management and Diploma in

Witnessing is something that Jesus has commanded all of us to do. Does that command make you a bit nervous? Would you like a new form of "witnessing" that is not only comfortable for everyone involved but produces exceptional results? Would you like to feel confident and relaxed while talking to others about faith? Today, there are definitely many negative stigmas surrounding the entire concept of witnessing the good news to others. In fact, while certainly well intentioned, most current witnessing practices have limited success and have even driven millions of people further away from developing a personal relationship with Jesus Christ. Christians desperately need to step back and take a strong look at the examples that Jesus Himself provided when witnessing to others. If we emulate the examples of Jesus, we can completely reinvent witnessing to once again be a positive, enjoyable, and, most importantly, successful part of

every Christian's life. Andy Adams was not a Christian for most of his life. He did not come to develop a relationship with Jesus Christ until the age of forty-three. During his pre-Christian life, many well-intentioned Christians attempted to use the typical forms of witnessing on Andy. Because of his history, he has a unique perspective of what does and does not work. In *Don't Scare the Lost Sheep*, Andy will: lead you through understanding the human behaviors along with basic concepts and processes related to witnessing help you to prepare yourself and develop a toolkit that you can easily use when the time comes for you to talk with others assist you in identifying potential "witnesses" guide you to set the stage for your efforts teach you to apply specific techniques that have a high probability of success--with a very comfortable approach

When another brother got himself into college, Tara decided to try a new kind of life.
