Ninth Street Women

Moma

Five women revolutionize the modern art world in postwar America in this "gratifying, generous, and lush" true story from a National Book Award and Pulitzer Prize finalist (Jennifer Szalai, New York Times). Set amid the most turbulent social and political period of modern times, *Ninth Street Women* is the impassioned, wild, sometimes tragic, always exhilarating chronicle of five women who dared to enter the male-dominated world of twentieth-century abstract painting -- not as muses but as artists. From their cold-water lofts, where they worked, drank, fought, and loved, these pioneers burst open the door to the art world for themselves and countless others to come.

Gutsy and indomitable, Lee Krasner was a hell-raising leader among artists long before she became part of the modern art world's first celebrity couple by marrying Jackson Pollock. Elaine de Kooning, whose brilliant mind and peerless charm made her the emotional center of the New York School, used her work and words to build a bridge between the avant-garde and a public that scorned abstract art as a hoax. Grace Hartigan fearlessly abandoned life as a New Jersey housewife and mother to achieve stardom as one of the boldest painters of her generation. Joan Mitchell, whose notoriously tough exterior shielded a vulnerable artist within, escaped a privileged but emotionally damaging Chicago childhood to translate her fierce vision into magnificent canvases. And Helen Frankenthaler, the beautiful daughter of a prominent New York family, chose the difficult path of the creative life. Her gamble paid off: At twenty-three she created a work so original it launched a new school of painting. These women changed American art and society, tearing up the

prevailing social code and replacing it with a doctrine of liberation. In *Ninth Street Women*, acclaimed author Mary Gabriel tells a remarkable and inspiring story of the power of art and artists in shaping not just postwar America but the future.

Why A World of Art?

Henry Sayre wrote the first edition of *World of Art* because he wanted to use a text in his own art appreciation course that truly represented all artists, not just the Western canon found at that time in the other texts. He also wanted a text that fostered critical thinking through looking

at, talking about, and questioning works of art for his students. We are proud to present the new sixth edition of World of Art, which further strengthens these two key aspects of the text while presenting hot topics like video and time-based media.

Rewritten and reorganized, this new edition weaves together the most recent scholarship, the most current thinking in art history, and the most innovative online supplements, including MyArtsLab and the Prentice Hall Digital Art Library. Experience the new Janson and re-experience the history of art. The Portable Edition of Janson's History of Art, Eighth Edition features four lightweight, paperback books packaged together along with optional access to a powerful student website, www.myartslab.com, making the text more student friendly than ever. Janson's History of Art is still available in the original hardcover edition and in Volume I and Volume II splits. The Portable Edition is comprised of four books, each representing a major period of art history: Long established as the classic and seminal introduction to art of the Western world, the Eighth Edition of Janson's History of Art is groundbreaking. When

Harry Abrams first published the History of Art in 1962, John F. Kennedy occupied the White House, and Andy Warhol was an emerging artist. Janson offered his readers a strong focus on Western art, an important consideration of technique and style, and a clear point of view. The History of Art, said Janson, was not just a stringing together of historically significant objects, but the writing of a story about their interconnections, a history of styles and of stylistic change. Janson's text focused on the visual and technical characteristics of the objects he discussed, often in extraordinarily eloquent language. Janson's History of Art helped to establish the canon of art history for many generations of scholars. The new Eighth Edition, although revised to remain current with new discoveries and scholarship, continues to follow Janson's lead in important ways: It is limited to the Western tradition, with a chapter on Islamic art and its relationship to Western art. It keeps the focus of the discussion on the object, its manufacture, and its visual character. It considers the contribution

of the artist as an important part of the analysis. This edition maintains an organization along the lines established by Janson, with separate chapters on the Northern European Renaissance, the Italian Renaissance, the High Renaissance, and Baroque art, with stylistic divisions for key periods of the modern era. Also embedded in this edition is the narrative of how art has changed over time in the cultures that Europe has claimed as its patrimony.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands,

from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate

works from the Middle Ages to the 20th century.

This volume explores the late medieval and early modern periods from the perspective of objects. While the agency of things has been studied in anthropology and archaeology, it is an innovative approach for art historical investigations. Each contributor takes as a point of departure active things: objects that were collected, exchanged, held in hand, carried on a body, assembled, cared for or pawned. Through a series of case studies set in various geographic locations, this volume examines a rich variety of systems throughout Europe and beyond.

The first book to address the significance of the materials and methods used to make contemporary artworks Today, artists are able to create using multiple methods of production—from painting to digital technologies to crowdsourcing—some of which would have been unheard of just a few decades ago. Yet, even as our means of making art become more

extraordinary and diverse, they are almost never addressed in their specificity. While critics and viewers tend to focus on the finished products we see in museums and galleries, authors Glenn Adamson and Julia Bryan-Wilson argue that the materials and processes behind the scenes used to make artworks are also vital to current considerations of authorship and to understanding the economic and social contexts from which art emerges. This wide-ranging exploration of different methods and media in art since the 1950s includes nine chapters that focus on individual processes of making: Painting, Woodworking, Building, Performing, Tooling Up, Cashing In, Fabricating, Digitizing, and Crowdsourcing. Detailed examples are interwoven with the discussion, including visuals that reveal the intricacies of techniques and materials. Artists featured include Ai Weiwei, Alice Aycock, Isa Genzken, Los Carpinteros, Paul Pfeiffer, Doris Salcedo, Santiago Sierra, and Rachel Whiteread. History of Modern Art Laurence King Publishing
What terms do we use to

describe and evaluate art, and how do we judge if art is good, and if it is for the social good? In How Art Can Be Thought Allan deSouza investigates such questions and the popular terminology through which art is discussed, valued, and taught. Adapting art viewing to contemporary demands within a rapidly changing world, deSouza outlines how art functions as politicized culture within a global industry. In addition to offering new pedagogical strategies for MFA programs and the training of artists, he provides an extensive analytical glossary of some of the most common terms used to discuss art while focusing on their current and changing usage. He also shows how these terms may be crafted to new artistic and social practices, particularly in what it means to decolonize the places of display and learning. DeSouza's work will be invaluable to the casual gallery visitor and the arts professional alike, to all those who regularly look at, think about, and make art—especially art students and faculty, artists, art critics, and curators.
