Miracles are real! Popular Catholic author and speaker, Elizabeth Ficocelli reveals signs of God's loving hand in history's most magnificent miracles. In brisk, easy to read accounts, Ficocelli relates these amazing (and true!) stories. Bleeding Hands, Weeping Stone explains why God performs miracles and what our disposition should be toward them. Some miracles are quiet and simple, some are dramatic - bordering on outrageous - but all of them astound and continually inflame our hearts to greater faith and more ardent love.

Jubilate TAN Books

Examines miracle stories from five religions, focusing on Hinduism, Judaism, Buddhism, Christianity, and Islam, and discussing how each religion views miracles.

Enrique's Journey Oxford University Press

The acclaimed author of Pandora's Lunchbox and former New York Times reporter delivers an "entertaining and highly useful book that gives you the tools to understand how alternative medicine works, so you can confidently make up your own mind" (The Washington Post). We all know someone who has had a seemingly miraculous cure from an alternative form of medicine: a friend whose chronic back pain vanished after sessions with an acupuncturist or chiropractor; a relative with digestive issues who recovered with herbal remedies; a colleague whose autoimmune disorder went into sudden inexplicable remission thanks to an energy healer or healing retreat. The tales are far too common to be complete fabrications, yet too anecdotal and outside the medical mainstream to be taken seriously scientifically. How do we explain them and the growing popularity of alternative medicine more generally? In The Magic Feather Effect, author and journalist Melanie Warner takes us on a vivid, important journey through the world of alternative medicine. Visiting prestigious

research clinics and ordinary people's homes, she investigates the scientific underpinning for the purportedly magical results of these practices and reveals not only the medical power of beliefs and placebo effects, but also the range, limits, and uses of the surprising system of self-healing that resides inside us. Equal parts helpful, illuminating, and compelling, *The Magic Feather Effect* is a "well-written survey of alternative medicine...fair-minded, thorough, and focused on verifiable scientific research" (Publishers Weekly, starred review). Warner's enlightening, engaging deep dive into the world of alternative medicine and the surprising science that explains why it may work is an essential read.

"What I have against religion is that the Judaeo-Christian mythology is not true. The simplest yet most exalted attribute of our species is the acute, persistent, unquenchable craving TO KNOW. Do you realize that to many men (and women) it makes a vast and a profound difference whether or not the things about them are as they appear?" —H.P. Lovecraft Does truth matter? For those who follow a religious path, truth may be secondary to comfort. But for many of us, there can be no comfort in untruths. In the author's experience and opinion, religion is responsible for a great many sins. In the name of religion—the pursuit of knowledge has been hampered. In the name of religion—women have been vilified. In the name of religion—countless acts of barbarism have been committed. Make no mistake, such things are still alive and well in the twenty-first century. Through the exploration of some of Christianity's most enduring mysteries and questions, *Does It Matter?* encourages you to re-examine your beliefs. Did Moses write the Old Testament? Was Jesus Christ the founder of Christianity? Do angels ever appear as female or children? Does the Bible say that the soul ascends to heaven or hell immediately after death? Was Mother Teresa really a godly woman? Has an actual miracle ever happened outside the Bible? What's more important, faith or truth? The answers may surprise you.

The focus of bioethical debates on exceptional cases neglects the underlying values—like justice and community—that would lend to a broader, more well-rounded understanding of today's world. Discussions of ethical problems in health care too often concentrate on exceptional cases. Bioethical controversies triggered by experimental drugs, gene-edited babies, or life extension are understandably fascinating: they showcase the power of medical science and technology while addressing anxieties concerning health, disease, suffering, and death. However, the focus on rare individual cases in the media spotlight turns attention away from more pressing ethical issues that impact global populations, such as access to health care, safe food and water, and the prevention of emerging infectious diseases. In *Bizarre Bioethics*, Henk A.M.J. ten Have argues that this focus on bizarre cases leads to bizarre bioethics with a narrow agenda for ethical debate. In other words, although these extreme cases are undeniably real, they present a limited and

skewed view of everyday moral reality. This focus also assumes that individuals are rational decision-makers, so that the role of feelings and emotions can be downgraded. Larger questions related to justice, solidarity, community, meaning, and ambiguity are not appreciated. Such questions used to be posed by philosophical and theological traditions, but they have been exorcised and marginalized in the development of bioethics. Science, ten Have writes, is not a value-free endeavor that provides facts and evidence: it is driven by underlying value perspectives that are often based on metaphors and world views from philosophical and theological traditions. Drawing on a rich analysis of the literature, ten Have explains how bioethical discussion can be enriched by these metaphors and develops a broader approach that critically delves into the imaginative world views that determine understanding of the world and human existence. Examining the roles of the metaphors of ghosts, monsters, pilgrims, prophets, and relics, ten Have illustrates how science and medicine are animated by imaginations that fuel the search for hope, salvation, healing, and a predictable future. *Bizarre Bioethics* invites students, researchers, policymakers and teachers interested in ethics and health care to think about the value perspectives on health and disease today.

This book deals with nineteenth century American-Jewish perceptions of Christianity and Jesus. While its concern is the centuries-old argument between Christians and Jews, it focuses on the American setting of that argument and shows how American conditions shaped it.

"The dramatic growth of Christianity around the world in the last century has shifted the balance of power within the faith away from the traditional strongholds of Europe and the United States to the Global South. While we typically imagine Western missionaries carrying religion to the ends of the earth, David R. Swartz shows that the line of influence has often run the other way, as evangelicals in nations such as Korea, India, and Uganda shaped the American church from abroad. Swartz tells stories of evangelicals crossing national boundaries, offering new insights into a tradition that imagines itself as simultaneously American and part of a global communion"--

To a lively cast of international players that shaped Manchuria during the early twentieth century, *At the Frontier of God's Empire* adds the remarkable story of Alfred Marie Caubrière (1876-1948). A French Catholic missionary, Caubrière arrived in Manchuria on the eve of the Boxer Uprising in 1899 and was murdered on the eve of the birth of the People's Republic of China in 1948. Living with ordinary Chinese people for half a century, Caubrière witnessed the collapse of the Qing empire, the warlord's chaos that followed, the rise and fall of Japanese Manchukuo, and the emergence of communist China. Caubrière's incredible personal archive, on which Ji Li draws extensively, opens a unique window into everyday interaction between Manchuria's grassroots society and international players. His gripping accounts personalize the Catholic Church's expansion in East Asia and the interplay of missions and empire in local society. Through Caubrière's experience, *At the Frontier of God's Empire* examines Chinese people at social and cultural margins during this period. A wealth of primary sources, family letters,

and visual depictions of village scenes illuminate vital issues in modern Chinese history, such as the transformation of local society, mass migration and religion, tensions between church and state, and the importance of cross-cultural exchanges in everyday life in Chinese Catholic communities. This intense transformation of Manchurian society embodies the clash of both domestic and international tensions in the making of modern China.

This personal, creative, critical work from a leading scholar of psychology is rooted in three novel concepts and aims to share critical pedagogy in the spirit of nascent potential found in the context of a colonial Puerto Rico. First comes the idea of 'pedagogy in (e)motion', or the emotional matrix of the teaching and learning process. Secondly, the author explores the notion of 'street pedagogy' as a genuine and powerful professional tool. And thirdly, the book underscores what Zambrana-Ortiz calls 'the interconnection of the artsience within the political and biographical act of teaching'. The purpose is to inform education teaching practice with the radical framework that, like the neurosciences, believes emotions to be a vital precursor to the planning of action, the process of decision-making and the broadening of our cognitive parameters. The chapters focus on different and yet complementary dimensions of a college teaching initiative boasting a unique interplay between a transgressive narrative, reinvented methodology and authentic samples of students' contributions to the project. Traditionally, emotional and visceral experiences have been downplayed and rejected as fundamental components of knowledge. This book makes the case for their reinstatement, and proposes that the pleasure and commitment of teaching itself can be seen as resistance given the challenging social and political context, the bureaucracy of the Puerto Rican higher education system, and the cynicism of the self-confessed cognoscenti who think that little political progress can come from within the university system. Such resistance has proved for the author a source of inspiration and has contributed to her creation and reconceptualization of approaches to critical and useful pedagogy. D education To my students who inspire many stories and provoke many emotions and challenge my capacities... To Aura, Ignacio and Jaime for their unconditional love and their everyday lessons... A cknowledgments Many friends, mentors and colleagues from the University of Puerto Rico and United States were very important pieces to my creative work. Thanks to Donaldo Macedo who encouraged the initial proposal and to Joe Kincheloe for accepting it and bringing guidance in the right moment. Colleagues like Roamé Torres and Angeles Molina, from their directive positions, were extremely supportive while Sandra Macksoud, José Solís, Pedro Subirats, and Ada Prabhavat gave me guidance and constant insights in editing and translation, as well as crucial material for my narrative. Juan Vadi enhanced my graphic elements with his talent; while college mentors, current colleagues, teachers, and former graduate and undergraduate students allowed me to write their stories and reflections binging fresh accents and life to the book. Thanks for ever!
