Financial Management of Hospitals SBPD Publications

For many years, the Department of Defense (DOD) has experienced serious financial management problems with regard to accounting, billing, and collecting for its foreign military sales (FMS) program. DOD has not had an adequate program-wide financial management plan since the program's inception. Each military department and the Security Assistance Accounting Center designed their own systems, which have not provided accurate or timely data. As a result, DOD is unable to provide foreign governments with a proper accounting of how their money was spent. Policy implementation has been inconsistent and attempts at standardization have failed. Although some improvements have been made, progress has been slow and many longstanding problems remain uncorrected.

The Digital Solutions Guidelines for Public Financial Management (Guidelines) are intended to serve as a comprehensive reference material for the assessment, design, and improvement of digital initiatives in the public financial management (PFM) area. To support the digital transformation of PFM functions, the Guidelines are structured around three Pillars - Functional, IT Architectural, and Governance and Management. Each pillar comprises six principles, which are further broken down into one to four attributes to promote more efficient and transparent PFM operations while fostering innovation and managing digital risks. These Guidelines also allow a graduated approach to digital transformation of PFM through three levels of maturity for each Attribute - foundational, intermediate, and advanced - to help take into account country-specific contexts and capacities in digital transformation strategies.
