The Civil War: Weapons
 Bloomsbury Publishing
 Winter of 1864, General Robert E. Lee finds himself and his Army of Northern Virginia huddled on the banks of the Rapidan, trying to fight a war despite meager rations and a terrible lack of equipment - indeed, some of his men do not even have shoes. But when Lee finds a way to arm his forces, the tide suddenly turns; the rebels win a decisive victory at the Battle of Wilderness. Lee presses his advantage, marching on Washington. But if Lincoln surrenders, and the

Discusses the weapons used in the Civil War, technological innovations that were made, and the problems and increased casualties that resulted.

"Don't take it so hard, my boy," he said. "This battle's lost, but there are others that won't be. Most of the men were raw, but they did some mighty good fightin', while the regulars an' the cavalry are coverin' the retreat. Beauregard's army is not goin' to sweep us off the face of the earth." His words brought cheer to Dick, but it lasted only a moment. He was to see many dark days, but this perhaps was the darkest of his life. His heart beat painfully and his face was a brown mask of mingled dust, sweat, and burned gunpowder. The thunder of the Southern cannon behind them filled him with humiliation. Every bone in him ached after such fierce exertion, and

his eyes were dim with the flare of cannon and rifles and the rolling clouds of dust. He was scarcely conscious that the thick and powerful sergeant had moved up by his side and had put a helping hand under his arm. "Here we are at the ford!" cried Whitley. "Into it, my lad! Ah, how good the water feels!" Dick, despite those warning guns behind him, would have remained a while in Bull Run, luxuriating in the stream, but the crowd of his comrades was pressing hard upon him, and he only had time to thrust his face into the water and to pour it over his neck, arms, and shoulders. But he was refreshed greatly. Some of the heat went out of his body, and his eyes and head ached less.

The Hoofs and Guns of the Storm Zenith Press

Describes weapons used during the American Civil War, including those used by the cavalry, the infantry, and the navy, and examines the effectiveness of each weapon on the battlefield. *Under the Guns* Simon and Schuster From iron-clads, submarine torpedoes, and

military balloons to pontoon bridges, grenades, and siege artillery, this excellent work describes what materiel was available to the armies and navies of both sides. Over 500 black-and-white illustrations.

The Guns of the South Bloomsbury Publishing During the American Civil War, the mounted soldiers fighting on both sides of the conflict carried a wide array of weapons, from sabers and lances to carbines, revolvers, and other firearms. Though some sections of the cavalry placed their trust in the sabre, the advent of viable breechloading carbines -- especially repeaters such as the Spencer -- was to transform warfare within little more than a decade of General Lee's final surrender at Appomattox. However, output struggled to keep up with unprecedented demands on manufacturing technology and distribution in areas where communication was difficult and in states whose primary aim was to equip their own men rather than contribute to the arming of Federal or Confederate regiments. In addition, the almost unparalleled losses of

men and equipment ensured that almost any firearm, effectual or not, was pressed into service. Consequently, the sheer variety of weaponry carried reflected the mounted soldiers' various roles in different theatres of operation, but also the availability -- or otherwise -- of weapons, notably on the Confederate side. Fully illustrated, this study assesses the effectiveness of the many different weapons arming the Civil War cavalryman and analyses the strengths and weaknesses of the decisions made after 1865 concerning the armament of the US cavalry.

The Guns of the South

Independently Published
The world is in a mess. For more than a billion people, everyday life is played out against the backdrop of civil wars, military coups and failing economies. For them, the peaceful democracy taken for granted in the West seems an impossible pipe-dream. But solutions do exist - it is up to us to achieve them. Award-winning academic Paul Collier's vision for the future of the developing world is eye-opening, provocative and refreshingly unequivocal. *Civil war guns, by william b. edwards* Crescent

In 2001, while vacationing on Panama's Pacific coast, maritime archaeologist James P. Delgado came upon the hulk of a mysterious iron vessel, revealed by the ebbing tides in a small cove at Isla San Telmo. Local inquiries proved inconclusive: the wreck was described as everything from a sunken Japanese "suicide" submarine from World War II to a poison-laden "craft of death" that was responsible for the ruin of the pearl beds, decades before. His professional interest fully aroused, Delgado would go on to

learn that the wreck was the remains of one of the first successful deep-diving submersibles, built in 1864 by Julius H.

Kroehl, an innovator and entrepreneur who initially sought to develop his invention for military use during the Civil War. The craft's completion coming too late for that conflict, Kroehl subsequently convinced investors that it could be used to harvest pearls from the Pacific beds off Panama, in waters too deep for native

pearl divers to reach. In *Misadventures of a Civil War Submarine*, Delgado chronicles the confluence of technological advancement, entrepreneurial aspiration, American capitalist ambition, and ignorance of the physiological effects of deep diving. As he details the layers of knowledge uncovered by his work both in archival sources and in the field excavation of Kroehl's ill-fated vessel, Delgado weaves the

tangled threads of history into a compelling narrative. This finely crafted saga will fascinate and inform professional archaeologists and researchers, naval historians, students and aficionados of maritime exploration, and interested general readers.
