his book first and foremost looks into experiences of Greenlanders in Denmark, and in addition offers a Canadian comparative perspective. It presents my representation of Greenlanders in Denmark/Inuit in southern Canada. It is heavily based on interviews with Inuit,

but presented in this publication through my eyes. This book uses discussions on Arctic urbanization, migration and perceptions to comprehend experiences of Greenlanders in Denmark and places these experiences into a broader context by referring to experiences in Canada as well.

During the Cold War Italy witnessed the existence of an anomalous version of a civil conflict, defined as a 'creeping' or a 'low-intensity' civil war. Political violence escalated, including bomb attacks against civilians, starting with a massacre in Milan, on

12 December 1969, and culminating with the massacre in Bologna, on 2 August 1980. Making use of the literature on national reconciliation and narrative psychology theory, this book examines the fight over the 'judicial' and the 'historical' truth in Italy today, through a contrasting analysis of judicial findings and the 'narratives of victimhood' prevalent among representatives of both the post- and the neo-fascist right.

" Le choix d'un lieu où se déroulera une vie est lourd de sens dans la tradition bénédictine "

" En décembre 1891, des moines trappistes

s'installent dans un petit hôtel arabe, qu'ils avaient acquis sur la route Jaffa-Jérusalem. Le lieu se situe tout près des ruines d'une ancienne église, que beaucoup identifèrent très tôt comme le site d'Emmaüs-Nicopolis. Assainissant les lieux, ils y plantèrent des vignes. Ainsi est né le monastère de Latroun. Fondation de Sept-Fons (Allier), l'abbaye est au coeur de la Palestine ottomane. Son destin est souvent déterminé par l'histoire mouvementée d'un Proche-Orient, en pleine mutation politique. Ecrite en deux tomes, ce premier volet nous entraîne à travers les derniers soubresauts de l'Empire ottoman, à la victoire britannique et la conquête de Jérusalem par le

général Allenby, à la Palestine mandataire et, enfin, vers la montée d'Israël dans les affrontements qui bouleversent le pays au sortir de la deuxième guerre mondiale. Des moines au coeur de la géopolitique du Proche-Orient livrent quelque chose d'inédit du mystère de la Terre sainte.

" Un pays qui manque son épuration se prépare à manquer sa rénovation. " Albert Camus, 1945, Combat  
 Dès les années 1940, avant même la libération de Paris et la fin de la Seconde Guerre mondiale, l'épineuse question de l'épuration s'impose : Comment sanctionner ceux qui ont collaboré

avec l'Allemagne nazie ? La France se déchire entre les défenseurs du pardon et les partisans d'une justice punitive pour les soutiens de Vichy. Brossant un tableau de la France de l'après-guerre couvrant tous les milieux - intellectuels, politiques, ecclésiastiques, etc. - Emmanuel Pierrat dépeint ici un pays au bord de la rupture et analyse les tourments d'une société qui cherche à sortir d'une situation d'exception, violente et chaotique. Des femmes tondues aux lois d'amnistie en passant par les exécutions sommaires et les internements administratifs, ce livre nous fait revivre des années décisives à travers les destins de Pétain, Laval, Brasillach ou encore du

constructeur automobile Louis Renault. S'appuyant sur de nombreuses sources judiciaires et journaux de l'époque, Emmanuel Pierrat nous plonge au coeur des désillusions, exécutions et reconstructions qui ont bouleversé la France pendant une décennie et qui entretiennent, encore aujourd'hui, de multiples tabous.

 What can Montesquieu still teach us today?  
 Montesquieu was the first political writer who first formulated the principles of separation of powers and the

independence of justice. He was the first to scientifically study human institutions, both ancient and modern, Asiatic and European, African and American. Again, he was the first thinker to theorize Federal Democracy, systematically tracking down the root causes of human events in its environmental, cultural, historical, and geographical aspects. Analysing several aspects of Montesquieu's philosophical and political thought, this volume highlights his stoicism, realism, anti-despotism as well as his staunch defence of human dignity. Introducing one of the sharpest thinkers of modernity, this book offers fundamental tools to understand the

very ground of our contemporary times.

Gerald K. Stone has collected books about Canadian Jewry since the early 1980s. This volume is a descriptive catalog of his Judaica collection, comprising nearly 6,000 paper or electronic documentary resources in English, French, Yiddish, and Hebrew. Logically organized, indexed, and selectively annotated, the catalog is broad in scope, covering Jewish Canadian history, biography, religion, literature, the Holocaust, antisemitism, Israel and the Middle East, and more. An introduction by Richard Menkis discusses the

significance of the Catalog and collecting for the study of the Jewish experience in Canada. An informative bibliographical resource, this book will be of interest to scholars and students of Canadian and North American Jewish studies.

Longo Mai'nin kuruluş kararı, neoliberalizmin hâkim olmaya başladığı bir dönemde 18-20 Aralık 1972 tarihlerinde, on farklı Avrupa ülkesinden gelen aktivistlerin, Bâle'da yaptıkları kongrede alınmıştır. Fransa'da kurulan, üyelerinin tarımla ve çeşitli zanaatsal etkinliklerle uğraştığı politik ve kollektif bir eko-tarım deneyimidir. Kitap bu topluluktaki

insanların kendi aralarındaki hiyerarşiyi en aza indirme çabalarını ve tarım için seferber edilen canlılarla olan ilişkilerini, özgürlük pratiği açısından ele almaktadır. Kitabın temel sonucu, insanların bu özyönetim deneyimlerinin, diğer canlıların yönetimine dayandığıdır. Komünü, tarım ve zanaatkârlık yaparak politik mücadeleye devam edebilecekleri ve hiyerarşik ilişkilerin olmadığı bir yapılanma şeklinde tasavvur etmişlerdir. Bu karardan sadece altı ay sonra, Güney Fransa'da, içinde ormanın ve yerleşim yerlerinin olduğu, iki yüz yetmiş hektarlık bir araziye satın alarak yerleşmişlerdir. Kiraz Özdoğan, Güney

Fransa'daki komünde, bizzat yaşayarak bu pratiği deneyimlemiştir. Kurucularıyla görüşmüş, yaşamını komünde sürdürenlerle birlikte yaşamış ve gelip gidenlerin görüşlerini alarak bu özgün eseri yazmıştır. Bu çalışmanın, Türkiye'deki deneyimlere büyük katkı sağlayacağını ve tartışmalara geniş bir açı kazandıracağını düşünüyoruz. Değişik isimler altında da olsa, başka yaşam deneyimlerini yayınlamaya ve bir arada yaşamak üzerine metinler üretmeye devam ediyoruz. Bu kez sadece keyifli okumalar değil; katılmaya, birlikte yaşamaya ve yeni niyetli topluluklar kurmaya doğru hareketlenmenizi

diliyoruz.

Limestone is a highly successful and widely used building material, found in many important historic buildings and new monuments around the world. Whilst its success reflects its durability under a wide range of environmental conditions, there are still important questions surrounding the selection, use and conservation of building limestones. In order to make best use of new limestone today,

and to conserve old limestone most effectively, we need to bring modern research methods to bear on understanding the characteristics of different limestones, what mortars to use, and how key limestones have responded to polluted atmospheres. This volume brings together recent interdisciplinary research on these issues, illustrating the diversity of innovative techniques that are now being applied to furthering our understanding of building limestones.

The legacy of World War II and the division of Eastern and Western

Europe produced a radical asymmetry, and a variety of misgivings and misunderstandings, in French and German experiences of the nuclear age. At the same time, however, political actors in both nations continually labored to reconcile their differences and engage in productive strategic dialogue. Grounded in cutting-edge research and freshly discovered archival sources, France, Germany, and Nuclear Deterrence teases out the paradoxical nuclear interactions between France and Germany from 1954 to the present day.

**Enablers** Cinebook Therapeutic, Probiotic and Unconventional Foods compiles the most recent, interesting and innovative research on unconventional and therapeutic foods, highlighting their role in improving health and life quality, their implications on safety, and their industrial and economic impact. The book focuses on probiotic foods, addressing the benefits and challenges associated with probiotic and prebiotic use. It then explores the most recently investigated and well-recognized nutraceutical and medicinal foods and the food products and ingredients that have both an impact on human health and a potential therapeutic

effect. The third and final section explores unconventional foods and discusses intriguing and debated foods and food sources. While research has been conducted on the beneficial biological effects of probiotics and therapeutic food, the use of these foods remains controversial. To overcome the suspicion of the use of alternative, homeopathic and traditional products as therapy, this book reveals and discusses the most recent and scientifically sound and confirmed aspects of the research. Compiles the most recent, interesting and innovative research on unconventional and therapeutic foods. Highlights the role of unconventional and

therapeutic foods in improving health and life quality. Discusses the implications of unconventional and therapeutic foods on safety. Presents the industrial and economic impact of unconventional and therapeutic foods. An authoritative treatise on the history of botanical studies and exploration in Angola. For any region, cataloging, interpreting, and understanding the history of botanical exploration and plant collecting, and the preserved specimens that were amassed as a result, are critically important for research and conservation. In this book, published in cooperation with the International Association for Plant Taxonomy, Estrela Figueiredo and Gideon F. Smith, both

botanists with expertise in the taxonomy of African plants, provide the first comprehensive, contextualized account of plant collecting in Angola, a large country in south-tropical Africa. An essential book for anyone concerned with the biodiversity and history of Africa, this authoritative work offers insights into the lives, times, and endeavors of 358 collectors. In addition, the authors present analyses of the records that accompanied the collectors' preserved specimens. Illustrated in color throughout, the book fills a large gap in the current knowledge of the botanical and exploration history of Africa.

*A Few Acres of Ice* is an in-depth study of France's complex relationship with the Antarctic, from the search for Terra Australis by French navigators in the sixteenth century to France's role today as one of seven states laying claim to part of the white continent. Janet Martin-Nielsen focuses on environment, sovereignty, and science to reveal not only the political, commercial, and religious challenges of exploration but also the interaction between environmental concerns in polar regions and the geopolitical realities of the twenty-first century. Martin-Nielsen

details how France has worked (and at times not worked) to perform sovereignty in Terre Adélie, from the territory's integration into France's colonial empire to France's integral role in making the environment matter in Antarctic politics. As a result, *A Few Acres of Ice* sheds light on how Terre Adélie has altered human perceptions and been constructed by human agency since (and even before) its discovery.

This volume focuses on the ethical significance of human rights, aiming at contributing to a universal culture of human rights with deep roots and wide horizons. Its purpose,

scope and rationale are reflected in the three-part structure of the manuscript. Part I has a broad introductory historical, theoretical and legal character. Part II submits that an Ethics of Human Rights is best understood as an Ethics of Recognition of human worth, dignity and rights. Moreover, it is argued that human worth consists in the perfectibility of the human species, rooted in its semiotic nature, to be accomplished through the perfecting of human beings, for which the right to education is key. In Part III, the main legal and political outcomes of the Human Rights Revolution are described and answers to the most lasting and common criticisms of human rights are

provided. To conclude, the human stature of the Big Five drafters of the Universal Declaration of Human Rights is profiled and the priority that should be recognized to human rights education is highlighted. Some appendices supplement the manuscript. While making a case for the high value and liberating power of the idea and ideal of human rights, objections, controversies and uncertainties are not at all overlooked and emerging issues are explored. The diversity of content of this volume meets many needs of the typical syllabus for a human rights course. Königshausen & Neumann

Jacobus C. Kapteyn (1851-1922) was a Dutch astronomer who contributed heavily to major catalogs of star positions, such as the Cape Photographic Durchmusterung and the Harvard-Groningen Durchmusterung, and arranged extensive international collaboration through his Plan of Selected Areas. He contributed to the establishment of statistical astronomy and structure and dynamics of the Sidereal System. All aspects of Kapteyn's life are discussed, from his birth in Barneveld, the Netherlands, to his death in Amsterdam, and his entire resume of scientific achievements in between. Kapteyn had some conflicts with others in his field, especially after the

world became divided on how to handle scientific contributions from Germany post-World War I. Both Kapteyn's struggles and achievements are written against the backdrop of both the historical context of the world at that time as well as the scientific one.

Special economic zones (SEZs) are important doorways for countries to attract foreign investment and promote trade. A strong correlation between the creation of SEZs and economic development indicators has also been identified in previous studies, at the municipal level, in China. Thus, the fundamental question that needs to be explored is to what extent SEZs can play the role of development enablers in different regions, development states, and institutional settings. The Handbook

of Research on Special Economic Zones as Regional Development Enablers discusses the diverse and international track records in the implementation of SEZs, the interplay of SEZ models and local institutional infrastructure and stakeholders, and the SEZ models that can best fit certain development states and/or settings. Covering topics such as the Belt and Road Initiative, local and national economies, and regional integration, this book is essential for government officials, development officers, scholars, students, researchers, entrepreneurs, public decision makers, aid agencies, company executives, investors,

and academicians.
