their writing abilities

while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

This book investigates the expanding involvement of China in security cooperation in Africa. Drawing on leading and emerging scholars in the field, the volume uses a combination of analytical insights and case studies to unpack the complexity of security challenges confronting China and the continent. It interrogates how security considerations impact upon the growing economic and social links China has developed with African states.

Kohlberg Kravis Roberts's approach to leveraged buyouts was an important aspect of the corporate

restructuring and governance reforms in the American economy from the mid-1970s through 1990. During that period, KKR crafted a series of progressively more elaborate deals tailored to specific companies and market conditions. Through its creative debt financing and its relationships with an evolving cast of investors, companies, and managers, KKR drove the scale and scope of the buyout phenomenon to unprecedented highs. This book, first published in 1999, examines KKR's record in detail. Based upon interviews with partners of the firm and on unprecedented access to KKR's records, George Baker and George Smith have

written a balanced and enlightening account of how KKR has approached LBOs. The book focuses on KKR's founding, evolution, and innovations as ways to understand issues in modern American business. In examining KKR as a unique form of enterprise, the book bridges the gap between public perception and academic knowledge of the leveraged buyout.

The geopolitical landscape of China-Africa relations has been overlooked during the G8's purported 'Year of Africa', which generated debate in the build-up to the China-Africa Summit in Beijing in 2006. This

book offers surveys of China's return to Africa, examining what this relationship holds for diplomacy, trade and development.

Quantitative Finance Interviews This book will prepare you for quantitative finance interviews by helping you zero in on the key concepts that are frequently tested in such interviews. In this book we analyze solutions to more than 200 real interview problems and provide valuable insights into how to ace quantitative interviews. The book covers a variety of topics that you are likely to encounter in quantitative interviews: brain teasers, calculus,

linear algebra, probability, stochastic processes and stochastic calculus, finance and programming. Thermal Analysis of Polymers Case Problems in Finance is a Harvard case course presenting real business situations that pose debatable alternative courses of action. The cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis. It will teach students to discover ways of thinking that are productive in handling different types of managerial problems intelligently. The cases are grouped by major topics: financial analysis and forecasting, cost of capital, working capital management, capital

budgeting, dividend policy, debt policy, financial execution, and mergers and restructuring.

The case focuses on two major challenges in deal making in emerging market economies: deal sourcing and negotiation by focusing on a real (but disguised) Indian private equity deal. In 2010 Surya Tutoring was a fast-growing tutoring academy for high school students aspiring to gain admission to the prestigious Indian Institute of Technology (IIT). Surya's CEO, R. K. Sharma, wanted to expand its reach beyond Kota (a city of 1 million people in the

northern state of Rajasthan), which had become the center of the IIT prep school industry and home to tens of thousands of students studying for the rigorous IIT entrance exam. Sharma knew there was vast untapped potential in the teeming Indian metropolises of Mumbai, Chennai, Delhi, and Bangalore, as well as in foreign markets such as Dubai and Australia. Sharma had received term sheets from two private equity firms willing to finance Suryas expansion. By the end of the month he needed to decide which to accept: the offer from big bulge bracket fund Blackgem, or the one from ZenCap, a small Indian firm based in

Mumbai with which he had become intimately familiar during the past year.

The authors believe that prospective counselors must learn from the experience of practicing counselors. This enjoyable-to-read, inexpensive casebook offers nineteen live marriage and family therapy case studies that exemplify the major approaches taken to marriage and family counseling. The nineteen contributors provide real-life data about their counseling sessions, their decision-making process, their personal feelings, and even their mistakes. A common organization for each case study features: the problem, the

diagnosis, goals, strategies, session-by-session accounts, results, and a “post-mortem.” It is telling that the contributing authors have provided the case that touched them most, not their most successful case. For future counselors, therapists, and social workers.

PRACTICAL

INVESTMENT

MANAGEMENT is

intended for learners studying investments for the first time. Very

practical and applied, it is comprehensive

enough for those who plan to become

Certified Financial

Analysts, but remains user-friendly due to its

clarity of explanation and its pedagogy. The

book contains all standard topics found

in the typical modern investments text, but

in addition, several chapters of Practical

unique. In addition to being an increasingly

important asset class, mortgage-backed

securities provide

some thought-

"Having been born a

freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt The Other Side of Charleston Getty Publications

Over the concluding decades of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows from the 1930s, gas stations and diners from the

1940s, and office buildings and architectural homes from the 1950s. Conservation efforts, however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap *Twentieth-Century Building Materials* was developed by the U.S. Department of the Interior's National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book's original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and

conservation of modern building materials. Thirty-seven essays written by leading experts offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques. Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern buildings, as

well as scholars in related disciplines.
