### **JORDAN HARTMAN**

*Listen to Pop!* Rowman & Littlefield

Following recent developments in hypofractionated stereotactic radiation therapy (SRT) for brain and spine tumors, this new edition offers a fully updated and comprehensive "how-to" guidance on hypofractionated SRT for brain and spine metastases, glioma, benign tumors, and other tumor types. Presenting the state of the art of the technology and practice, this book:

- Discusses the pros and cons of hypofractionated SRT compared to single-fraction radiosurgery, providing a deeper understanding of radiosurgery and radiobiology
- Explains the toxicity and adverse effects of hypofractionated SRT including the dosage of 24 Gy in two spine SBRT fractionation schemes, aiding practitioners in communicating the risks and benefits of treatment and in obtaining consent from their patients
- Outlines the current

standards for safe practice, including checklists for implementation

- Explores new technologies for brain and spine tumors including LITT, MR-guided focused ultrasound, and Zap technology, with chapters authored by well-recognized experts in the radiation, oncology, and neurosurgery communities; this book delivers a level of technological and clinical detail not available in journal papers

This book is suitable for radiation oncologists, neurosurgeons, and medical physicists who specialize in brain and/or spine radiosurgery or want to start a program and need a comprehensive reference with key checklists for practice.

#### Governance Ethics in Healthcare Organizations Routledge

This festschrift in honor of the work and legacy of Dr. Marc Groenhuijsen provides an international and holistic overview of recent developments in victimology, taking a global scope but grounded in everyday experiences of victims. Its multidisciplinary

perspective reflects a range of approaches and practices in victimology, including contributions from the fields of social work, criminology, sociology, psychology, and law. Firstly, the volume introduces new perspectives in victimology, and then analyzes different forms of victimization in countries worldwide. It gives special attention to victims' rights and participation in the criminal justice system, detailing victim-centered approaches to justice through practices such as restorative justice and restitution. Highlighting the growth and development of victimology from a specialization in criminology to an academic discipline in its own right, this book reflects the range of approaches and depth of scholarship in the field. This will be an essential resource to students of victimology, researchers, policy makers, and victim's advocates.

**Handbook of Scholarly Publications from the Air Force Institute of Technology (AFIT), Volume 1, 2000-2020**  
Routledge

This is the first book to provide the student of tourism, hospitality and events with all that they need to undertake statistical analysis using SPSS for research in their industry. Employing examples directly from the tourism, hospitality and events sector, it provides a comprehensive explanation on how appropriate statistical tools and methods can be identified for this research context and provides a step-by-step demonstration on how to carry out the chosen statistical operations. Each chapter opens with a sector-specific case study reflecting current research trends and issues from a range of different countries that are affecting the industry today. It is followed by an examination of the SPSS procedures relating to the case study and various solutions are offered. The implementation of clear, step-by-step demonstrations on how to carry out statistical operations using a combination of screenshots, diagrams, and tables aids the reader's understanding. Chapters close with thorough guidance on how to appropriately write up interpretations of the

research in a report. Research implications and recommendations for tourism and hospitality businesses are also provided, to enable them to successfully create and manage research strategies in action. Adopting an interdisciplinary perspective and written by a range of industry experts from all over the globe, this book will be essential for all students and researchers in the field of tourism, hospitality, and events as well as all those in related fields with an interest in statistical data analysis. [Miller's Anesthesia, 2-Volume Set E-Book](#) Springer Nature Listen to Pop! discusses the evolution of pop music in America from the 1950s to the present, diving into its impact on American culture, particularly through its association with television, and its enduring legacy. Listen to Pop!: Exploring a Musical Genre provides readers with an overview and a history of the pop music genre. The bulk of the book is devoted to analysis of 50 must-hear musical examples, which include artists, songs, and albums. Additionally, the book contains chapters that analyze the impact of

pop music on American popular culture and the legacy of pop music, including how the music is used today in film and television soundtracks and in television commercials. The book deals with all of the various subgenres of pop music from the 1950s to the present. The selection of material discussed reflects the artists, songs, and albums topping the pop music charts of the period, and while the volume examines these items individually, it also discusses how our definition of pop music has evolved over the decades. This combination of detailed examination of specific songs, albums, and artists and discussion of background, legacy, and impact distinguishes it from other books on the subject and make it a vital reference and interesting read for all readers and music aficionados.

**Story Machines: How Computers Have Become Creative**

**Writers** Elsevier Health Sciences Statistical Postprocessing of Ensemble Forecasts brings together chapters contributed by international subject-matter experts describing the current state of the

art in the statistical postprocessing of ensemble forecasts. The book illustrates the use of these methods in several important applications including weather, hydrological and climate forecasts, and renewable energy forecasting. After an introductory section on ensemble forecasts and prediction systems, the second section of the book is devoted to exposition of the methods available for statistical postprocessing of ensemble forecasts: univariate and multivariate ensemble postprocessing are first reviewed by Wilks (Chapters 3), then Schefzik and Möller (Chapter 4), and the more specialized perspective necessary for postprocessing forecasts for extremes is presented by Friederichs, Wahl, and Buschow (Chapter 5). The second section concludes with a discussion of forecast verification methods devised specifically for evaluation of ensemble forecasts (Chapter 6 by Thorarinsdottir and Schuhen). The third section of this book is devoted to applications of ensemble postprocessing. Practical aspects of ensemble postprocessing

are first detailed in Chapter 7 (Hamill), including an extended and illustrative case study. Chapters 8 (Hemri), 9 (Pinson and Messner), and 10 (Van Schaeybroeck and Vannitsem) discuss ensemble postprocessing specifically for hydrological applications, postprocessing in support of renewable energy applications, and postprocessing of long-range forecasts from months to decades. Finally, Chapter 11 (Messner) provides a guide to the ensemble-postprocessing software available in the R programming language, which should greatly help readers implement many of the ideas presented in this book. Edited by three experts with strong and complementary expertise in statistical postprocessing of ensemble forecasts, this book assesses the new and rapidly developing field of ensemble forecast postprocessing as an extension of the use of statistical corrections to traditional deterministic forecasts. Statistical Postprocessing of Ensemble Forecasts is an essential resource for researchers, operational practitioners, and

students in weather, seasonal, and climate forecasting, as well as users of such forecasts in fields involving renewable energy, conventional energy, hydrology, environmental engineering, and agriculture. Consolidates, for the first time, the methodologies and applications of ensemble forecasts in one succinct place Provides real-world examples of methods used to formulate forecasts Presents the tools needed to make the best use of multiple model forecasts in a timely and efficient manner [A Guide to Adventurous Tourism](#) SCM Hänsler Fractional-Order Models for Nuclear Reactor Analysis presents fractional modeling issues in the context of anomalous diffusion processes in an accessible and practical way. The book emphasizes the importance of non-Fickian diffusion in heterogeneous systems as the core of the nuclear reactor, as well as different variations of diffusion processes in nuclear reactors which are presented to establish the importance of nuclear and thermohydraulic phenomena and the physical side effects of

feedback. In addition, the book analyzes core issues in fractional modeling in nuclear reactors surrounding phenomenological description and important analytical sub-diffusive processes in the transport neutron. Users will find the most innovative modeling techniques of nuclear reactors using operator differentials of fractional order and applications in nuclear design and reactor dynamics. Proposed methods are tested with Boltzmann equations and non-linear order models alongside real data from nuclear power plants, making this a valuable resource for nuclear professionals, researchers and graduate students, as well as those working in nuclear research centers with expertise in mathematical modeling, physics and control. Presents and analyzes a new paradigm of nuclear reactor phenomena with fractional modeling. Considers principles of fractional calculation, methods of solving differential equations of fractional order, and their applications. Includes methodologies of linear and nonlinear analysis, along with design and dynamic analyses

### **Standard & Poor's Earnings and Ratings**

**Bond Guide** Cengage AU  
This book is a collection of papers in the research area of big data, cloud computing, cybersecurity, machine learning, deep learning, e-learning, Internet of Things, reinforcement learning, information system, social media and natural language processing. This book includes papers presented at the 5th International Conference on Big Data Cloud and Internet of Things, BDIoT 2021 during March 17-18, 2021, at ENSIAS, Mohammed V University in Rabat, Morocco.

### **Proceedings of the 5th International Conference on Big Data and Internet of Things**

Bloomsbury Publishing USA  
This volume provides up-to-date methods on single cell wet and bioinformatics protocols based on the researcher experiment requirements. Chapters detail basic analytical procedures, single-cell data QC, dimensionality reduction, clustering, cluster-specific features selection, RNA velocity, multi-modal data integration, and single cell RNA editing. Written in the highly successful Methods in Molecular

Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and comprehensive, Single Cell Transcriptomics: Methods and Protocols aims to be a valuable resource for all researchers interested in learning more about this important and developing field.

### Event Sponsorship and Fundraising Routledge

This book highlights the concepts of lean manufacturing that help to achieve the objectives of sustainability in a global competitive atmosphere. Lean can help to lower the manufacturing cost in the rising labour and material cost market. Lean is based on various fundamental concepts such as Kaizen, Kanban, Zidoka, 5S and Six Sigma, which aim at reducing process waste for efficiency and productivity that are discussed in this book. In addition, the technological changes such as introduction of Internet technologies and Industry 4.0 are taken

care by the lean concepts, which are also addressed in this book.

Statistical Postprocessing of Ensemble Forecasts

CRC Press

This book serves as a guide for local governments and private enterprises as they navigate the uncharted waters of investing in climate change adaptation and resilience. This book serves not only as a resource guide for identifying potential funding sources but also as a roadmap for asset management and public finance processes. It highlights practical synergies between funding mechanisms, as well as the conflicts that may arise between varying interests and strategies. While the main focus of this work is on the State of California, this book offers broader insights for how states, local governments and private enterprises can take those critical first steps in investing in society's collective adaptation to climate change.

CRC Press

This handbook represents a collection of previously published technical journal articles of the highest caliber originating from the Air Force

Institute of Technology (AFIT). The collection will help promote and affirm the leading-edge technical publications that have emanated from AFIT, for the first time presented as a cohesive collection. In its over 100 years of existence, AFIT has produced the best technical minds for national defense and has contributed to the advancement of science and technology through technology transfer throughout the nation. This handbook fills the need to share the outputs of AFIT that can guide further advancement of technical areas that include cutting-edge technologies such as blockchain, machine learning, additive manufacturing, 5G technology, navigational tools, advanced materials, energy efficiency, predictive maintenance, the internet of things, data analytics, systems of systems, modeling & simulation, aerospace product development, virtual reality, resource optimization, and operations management. There is a limitless vector to how AFIT's technical contributions can impact the society. Handbook of Scholarly Publications from the Air Force

Institute of Technology (AFIT), Volume 1, 2000-2020, is a great reference for students, teachers, researchers, consultants, and practitioners in broad spheres of engineering, business, industry, academia, the military, and government. Unauthorized Bloomsbury Publishing USA Through sections containing overview essays and reference entries related to particular religions, this resource explores the rise of religious violence, hate crime, and persecution around the world. Religious violence and persecution have been growing steadily both within the United States and around the world. Drawing on the expertise of a wide range of scholars, this current and comprehensive reference helps readers understand the persecution of members of particular faiths as well as violence committed by members of those faiths. In doing so, it promotes a greater understanding of the role of religion in global politics, domestic and international terrorism, and religious bigotry. The book contains sections on particular religious traditions from around the

world. Each section begins with an overview essay surveying violence related to that particular religion, whether committed by or against members of that faith. Reference entries in each section then provide objective, fundamental information about particular topics related to violence and the religion discussed. The entries provide cross-references and suggestions for further reading, and the work closes with a bibliography of resources for further study.

*Advanced Practice Nursing: Essential Knowledge for the Profession* Oxford University Press, USA

This fascinating book explores machines as authors of fiction, past, present, and future. For centuries, writers have dreamed of mechanical storytellers. We can now build these devices. What will be the impact on society of AI programs that generate original stories to entertain and persuade? What can we learn about human creativity from probing how they work? In *Story Machines*, two pioneers of creative artificial intelligence explore the design and impact of AI story generators. The

book covers three themes: language generators that compose coherent text, storyworlds with believable characters, and AI models of human storytellers. Providing examples of story machines through the ages, it covers the history, recent developments, and future implications of automated story generation. Anyone with an interest in story writing will gain a new perspective on what it means to be a creative writer, what parts of creativity can be mechanized, and what is essentially human. *Story Machines* is for those who have ever wondered what makes a good story, why stories are important to us, and what the future holds for storytelling. *Cognitive, Affective, Behavioral and Multidimensional Domain Research in STEM Education: Active Approaches and Methods towards Sustainable Development Goals (SDGs)* Springer Publishing Company This book explores and advances the latest concepts and developments in event management theory and practice. Drawing on the ever-growing event management literature –

and supported by theories and concepts from parent disciplines – the book examines challenges and opportunities related to maximising business and social benefits for those working in different event management positions in a variety of contexts.

Written by an international team of five management scholars, the book investigates event management and leverage from various angles, including international business, event business studies, sport management, community development, and business strategy. It does so by offering a combination of theoretical approaches as well as contemporary cases from around the world. This book will be of interest to undergraduate and postgraduate students of event management, as well as scholars researching in social and business-related areas of event management and leverage.

In Beruf und Alltag sehen wir uns umwälzenden Herausforderungen durch die Digitalisierung gegenüber. Ein Großteil unserer Lebenswelt ist davon betroffen. Sind wir der Wucht gewachsen, mit der sich Berufsbilder und Beschäftigungsmöglichkeiten stürmisch verändern? Wecken die innovativen Entwicklungen außer Stauen auch Zukunftssorgen? Wie gehen die Internetgiganten oder

staatliche Institutionen mit der Informationslawine um, die über unser Verhalten und Denken, über unsere Gewohnheiten und Empfindungen gespeichert wird? Die Digitalisierung hat nie gekannte Erfolgszahlen und Börsenwerte der Digitalkonzerne hervorgebracht. Hat sie auch ein Wertevakuum entstehen lassen? Das Doppelgesicht der Digitalisierung mit ihren Chancen und Risiken rechtfertigt bedeutsame Erwartungen und gleichzeitig gewichtige Bedenken. Zu diesen Fragen kommen Persönlichkeiten aus Wissenschaft und Wirtschaft zu Wort. Zeitlose biblische Überzeugungen regen zu zeitgemäßen Antworten auf die Herausforderung der digitalen Revolution an.

Climate Adaptation Finance and Investment in California Jones & Bartlett Learning

This volume contains the technical papers presented in the workshops, which took place at the 7th European Conference on Service-Oriented and Cloud Computing, ES OCC 2018, held in Como, Italy, in September 2018: Joint

Cloudways and OptiMoCS Workshop; 14th International Workshop on Engineering Service-Oriented Applications and Cloud Services. Additionally the papers from ES OCC 2018 PhD Symposium and ES OCC 2018 EU Projects Track were included in the volume. The 22 full papers were carefully reviewed and selected from 34 submissions. The papers focus on specific topics in service-oriented and cloud computing domains such as limits and/or advantages of existing cloud solutions, future internet technologies, efficient and adaptive deployment and management of service-based applications across multiple clouds, novel cloud service migration practices and solutions, digitization of enterprises in the cloud computing era, federated cloud networking services.

Festival and Event Tourism Frontiers Media SA

Connecting Museums explores the boundaries of museums and how external relationships are affected by internal commitments, structures and traditions. Focusing on museums' relationship with health, inclusion, and community, the book

provides a detailed assessment of the alliances between museums and other stakeholders in recent years. With contributions from practitioners and established and early-career academics, this volume explore the ideas and practices through which museums are seeking to move beyond what might be called one-off contributions to society, to reach places where the museum is dynamic and facilitates self-generation and renewal, where it can become not just a provider of a cultural service, but an active participant in the rehabilitation of social trust and democratic participation. The contributors to this volume provide conceptual critiques and clarification of a number of key ideas which form the basis of the ethics of museum legitimacy, as well as a number of reports from the front line about the experience of trying to renew museums as more valuable and more relevant institutions. Providing internal and external perspectives, *Connecting Museums* presents a mix of applied and theoretical understandings of the

changing roles of museums today. As such, the book should be of interest to academics, researchers and students working in the broad fields of museum and heritage studies, material culture, and arts and museum management. *An SPSS Guide for Tourism, Hospitality and Events Researchers* AJPO Journals USA LLC Festivals and events vary from small, neighbourhood celebrations through to mega gatherings, and both can be attractive to tourists. They come with their own unique challenges and opportunities however, which means destinations must carefully consider their responsibility to local people, and host them in a sustainable manner. Covering important issues such as the marketing, branding and promotion of events, this book also unravels the opportunities and challenges associated with sustainable festivals and events. It uses an array of case studies and a global author team to provide an important resource for tourism and event researchers and professionals.

**League of Legends. Die Reiche von Runeterra**  
Woodhead Publishing

*Tourism Fictions, Simulacra and Virtualities* offers a new understanding of tourism's interaction with space, questioning the ways in which fictions, simulacra and virtualities express tourism in the built environment and vice versa. Since its beginnings, tourism has inspired themed built environments that have a constitutive, and sometimes problematic, relationship with the "real" world and its architectural references. This volume questions and rethinks the different environments constructed or adapted both for and by tourism exploring the relationship between the "real" and the "unreal" within the tourist bubble and the ways in which the real world inspires simulacra for tourism use. Adopting an interdisciplinary approach this book touches on a wide range of geographical areas, eras and subjects such as post-socialist tourism in Poland, the Hawaiian imaginary in Las Vegas, Rio de Janeiro's Little Africa, as well as multiple instances of virtual reality in tourism. This timely and innovative volume will be of great interest to upper level students,

researchers and  
academics in tourism,

architecture, cultural

studies, geography and  
heritage studies.
