Learning  
Strategic  
Operations  
Management,  
4th Edition,

shows how  
vital it is to  
have world-  
class  
operations  
management  
in any  
organisation.  
In the past,  
where  
organisations  
tended to be  
more

hierarchical  
than today,  
the words,  
"strategy" and  
"operations"  
were almost  
mutually  
exclusive. In  
today's highly  
competitive  
environment,  
though,  
strategic

operations capabilities must be in place for organisations to provide goods and services that meet and exceed customer requirements. Key issues such as cost, speed, quality, flexibility and constant innovation are all part of strategic operations. However, achieving such capabilities does not come by chance - instead a range of factors need to be put in place. This

new edition pays equal attention to manufacturing and service sectors. It includes numerous references to, and discusses, major changes taking place in the business world, including 3-D printing; virtual organisations; Cloud - Big Data and the Internet of Things; Servitization, global markets, ongoing innovation and managing within complex supply networks.

Cases are included from a range of settings across the globe. Students taking MBA, MSc and MBM classes on operations management, advanced operations management, and strategic operations management will find this textbook fulfills all their requirements whilst advanced undergraduate classes in these areas will also find the book an essential read. *Operation Management*

brilliant resource. Operations management is important, exciting, challenging ... and everywhere you look! • Important, because it enables organisations to provide services and products that we all need • Exciting, because it is central to constant changes in customer preference, networks of supply and demand, and developments in technology • Challenging, because

solutions must be financially sound, resource-efficient, as well as environmental ly and socially responsible • And everywhere, because in our daily lives, whether at work or at home, we all experience and manage processes and operations. 'Operations Management' focuses on the sustainable and socially responsible imperatives of operations management, using over 120 cases and

illustrations of real-life operations around the world, including Apple, Médecins Sans Frontières, Amazon, Ecover, Dyson, Disneyland Paris, Google, The North Face, and many more. Need extra support? This book is a

novel treatment of Operations Management. It takes a fresh insight to this increasingly important topic, exploring fundamental principles equally applicable to service and manufacturing situations. The book adapts a strategic stance by providing a framework for effective decision making and is aimed at practising managers who need to design working

processes, manage change and make decisions within a strategic framework. The framework and supporting case vignettes allow the practitioner to grasp essential concepts quickly in a range of different operational contexts. "Bamford and Forrester have done an excellent job in creating a concise, salient, and appealing approach -

they have captured the essential elements of designing processes, products and work organizations; exploring approaches to operations planning and control; managing change through effective project management and technology transfer; and then managing quality and improvement strategies". —Professor Rob Handfield, Professor of Supply Chain

Management, North Carolina State University, USA "This is an excellent concise text that introduces students to all of the key areas - it's an invaluable aid for students in understanding all of the major aspects of operations and their importance to the success of businesses". —Professor Steve Brown, Professor of Management, University of Exeter Business School, University of Exeter, UK

"For today's or tomorrow's business leaders this text has well structured invaluable content ready for immediate adoption. Follow the guide, put it into practice, and the rewards will follow". —Mr Vernon Barker, Managing Director, First TransPennine Express, First Group Plc, UK "This book combines technical theory 'book smarts' with real life experience 'street smarts' in a flowing

read". —Mr Stephen Oliver, Vice President Marketing & Sales, Vicor Corporation, Boston, USA
