The Nordic Tractor traces  
the history of tractor  
production in Sweden and  
Finland. The story goes  
back over 200 years to  
the 19th century when

the industrial revolution  
was sweeping across  
Britain, and Sweden  
wanted to establish their  
own manufacturing  
powerhouses. This was an  
exciting and fast moving  
time for engineering and  
this book traces the ups,  
downs and eventual  
demise of some of the  
first manufacturers  
working to serve the  
particular needs of the  
agricultural and forestry  
industries in this densely  
forested and mountainous  
region. It then looks in  
depth at the companies  
who emerged from this,  
who learnt from their own  
and others' mistakes and  
built on the widespread  
technological advances of  
the time to build up  
names for themselves in  
Northern parts of Europe.  
Today, Valtra - now  
owned by AGCO - stands  
proudly as the last  
remaining agricultural  
tractor maker in  
Scandinavia, but The  
Nordic Tractor shows  
where their roots lie in the  
establishment and history  
of companies such as  
Bolinder, Munktells, Volvo  
and Valmet, who all stood  
out as being major  
players in the Nordic  
region. Including over 100  
photos, many of which

have been previously  
unpublished, this book will  
appeal to those with a  
specific interest in Nordic  
tractors, Nordic  
engineering and general  
Nordic history as well as  
the general tractor  
enthusiast.
