Traditions & Encounters
offers an inclusive vision
of the global past—one
that is meaningful and
appropriate for the
interdependent world of
contemporary times.
Given the diversity of
human societies,
gathering and organizing

the sheer mass of
information in a
meaningful way is a
daunting challenge for
any world history survey
course. The seven-part
chronological organization
enables students to
understand the
development of the world
through time, while also
exploring broader, big-
picture thematic issues in
world history. Through
new and revised chapter-
level and part-level

features, the hallmark
twin themes of traditions
and encounters emerge in
greater clarity than ever
before in this sixth
edition. As a result,
students have resources
that enable them to move
beyond the facts of
history and examine the
past critically, analyze
causes and effects, and
recognize similarities and
differences across world
regions and time periods.
By digging deeper into the

implications of world history's stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. *A Text and Reader*
