In the policy arena, as well as in the  
academic world, a new challenge is  
having to deal with the global  
community. We are increasingly aware  
that the world is linked through  
economy-energy-environment  
interactions. We are increasingly aware,  
at the same time, that the emergence of  
the global community does not imply an  
integrated harmonious world; rather, it is

a community where countries/regions of different interests and values face each other directly. Global governance has to be achieved through actions of national governments under different motives and constraints. We need to have an analytical tool that is capable of producing a global picture, yet with detailed country resolution. If the world is a better place now compared to 100 years ago in terms of per capita income, this is due to the industrialization that continued throughout the 20th century. We entered the 21st century knowing that the human aspiration that translates into ever-increasing production may not be tenable in the long run. Sustainability of the global community is at stake. In contrast to incremental decision making through the market mechanism that

should lead to some optimal state under some assumptions such as perfect knowledge, smooth movement of resources, no externalities, and so forth, we need to have an analytical tool to provide us with details of the future state of the world.

These proceedings include selected papers from the International Review Workshop on Satellite Altimetry Calibration Activities and Applications, held in Chania, Crete, Greece, on 23-26 April 2018. Organised in the context of the European Space Agency Project "Fiducial Reference Measurements for Altimetry" the workshop was cosponsored by the International Association of Geodesy (in particular by the IAG Commission 2,

Gravity Field), the European Space Agency, the European Union (the Copernicus Programme), the European Organisation for the Exploitation of Meteorological Satellites (EUMETSAT), Space Geomatica P.C., and the Municipality of Chania. The workshop presented the latest research in the field of satellite altimetry calibration and altimetry applications for monitoring ocean changes and improving Earth observation in an objective, continuous, homogeneous and reliable manner, free of errors and biases. Further, it supported long-term monitoring of climate change by providing a better understanding of environmental changes in the world's oceans, terrestrial surface waters, and Arctic and Antarctic Regions. The outcome was the creation of a

scientific roadmap with procedures, protocols, guidelines, and best practices to help international groups working on satellite altimetry to establish SI (Système International d'Unités) traceability of their measurements, results and data products.

Zahlreiche Fallstudien, Best Practices, Heuristiken und Code Smells  
Clean Code - Refactoring, Patterns, Testen und Techniken für sauberen Code  
Aus dem Inhalt: Lernen Sie, guten Code

von schlechtem zu unterscheiden Sauberen Code schreiben und schlechten Code in guten umwandeln Aussagekräftige Namen sowie gute Funktionen, Objekte und Klassen erstellen Code so formatieren, strukturieren und kommentieren, dass er bestmöglich lesbar ist Ein vollständiges Fehler-Handling implementieren, ohne die Logik des Codes zu verschleiern Unit-Tests schreiben und Ihren Code testgesteuert entwickeln Selbst schlechter Code kann funktionieren. Aber wenn der Code nicht sauber ist, kann er ein Entwicklungsunternehmen in die Knie zwingen. Jedes Jahr gehen unzählige Stunden und beträchtliche Ressourcen verloren, weil Code schlecht geschrieben ist. Aber das muss nicht sein. Mit Clean Code präsentiert Ihnen

der bekannte Software-Experte Robert C. Martin ein revolutionäres Paradigma, mit dem er Ihnen aufzeigt, wie Sie guten Code schreiben und schlechten Code überarbeiten. Zusammen mit seinen Kollegen von Object Mentor destilliert er die besten Praktiken der agilen Entwicklung von sauberem Code zu einem einzigartigen Buch. So können Sie sich die Erfahrungswerte der Meister der Software-Entwicklung aneignen, die aus Ihnen einen besseren Programmierer machen werden – anhand konkreter Fallstudien, die im Buch detailliert durchgearbeitet werden. Sie werden in diesem Buch sehr viel Code lesen. Und Sie werden aufgefordert, darüber nachzudenken, was an diesem Code richtig und falsch ist. Noch wichtiger: Sie werden herausgefordert, Ihre

professionellen Werte und Ihre Einstellung zu Ihrem Beruf zu überprüfen. Clean Code besteht aus drei Teilen: Der erste Teil beschreibt die Prinzipien, Patterns und Techniken, die zum Schreiben von sauberem Code benötigt werden. Der zweite Teil besteht aus mehreren, zunehmend komplexeren Fallstudien. An jeder Fallstudie wird aufgezeigt, wie Code gesäubert wird – wie eine mit Problemen behaftete Code-Basis in eine solide und effiziente Form umgewandelt wird. Der dritte Teil enthält den Ertrag und den Lohn der praktischen Arbeit: ein umfangreiches Kapitel mit Best Practices, Heuristiken und Code Smells, die bei der Erstellung der Fallstudien zusammengetragen wurden. Das Ergebnis ist eine Wissensbasis, die beschreibt, wie wir denken, wenn wir

Code schreiben, lesen und säubern. Dieses Buch ist ein Muss für alle Entwickler, Software-Ingenieure, Projektmanager, Team-Leiter oder Systemanalytiker, die daran interessiert sind, besseren Code zu produzieren. Über den Autor: Robert C. »Uncle Bob« Martin entwickelt seit 1970 professionell Software. Seit 1990 arbeitet er international als Software-Berater. Er ist Gründer und Vorsitzender von Object Mentor, Inc., einem Team erfahrener Berater, die Kunden auf der ganzen Welt bei der Programmierung in und mit C++, Java, C#, Ruby, OO, Design Patterns, UML sowie Agilen Methoden und eXtreme Programming helfen. The report covers a period of great significance for railroading in the U.S as it contains a number of milestones now

shaping the future performance of the industry. The specific subject is improving intermodal service so that it can support state and regional highway planning, now facing severe financial cut-backs as revenue sources become fully committed to bond servicing, user taxes, loose purchasing power and fuel consumption begins to fall. Intermodal traffic grew strongly in the period 1995 - 2007 and UP and BNSF trans-continental routes were improved largely on the back of intermodal demand. Alliances with larger trucking companies strengthened and transportation officials began to ask whether rail could take some of the predicted freight off key highway corridors. This report addresses elements of this question, more especially as it relates to intermodal

traffic in Texas and the Southwest. The report comprises the following sections. Chapter 2 considers the changes in rail freight since the Staggers Act, Chapter 3 evaluates Class 1 intermodal service, and Chapter 4 identifies the major trade corridors serving Texas and the Southern region of the U.S. Chapter 5 describes rail bottlenecks on the state rail system that might impact future intermodal growth, and Chapter 6 concludes by examining the strengths, weaknesses, opportunities and threats to rail intermodal service in Texas and the Southern region over the next decade.

Die Autoren stellen das Projekt „30 Gedanken zum Tod“ vor, das die Todesvorstellungen von erwachsenen Menschen untersucht, die beruflich oder im Leben mit dem Tod und dem guten wie dem misslungenen Sterben zu tun haben. Es handelt sich um die Vorstellungen von Personen, die als Experten den Tod in unserer Gesellschaft definieren (Juristen, Politiker, Philosophen u.a.), die den Tod anderer Menschen hautnah miterleben (Ärzte, Feuerwehr, Polizei u.a.) und die mit dem eigenen Tod konfrontiert sind (Patienten, alte Menschen u.a.). Die Ergebnisse der Untersuchung sind mit der Methode der Framework Analysis ermittelt worden.

The Cooperation Council for the Arab States of the Gulf (GCC) has been at the epicenter of global energy markets because of its substantial endowment of hydrocarbons. Yet countries in the region have also stated their intent to be global leaders in renewable energy. This collection explores the drivers for the widespread adoption of renewable energy around the GCC, the need for

renewable energy and the policy-economic factors that can create success. All six countries within the GCC have plans to include renewable energy power generation in their energy mix for various reasons including: a growing demand for electricity because of increasing populations, an increasing government fiscal deficit due to inefficient subsidies, the need to diversify the economy and global pressure to meet climate change requirements. However, the decision of when and by how much to introduce renewable energy is fraught with complications. In this book, a stellar cast of regional policy and academic experts explore the reasons behind these renewable energy plans and the potential impediments to success,

whether it be the declining cost of producing energy from hydrocarbons, an infrastructure which needs to be updated, social acceptance, lack of financing and even harsh weather. Weighing up all these factors, the book considers the route forward for renewable energy in the Gulf region. The Economics of Renewable Energy in the Gulf offers an excellent examination of the adoption of renewable energy in the area. It will be of great interest to academic researchers and policy makers alike, particularly those working in the areas of energy economics, public policy and international relations.

Seven years after the onset of the global financial crisis, the world still has a way to go to secure a sustainable recovery marked by strong growth that supports rapid job creation and benefits all, International Monetary Fund (IMF) Managing Director Christine Lagarde says in her foreword to the institution's

Annual Report 2014—From Stabilization to Sustainable Growth, published today. “The recovery is ongoing, but it is still too slow and fragile, subject to the vagaries of financial sentiment. Millions of people are still looking for work. The level of uncertainty might be diminishing, but it is certainly not disappearing.” Ms. Lagarde said that “throughout the crisis and in the recovery period, the IMF has been, and continues to be, an indispensable agent of economic cooperation” for its membership. The report covers the work of the IMF’s Executive Board and contains financial statements for the year May 1, 2013, to April 30, 2014. It describes the IMF’s support for its 188 member countries, with an emphasis on the core areas of IMF responsibility:

assessing their economic and financial policies, providing financing where needed, and building capacity in key areas of economic policy.
