In fact, it is my contention that thinking about LIVING THE LIFESTYLE YOU DESERVE and the state of FINANCIAL FREEDOM should start with 20-Somethings, not with Boomers heading toward retirement! Miss one of those functions, and the rest of us will be paying for you for the rest of your life. "DIRECTIONS TO EASY STREET" tells it like it is, presenting many strategies about how you can TAKE IMMEDIATE ACTION and achieve FINANCIAL FREEDOM and leave your J.O.B. forever. Millions of people just like you are creating wealth through PASSIVE INCOME. Now its YOUR turn. The development of generic skills (often referred to as 'soft skills') in accounting education has been a focus of discussion and debate for several decades. During this time employers and professional bodies have urged accounting educators to consider and develop curricula which provide for the development and assessment of these skills. In addition, there has been criticism of the quality of accounting graduates and their ability to operate effectively in a global economy. Embedding generic skills in the accounting curriculum has been acknowledged as an appropriate means of addressing the need to provide 'knowledge professionals' to meet the needs of a global business environment. Personal Transferable Skills in Accounting Education illustrates how generic skills are being embedded and evaluated in the accounting curriculum by academics from a range of perspectives. Each chapter provides an account of how the challenge of incorporating generic skills in the accounting curriculum within particular educational environments has been addressed. The challenges involved in generic skills development in higher education have not been limited to the accounting discipline. This book provides examples which potentially inform a wide range of discipline areas. Academics will benefit from reading the experiences of incorporating generic skills in the accounting curriculum from across the globe. This book was originally published as a themed issue of Accounting Education:

an international journal.

Over many decades the global development of professional accounting education programmes has been undertaken by higher education institutions, professional accounting bodies, and employers. These institutions have sometimes co-operated and sometimes been in conflict over the education and/or training of future accounting professionals. These ongoing problems of linkage and closure between academic accounting education and professional training have new currency because of pressures from students and employers to move accounting preparation onto a more efficient, economic and practical basis. The Interface of Accounting Education and Professional Training explores current elements of the interface between the academic education and professional training of accountants in Australia, New Zealand, South Africa and the UK. It argues for a reassessment of the considerations and requirements for developing professional accounting programs which can make a student: capable of being an accountant (the academy); ready to be an accountant (the workplace); and professional in being an accountant (the professional bodies). This book was originally published as a special issue of Accounting Education: An International Journal.
