Private Communications in a Public World Simon and Schuster
In this important attempt to reorient the theory and practice of public management, Stewart Ranson and John Stewart argue that public organisations must be analysed in terms of the distinctive values, purposes, tasks and conditions of the public domain. They show how it is only on this basis that they can meet the needs of citizens in a mature democracy and support the processes of a learning society.

There is a real security gap in the world today. Millions of people in regions like the Middle East or East and Central Africa or Central Asia where new wars are taking place live in daily fear of violence. Moreover new wars are increasingly intertwined with other global risks the spread of disease, vulnerability to natural disasters, poverty and homelessness. Yet our security conceptions, drawn from the dominant experience of World War II and based on the use of conventional military force, do not reduce that insecurity; rather they make it worse. This book is an exploration of this security gap. It makes the case for a new approach to security based on a global conversation- a public debate among civil society groups and individuals as well as states and international institutions. The chapters follow on from Kaldors path breaking analysis of the character of new wars in places like the Balkans or Africa during the 1990s. The first four chapters provide a context; they cover the experience of humanitarian intervention, the nature of American power, the new nationalist and religious movements that are associated with globalization, and how these various aspects of current security dilemmas have played out in the Balkans. The last three chapters are more normative, dealing with the evolution of the idea of global civil society, the relevance of just war theory in a global era, and the concept of human security and what it might mean to implement such a concept. This book will appeal to all those interested in issues of peace and conflict, in particular to students of politics and international relations.

Elements of Urban Management Syracuse University Press

Written by leading researchers from the USA, Canada and Europe,

this is an essential reference tool for researchers and advanced students in animal nutrition. Farm livestock have evolved digestive systems that are capable of digesting fibrous materials and by-products unsuited for man. Throughout the world, production from farm livestock is concerned with providing food and clothing of animal origin for man. Animal production science underpins this goal and provides the scientific basis for livestock management practices. Feed evaluation concerns the use of methods to describe animal feedstuffs with respect to their ability to sustain different types and levels of animal performance. The main themes of the book are methods of feed evaluation, current feeding systems, and mechanistic mathematical modeling. No other title brings together methods, systems and models under one cover.

Archeology shares with other anthropological sciences the goal of explaining differences and similarities among cultural systems. Sally R. Binford and Lewis R. Binford, therefore are concerned with theory and arguments which treat problems of the interrelationship of cultural variables with explanatory value. Archeology in Cultural Systems is devoted to four different aspects of archeology. This book progresses from theoretical-methodological discussions to specific consideration of archeological materials. It focuses on the analysis of archeological remains from a single site. Its concern is primarily with recognizing, measuring and explaining variability in the form and distribution of a site's cultural remains. The authors argue that internal variability derives from the composition and distribution of societal segments represented at the site. The work then shifts to study of archeological components (or their attributes) and seeks explanations for observed differences and similarities. A final section of the volume comments and discusses materials in the volume. Archeology in Cultural Systems is not a monolithic presentation of any particular school of archeological thought. There are common interests and many points of agreement among the authors, but there is also diversity of opinion on several points. These points are the focus of research here.

Advances in Steel Structures C A B International

The economic, political, and cultural forces of globalization affect every citizen of the world--and the institutions that govern them. Against a backdrop of increasing resistance to these forces,

especially in the developing world, this volume establishes a new theoretical and practical framework for analyzing the effects of globalization on nation-states, local governments, nongovernmental and international organizations, and other administrative systems. Invoking a term attributed to Darius the Great over 2,500 years ago--sound governance--editors Ali Farazmand and Rosalyn Carter set the stage for a rich and multidimensional collection of essays on emerging issues in public administration around the world. Topics include: The impact and influence of the United Nations; Ethics and accountability in government; Applying the total quality management model to public sector institutions; Judicial and legislative reforms; Business-government partnerships and improvements in the delivery of public services. The result is a comprehensive study of innovations in public administration that will serve as an essential resource for students, researchers, policymakers, and practitioners alike.

Don't Make Me Think! Macmillan International Higher Education
As members of the public becomes more conscious of the food they consume and its content, higher standards are expected in the preparation of such food. The updated seventh edition of Nutrient Requirements of Beef Cattle explores the impact of cattle's biological, production, and environmental diversities, as well as variations on nutrient utilization and requirements. More enhanced than previous editions, this edition expands on the descriptions of cattle and their nutritional requirements taking management and environmental conditions into consideration. The book clearly communicates the current state of beef cattle nutrient requirements and animal variation by visually presenting related data via computer-generated models. Nutrient Requirements of Beef Cattle expounds on the effects of beef cattle body condition on the state of compensatory growth, takes an in-depth look at the variations in cattle type, and documents the important effects of the environment and stress on food intake. This volume also uses new data on the development of a fetus during pregnancy to prescribe nutrient requirements of gestating cattle more precisely. By focusing on factors such as product quality and environmental awareness, Nutrient Requirements of Beef Cattle presents standards and advisements for acceptable nutrients in a complete and conventional manner that promotes a more practical understanding and application.

 www.guepedia.com Sinopsis : Permasalahan sampah seolah tak pernah ada hentinya. Selama masih ada kehidupan, di situlah dihasilkan sampah. Sampah dihasilkan dari beragam aktivitas manusia, baik di rumah, kantor, pasar, sekolah, dan berbagai tempat umum lainnya. Faktanya, jumlah sampah di Indonesia terus meningkat dari tahun ke tahun. Sayangnya, hal ini tidak diiringi dengan peningkatan yang signifikan pada langkah-langkah konkret dalam pengelolaannya. Meski fasilitas pengelolaan sampah sudah tersedia, namun belum maksimal dimanfaatkan sebab masih minimnya kesadaran masyarakat. Maka dari itu, penanaman kesadaran masyarakat supaya lebih peduli terhadap lingkungan dinilai sangat penting, selain pemberian fasilitas pengelolaannya. Sejumlah penelitian telah berupaya untuk mewujudkannya. Pada buku ini dipaparkan mengenai macam sampah, macam pencemaran akibat sampah, pengalaman dalam pengelolaan sampah, dan juga gagasan-gagasan segar dalam pengelolaan sampah. Pengelolaan sampah

di era ini sangat penting untuk meminimalisasi pencemaran lingkungan yang potensial disebabkan oleh sampah. Pengelolaan sampah dapat dimulai dari kehidupan yang paling kecil, yaitu diri sendiri, lalu keluarga, tetangga, hingga masyarakat yang lebih luas. www.guepedia.com Email : guepedia@gmail.com WA di 081287602508 Happy shopping & reading Enjoy your day, guys

Human Security Simon and Schuster
 Naturally occurring salt tolerant and halophytic plants (trees, shrubs, grasses, and forbs) have always been utilized by livestock as a supplement or drought reserve. Salt tolerant forage and fodder crops are now being planted over wide areas. Increasingly, large-scale production of fodder on formerly abandoned irrigated cropland has allowed salt tolerant and halophytic feedstuffs to be mainstreamed into the supply chain for feedlots. Feeding salty feeds to livestock has been evaluated in many countries with good outcomes especially as a way to improve livestock nutrition and productivity. Better ways have been devised to use these potentially valuable feed resources. These feedstuffs are best fed in mixed rations. Substituting conventional fodder with up to 30 percent of the diets comprising halophytic feedstuffs have proved most successful for ruminant livestock but special formulations have been devised for poultry and rabbits. There are big savings on the import of costly feedstuffs and benefits to livelihoods of those dependent on scattered, sparse and unreliable forage/fodder in the world's drylands that cover about 40 percent of the world's land surface. This book is written by leading authorities from many different countries. It reviews past and current work on the animal-oriented aspects of the utilization of feedstuffs derived from salt tolerant and halophytic plants. It brings to the reader (scientist, researcher, academics and their students, policy makers, and livestock operators) an up-to-date analysis of the important issues related to salt-rich feedstuffs (nutrition, productivity, and reproduction).

 Abstract: Communication, resources, dispositions and bureaucratic structure contribute to or limit implementation of public policy. Transmission of accurate communications is essential; lack of clarity and consistency cause problems in implementation. Staff, information, authority, and equipment resources are critical to policy implementation. Effects of the

attitudes or dispositions of law makers are explored. Organizational structure may assist or hamper implementors; advantages and disadvantages of structural types are included. Types of policies that have experienced problems in implementation are described; prospects for improving implementation (e.g., follow-up, legislative power) are examined. Case studies of US policy illustrate key concepts. (rm).

 This widely praised work provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. The expanded edition includes an all-new chapter that addresses the practical issues of applying these ideals in actual, real-life situations. "The New Public Service, Expanded Edition" is organized around a set of seven core principles: serve citizens, not customers; seek the public interest; value citizenship and public service above entrepreneurship; think strategically, act democratically; recognize that accountability isn't simple; serve, rather than steer; and value people, not just productivity. The book asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important and meaningful about public service and considers how we might

better live up to those ideals and values. All students and serious practitioners in public administration and public policy should read this book. While debates about public policy issues will surely continue, this compact, clearly written volume provides an important framework for public service based on and fully integrated with citizen discourse and the public interest.
