"The Bible of Irish income tax ...", Irish Independent, 28 January 2018. This tax essential, formerly known as Judge, is the leading income tax book for tax practitioners, accountants and tax lawyers. Indispensable in practice, it will help you to apply the relevant legislation with ease and precision. It provides a complete analysis of the principles and practice of income tax in Ireland. It also provides an examination of recent key decisions by the courts both in Ireland and in the UK, as well as by the Tax Appeal Commissioners. This new edition is updated to Finance Act 2022. This title is included in Bloomsbury Professional's Irish Tax online service.

Ford cars can be found all over the world, and vintage models appear at most classic car shows. This book helps to identify the models sold by Ford of Britain, and provides detailed information on each model, with technical specifications, original colour photographs, and lists the colour schemes that were available. Continuing this popular series covering classic British cars, David Rowe now turns his keen eye to the British Ford models. He is well placed to do so, having worked at two Ford dealerships over a 30-year period and has driven many of the models covered by this book.

This key collection brings together a selection of papers commissioned and published by the Cardiff Centre for Ethics, Law & Society. It incorporates contributions from a group of international experts along with a selection of short opinion pieces written in response to specific ethical issues. The collection addresses issues arising in biomedical and medical ethics ranging from assisted reproductive technologies to the role of clinical ethics committees. It examines broader societal issues with particular emphasis on sustainability and the environment and also focuses on issues of human rights in current global contexts. The contributors collect responses to issues arising from high profile cases such as the legitimacy of war in Iraq to physician-related suicide. The volume will provide a valuable resource for practitioners and academics with an interest in ethics across a range of disciplines.

Carmakers release new models every year with advanced technology to attract consumer interest and to satisfy increasingly stringent government regulations. Some of these technologies are firsts or leading-edge, and they start trends that more companies will soon follow. Snapshots of the direction of the automotive industry, along with OEM and supplier perspectives, are presented in these articles that have been collected by the Editors of Automotive Engineering whose aim is to provide the reader with a complete overview of the key advances that took place over the course of one model year. • Provides a single source for information on the key engineering trends of one year. • Allows the reader to skip to chapters that cover specific car models that interest them, or read about all models from beginning to end. • Includes plenty of big, full-color images and the facts about the most recent technology and engineering innovations. Each car manufacturer has its own chapter exploring new models in-depth. The yearly trends and innovations that make the automotive industry fascinating to both the engineer and the customer are all captured in the imagery and easy-reading of this full-color book.

The Rolls-Royce company acquired Bentley Motors in 1931 and, although models continued to be produced with the Bentley

name, they increasingly used many Rolls-Royce components. By the time the Silver Cloud and Bentley S were released in 1955, they were really differently badged versions of the same design. Yet the sporting tradition of the Bentley marque was upheld with the exotic Continental models that were derived from them. The Silver Cloud family represents a pinnacle for the Rolls-Royce company. The cars all had and still have a very special presence, and the standard saloons have an unsurpassed elegance and rightness of line. The special-bodied cars, meanwhile, are reminders of an age when the skill of the best coachbuilders was something deserving of universal admiration. With around 190 photographs, this book features: The story of the design and development of the Rolls-Royce Silver Cloud and Bentley S Type; A look at the production development of these cars between 1955 and 1965; An examination of the Bentley Continental models that were derived from Silver Cloud and S Type design; The history of the Phantom V and Phantom VI limousine chassis introduced in 1959 and destined to last until 1990; Full technical specifications, including paint and interior trim choices; Production figures and chassis codes and finally, a chapter on buying and owning one of these wonderful classic cars.

The first water-cooled Porsche Turbos were launched in 1979, evolving through Turbo variants of the front-engined 924, 944 and 968. With the new Millennium came the first of the water-cooled rear-engined 922 Turbos, and from 2017 turbos have been applied to the mid-engined Boxster and Cayman models. Johnny Tipler describes the progression of these popular cars from their introduction to the present day. Included are interviews with Derek Bell, Jacky Ickx, Walter Rohrl, Allan McNish, Jorg Bergmeister and Hans-Joachim Stuck. Full development and design history for all seven models is given along with

specification tables and detailed motorsport achievements.

One fugitive. A deadly plot. No rules. Thus begins an ingenious and lightning-fast thriller that reviewers agree is "not to be missed." Detective Sergeant Matthew Ryan wants to clear the name of his former boss, who stands accused of official corruption. But before he can do so, his boss disappears. Did he escape from police custody, or was he kidnapped? Or did something even worse happen to him? The Silent Room has everything a good thriller should have—compelling characters, a gripping plot and storyline, superb pacing, and a strong sense of place. In addition it has heart, something many thrillers sorely lack. Add some truly scary villains, vast uncertainty about whom to trust, and a loudly ticking clock, and we have ourselves a thriller that will grip readers from the first pages and never let go. "The explosive opening of *The Silent Room* introduces a gripping thriller with a very human face. Nobody understands the many faces of cops better than Mari Hannah." —Val McDermid "Very creepy. Read it on your commute, and you'll be looking over your shoulder all the way home." —Marie Claire "I was annoyed every time I was forced to put the book down and do mundane yet necessary stuff like eat or sleep." —Yrsa Sigurðardóttir

The MGB was a great British success story, a product largely conceived, designed and produced by a small team of dedicated people who genuinely cared about their work. Of course, the MGB came from a proud, successful sports car tradition, and the model it replaced - the revolutionary aerodynamic MGA - had been an unprecedented success - so the new car had big shoes to fill. Launching in 1962 and in production for eighteen years, the MGB became one of the most successful sports cars the world has ever known. This book describes how the MGB arose principally from the ideas of one man, MG's Chief Engineer, Syd Enever, how it was designed and developed, how it survived and thrived, and how it became the classic car still highly regarded today. There have been many previous books about the MGB, and the related MGC and V8 variants, but MGB - The superlative MG reaches a new level of detail together seasoned with fresh insight. David Knowles has been researching and writing about the MGB for more than thirty years. Prepare to be surprised at some of the stories you will have never read before, and new twists on some

you possibly thought you knew well.

A quarter of a century ago, the Land Rover Discovery defined at a stroke how traditional 4 x 4 all-terrain ability could co-exist with family-estate practicality at an affordable price. Since 1989, the Discovery has gone through several iterations, but its essential qualities have remained unchanged. Practical, capable, and above all completely distinctive - the stepped roof seemed odd at first but now defines the Discovery shape - the Discovery has gone on to become one of Land Rover's best-loved products. Land Rover Discovery - 25 Years of the Family 4 x 4 looks in detail at the four generations of Discovery, including full specification details and production histories. Topics covered include the design and development of the original Discovery in the late 1980s, and the move into North America; the new 300Tdi engine and R380 gearbox of 1994, and the BMW takeover; Series II models of 1998-2004, and Land Rover's move from BMW to Ford; Discovery 3/'LR3' - 2004-2009, and the new TDV6 engine, developed by Jaguar; Discovery 4/'LR4' - the all-purpose family luxury car; special editions and derivatives of all four generations of Discovery, including Discoverys for the emergency services and the Camel Trophy and G4 Challenge competition vehicles.

Superbly illustrated with 351 colour photographs.

Every year global automakers introduce new or significantly re-engineered passenger vehicles with increasingly advanced technology intended to exceed consumer expectations and satisfy increasingly stringent government regulations. Some of these technologies are firsts-of-their-kind and start trends that other automakers soon follow—with the innovations becoming adopted across the board. The supply community is also increasingly

playing a more significant role in helping the original equipment manufacturers research, develop, and introduce the latest engineering innovations that help bring competitive advantage for their automaker partners. Each year, the editors of SAE's Automotive Engineering magazine publish many articles focused on the technology and engineering innovations of new passenger and concept vehicles, and these articles have been collected into this volume. This 2015 Passenger Car and 2014 Concept Car Yearbook is the fourth in an ongoing series of books that provide yearly snapshots of the latest and greatest technologies introduced by the automotive industry. In this book, we explore from an OEM and supplier perspective the newest and most technically interesting production vehicles released for the 2015 model year. In addition, we also have included a technology-focused recap of the concept cars revealed during 2014. Readers will have, in one publication, a complete overview of the key advances that took place over the course of the year from around the world. Each new model is profiled in its own chapter with one or more articles by the award-winning editors and contributors of Automotive Engineering in this exclusive compilation of print and online content. The novel engineering aspects of each new vehicle are explored, with exclusive interviews of key engineers and product developers providing insights you can only get from you can only get from Automotive Engineering. This book is published for the most technically-minded enthusiasts who are interested in new car technologies, as well as practicing automotive engineers who are interested in new engineering trends. Engineering trends explored focus on what engineers are doing to meet the sometimes conflicting consumer and governmental demands for improved vehicle fuel efficiency, performance, safety and comfort. In short, this book: • Provides a single source for information on the key engineering trends of the year from both automaker and supplier perspectives. • Allows the reader to skip to chapters that cover specific car models that interest them, or read about all models from beginning to end. • Makes for dynamic book reading, with its large number of big, full-color images and easy-reading magazine format.

Inhaltsangabe:Zusammenfassung: Die vorliegende Diplomarbeit analysiert den Automobilclubmarkt für Klassiker und Youngtimer in Deutschland mit dem Ziel, eine Grundlage für den Markteintritt eines Clubs in einer bestehenden Nische zu erarbeiten. Zu diesem Zweck werden der Automobilmarkt, die allgemeinen Automobilclubs und die Clubs für Klassiker und Youngtimer untersucht. Die anschließende Marktsegmentierung erarbeitet verschiedene attraktive Zielgruppen und legt die zu bearbeitende Zielgruppe fest. Im Konzept werden strategische, taktische und operationale Ziele entwickelt. Es folgt eine Meilensteinplanung mit Handlungsempfehlung. Abschließend zeigt der Ausblick Entwicklungsmöglichkeiten für den Club auf. Das Kaufverhalten der Automobilkäufer wird seit Beginn des 21. Jahrhunderts durch das Streben nach Selbstverwirklichung, Identifikation und Differenzierung bestimmt. Die zunehmend vergleichbare Technik und auch die Verwechselbarkeit des Designs erschwert jedoch eine Differenzierung über das Produkt. Gleichzeitig ist die Kundenzufriedenheit bei Neu- und Gebrauchtwagenkäufern rückläufig. Die Folge ist ein anhaltender Rückgang der Markentreue. Die Hersteller versuchen bspw. durch „Sport and Utility Vehicles“ neue Nischenmärkte zu bilden. Weiterhin sollen der Relaunch von klassischen Modellen und der Einsatz von Kundenclubs einen Ausgleich für den Mangel an Identifikation schaffen. Das Bedürfnis nach Selbstverwirklichung, Differenzierung und Erlebnis wird dadurch jedoch nicht befriedigt. Eine steigende Zahl an Automobilkäufern findet diese Werte in einem Fahrzeug, das mindestens 20 Jahre alt ist. Während die Automobilindustrie seit Jahren durch rückläufige Umsätze bzw. Gewinne im Neuwagenverkauf gekennzeichnet ist, verzeichnen Klassiker und Youngtimer hingegen eine deutlich steigende Nachfrage. Allein die Zahl der Fahrzeuge mit Historien-Kennzeichen ist innerhalb von fünf Jahren um mehr als 700 Prozent gestiegen. In Deutschland gibt es mehr als 650 Automobilclubs für Klassiker und Youngtimer. Sie bieten Identifikations- und Erlebnismöglichkeiten. Die Clubkonzepte sind jedoch nahezu identisch. Einen Club, dessen Konzept einen

klassischen Fahrzeugpool für seine Mitglieder berücksichtigt, ist kaum zu finden. Frauen als Zielgruppe finden insbesondere auf dem Automobilclubmarkt für Klassiker bisher keine Beachtung, obwohl sie aus absatzpolitischer Sicht attraktiv sind. So zeigen sie bspw. eine besonders hohe Markentreue und eine deutlich höhere [...]

Die Abgrenzung von Märkten ist eine der Grundaufgaben, die im strategischen Marketing zu lösen ist. Denn erst die Unterteilung des Gesamtmarktes in berschaubare und analysierbare Teilmärkte ermöglicht einen umfassenden Einblick in die komplexen Beziehungen zwischen Anbietern, Nachfragern und Produkten. Um die relevanten Marktsegmente und die entsprechenden dominanten Wettbewerber für die eigenen Fahrzeuge zu bestimmen, werden von der Automobilindustrie traditionell technische Kriterien herangezogen. Allerdings erscheint eine Marktabgrenzung, die auf einer einfachen Aufzählung der objektiven Produkteigenschaften basiert und somit die Sichtweise der Konsumenten vollständig vernachlässigt, als Entscheidungs- und Handlungsgrundlage nicht mehr ausreichend. Dies gilt insbesondere unter dem Aspekt, dass die Nachfrager bei ihrer Kaufentscheidung aufgrund der zunehmenden Homogenisierung der Produkte immer seltener objektive, sondern stattdessen vor allem subjektive, intrinsische Produktmerkmale zugrunde legen. Die steigende Individualisierung der Bedürfnisse sowie das wachsende Anspruchsniveau gegenüber den angebotenen Produkten seitens der Nachfrager machen es daher erforderlich, eine Marktabgrenzung aus Konsumentensicht vorzunehmen. Das Ziel der vorliegenden Studie besteht somit darin, einen Ansatz zur Marktabgrenzung zu ermitteln, der eine kundenorientierte Ableitung von Wettbewerbsmärkten erlaubt, um Erkenntnisse über eine angemessene Vorgehensweise zur Marktabgrenzung in der Automobilindustrie zu gewinnen. Als Abgrenzungsvariable wird das Consideration Set der Neuwagenkunden herangezogen. Dieses Vorgehen ist folgendermaßen zu begründen: Auf der Produktseite steht das Konstrukt 'Consideration Set' für die Substituierbarkeit der Fahrzeuge aus Nachfragersicht und wird daher als geeignet angesehen, aufgrund seiner Zusammensetzung Rückschlüsse auf bestehende Wettbewerbsbeziehungen im Automobilmarkt zuzulassen. Auf der Nachfragerseite steht das Konstrukt 'Consideration Set
