Sequence Stratigraphy of the Lower Miocene Moghra Formation in the Qattara Depression, North Western Desert, Egypt OECD Publishing
 The Qattara Depression is part of the Northwestern Desert in Egypt and is home to the second lowest point in Africa at -133 meters below sea level. Therefore, before any projects can be carried out in this area, we must first understand the geology of the land. The present study deals with the high-resolution sequence stratigraphic analysis of the Lower Miocene Moghra Formation outcrops in the Qattara Depression Region. The literature on the sedimentology and sequence stratigraphy of the Moghra Formation has been sparse to date, despite some excellent work over the years by academic and petroleum workers. Moreover, the area studied is within what was once a front-line of World War II, where mine fields and war relics are scattered and cover wide reaches. This has resulted in limited geologic mapping in the past. Thus, great attention is paid in this study to establishing a robust sedimentology and high-resolution sequence stratigraphic framework for the Lower Miocene Moghra Formation. Included are works based on outcrops and, most importantly, new sedimentological and chronostratigraphic information not previously available.

The Indian state till recently denied information about its functioning and decision-making to its citizens, ironically, using laws made during the colonial period. Apart from being an anomaly in a democratic set-up, it created an adverse impact on the quality of governance, accountability, and transparency. It was only in 2005, after a prolonged freedom of information movement, that this situation was finally rectified. The government enacted the landmark Right to Information Act 2005, and gave to all its citizens the right to access information held by or under the control of public authorities. This Handbook is meant to serve as a practical guide to the implementation of the Act. The book begins by locating the Act in the context of a global movement for freedom of information (FOI), and discusses the efforts made by international bodies for adoption of FOI. It also presents a detailed comparative study of FOI in five countries—the US, the UK, Canada, South Africa, and India. In subsequent chapters, the book adopting a step-by-step approach, discusses the provisions of the Right to Information Act, how citizens should make use of the right to information, the comprehensive guidelines for public authorities and their obligations under the Act, which includes relevant central information commission decisions, the role of the public information officers (PIO), who are to be appointed as per the provisions in the Act by all public authorities, the exemptions allowed under the Act, and, finally, the appellate authorities to whom a citizen can appeal in case of unsatisfactory response by the PIO.
