Conventional wisdom once told us big companies are unbeatable... and eat smaller competitors for breakfast. Not anymore. These days It's Not the Big that Eat the Small... It's the FAST that Eat the Slow! Jason Jennings and Laurence Haughton discovered what separates today's icons of speed from everybody else. They asked questions like: What is the difference between speed and haste? Where does business go to spot trends before the competition? How can leaders help people stop dreading high velocity and rediscover the thrill of deciding, acting and staying fast? And studied the world's fastest companies like: H&M Europe's fast fashion phenomenon now poised to threaten apparel stores in America. AOL who gulped down Netscape and Time Warner in record time. Charles Schwab the new dominant name in discount and on-line financial services. The results are in this sensational book... a national bestseller, translated all over the globe and universally praised. Would you like to make speed a competitive tool in your business? Here's your roadmap! *A Survey for GfK Asia Pte., Ltd (Philippines)* Tata McGraw-Hill Education

Marketing is a very diverse discipline, dealing with everything from the costs of globalization to the benefits of money-back guarantees. However, there is one thing that all marketing academics share. They are writers. They publish or perish. Their careers are advanced, and their reputations are enhanced, by the written word. Despite its importance, writing is rarely discussed, much less written about, by marketing scholars. It is one of the least understood, yet most significant, academic competencies. It is a competency in need of careful study. Writing Marketing is the first such study. It offers a detailed reading of five renowned marketing writers, ranging from Ted Levitt to Morris Holbrook, and draws lessons that can be adopted, with profit, by everyone else. Although it is not a 'how to' book - there are no lengthy lists of dos and don'ts - Writing Marketing reveals that the 'rules' of good writing are good for nothing. Written by Stephen Brown, whose own writing skills are much commented upon, Writing Marketing is insightful, illuminating and iconoclastic. It is a must read for every marketing academic, irrespective of their

methodological inclinations or philosophical preferences.

In a groundbreaking text that will inspire literacy educators, the authors here describe research on low-literate, poor buyers and sellers in subsistence marketplaces. They examine the consequent development of an innovative marketplace literacy educational program that enables consumer and entrepreneurial literacy. Then, they look at the implications of the research and the educational program for business, education, and a variety of disciplines and functions.

*Principles of Marketing* Prentice Hall

The growing power being exercised by today's consumer is causing significant paradigm shifts away from traditional marketing. This is leading to a whole new take on the structure and functioning of supply chain management (SCM). It's no longer so much about improving the manufacturing process as it is improving the point and speed of contact and the continued interaction that you have with your customer. The *Intimate Supply Chain: Leveraging the Supply Chain to Manage the Customer Experience* explores how SCM can assist companies to grow and prosper in the new global economy. It focuses on what the customer wants from the supply chain and how organizations must restructure their outdated business models to meet their customer's needs. Covering this dramatic shift in customer management, David Ross, bestselling author and recognized industry expert, demonstrates how to design and maintain an efficient and up-to-date delivery channel, showcasing the methods and technologies needed to adapt to the evolving, demand-driven market. Exceptionally practical in his approach, Ross provides a new perspective that requires a broader mindset about the structure and functioning of SCM. He explains how effective management must start with the aim of getting personal with customers in order to bring total value to their shopping experience. Rather than concentrate on a range of products, this work defines a roadmap that will lead to increased empathy for your customers so that you will be able to provide

them with unbeatable and readily recognizable value. When properly traveled, you will discover that it is a roadmap to increased profitability and market share.
