In *Bending to Beauty*, Dian Zirilli-Mares uses powerful words and metaphors to craft poems that express universal truths. This is why, as the poet examines the loves and losses of life - she writes of our lives as well. We see clearly that we share dreams, joys, fears. Readers of a certain age will relish poems of childhood memories, as Ms. Zirilli-Mares captures a precious time and place, now long-gone. They will identify with her wry poems of shock and disbelief in growing older. But no matter the focus, the poet "pares close to the bone," exploring, yet never shrinking from, the truth. The reward, as revealed in the title poem, is a "bending to beauty" that makes one stronger. Poem after poem, *Bending to Beauty* probes the complicated, painful, and wondrous that is life - and holds it up for all to recognize.

Your student benefits from this Spelling Homework Journal in several ways. First, after their teacher delivers their weekly spelling assignment (for the upcoming spelling test) students will have a designated place to practice writing (journaling) their spelling words each week; parents can easily keep track of their child's progress, and they will have a permanent record of their assignments and what they've learned throughout the year. The 320 page Journal includes

blank sheets on which the student can practice writing their spelling words daily. Each week of school is numbered and includes sheets enough for the student to write their spelling words 4 consecutive days a week. Additionally, the book includes a fun activity on each page that your child will look forward to completing. The activity is designed to build anticipation of the next day's practice session. This Journal is available for grades 1 through 7. Parents have reported to us that their child experienced an immediate improvement in their spelling scores once they began consistently using this hassle free spelling journal. Go ahead and click the "Add to Cart" button and give your child the tool they need to learn both spelling and good study skills.

Life, liberty, and the pursuit of happiness are prescribed ideals in America of 2050. The Moral Authority, the nation's newest branch of government, has virtually eliminated crime, poverty, and most social ills, but it also rules the land with a tyrannical fist, championing ignorance and brandishing fear. Mark Bryan is a gay man whose existence brands him an outlaw; Isaac Montoya is a charming stranger, who entices Mark to defy moral law; and Samuel Pleasant runs the Moral Authority and plans to punish moral offenders and a rebellious uprising no matter the cost. Will liberty and justice return for all?

Chemical Engineering Process Simulation

is ideal for students, early career researchers, and practitioners, as it guides you through chemical processes and unit operations using the main simulation softwares that are used in the industrial sector. This book will help you predict the characteristics of a process using mathematical models and computer-aided process simulation tools, as well as model and simulate process performance before detailed process design takes place. Content coverage includes steady and dynamic simulations, the similarities and differences between process simulators, an introduction to operating units, and convergence tips and tricks. You will also learn about the use of simulation for risk studies to enhance process resilience, fault finding in abnormal situations, and for training operators to control the process in difficult situations. This experienced author team combines industry knowledge with effective teaching methods to make an accessible and clear comprehensive guide to process simulation. Ideal for students, early career researchers, and practitioners, as it guides you through chemical processes and unit operations using the main simulation softwares that are used in the industrial sector. Covers the fundamentals of process simulation, theory, and advanced applications Includes case studies of various difficulty levels to practice and apply the developed skills Features step-by-step guides to using Aspen Plus and HYSYS for process simulations available on companion site Helps readers predict the characteristics of a process using mathematical models and computer-aided process simulation tools

 Tired of the lack of diversity in children's

coloring books? Meet Cody & Jay, two adventurous boys who just love to have fun! Follow them throughout over 40 fun-filled coloring and activity pages that inspire creativity, promote self-confidence, and celebrate diversity. Activity pages include fill-in-the-blank exercises (for example, "You can do amazing things if you try"), thought-provoking questions ("If you could fly anywhere in the world, where would you go?"), and fun pictures to complete ("Add a design to Jay's race car!"). A wonderful gift for kids of all races, this book is engaging and is loads of fun! Like this? Check out the version for girls: "The Colorful Adventures of Zoe & Star!"

 Healing is a birthright to all humanity. Our intricate design was meticulously created to operate in a way, in which our minds and bodies have the ability to heal itself. However, when we began to worry and allow our mind to stress, we create an hostile environment that makes it difficult for the body to achieve wholeness. "Dis-ease" and illness happens when the mind, body and spirit reaches an unbalanced state. To restore ourselves to our natural order, we must begin by believing and operating in a way that healing is possible; through our own power of being optimistic and spreading positive energy to all things we come in contact with. "Even a tree has more hope. If it is cut down, it will sprout again and grow new branches."

 Kitty Hawk and the Hunt for Hemingway's Ghost is the exciting second installment in a new series of adventure mystery stories that are one part travel, one part history and five

parts adventure. This second book in the series continues the adventures of Kitty Hawk, an intrepid teenage pilot who has decided to follow in the footsteps of her hero Amelia Earhart and make an epic flight around the entire world. After flying across North America Kitty's journey takes her down south to Florida where she plans to get a bit of rest and relaxation before continuing on with the rest of her long and grueling flight. As Kitty explores the strange and magical water world of the Florida Keys her knack for getting herself into precarious situations sweeps her headlong into the adventure of a lifetime involving mysterious lights, ancient shipwrecks, razor-toothed barracudas and even a sighting of the great Ernest Hemingway himself. This exhilarating story will have armchair explorers and amateur detectives alike anxiously following every twist and turn as they are swept across the landscape and history of the Florida Keys all the way from Key West to the strange and remarkable world of Fort Jefferson and the Dry Tortugas.

Has it• Been a rough day?• Been a rough year?• Been a rough career?Do you• Dream about that creative idea just beyond your grasp?• Feel trapped in a job that pays you just enough to survive?• Regret not finishing your music, photography or screenplay?• Wish you had more time, more money, more ability to get things done?If so, The Pursuit Of Passion is the book for you.A concise book of deep thought and meditation, The Pursuit Of Passion is one of those rare experiences that comes along only once in a great while.It is a treasury of thoughtful, insightful reminders that can be read in one

sitting, or can be referred to daily, one page at a time.The book takes you on a journey from the darkest days of the 2009 Great Recession to a place of recovery, creativity, hope and passion."These writings came from a promise. Right before Memorial Day 2009, I met with my business coach Joe Stumpf. After 20 years as a commissioned loan officer, I had just lived through possibly the worst year ever in the business. My previous company had collapsed in the mortgage meltdown of 2008. During the previous 12 months my assistant had earned more money than I had. About 50% of the people in my industry were either out of work or actively looking for jobs in other areas of business. Things looked bleak, and there was no fun left. Work had become a painful grind with very little financial reward to show for all the time spent.I shared my total burn out in the business of 20 years with my coach. Frustrated by what my life had become, it became clear that something had to give. Either I had to change jobs, or change my attitude. Maybe both! I promised to get up at 5:00 AM every day, meditate and journal, and focus on bringing passion back into every aspect of my life, my work, my family and my personal growth. Instead of going to work every day and having a pity party, I have decided to have a passion party.These writings (a sample of the 475+ entries from the website <http://passionparty09.blogspot.com>) are the outgrowth of that commitment. I hope they inspire you to find your passion, and that you enjoy reading them as much as I did writing them."- George Kahn“When a person integrates the practical and the artistic, the material and the spiritual, I listen. The world has more than enough

disconnection; I am inspired by people who put things together. Real passion flows from these poems, the product of a mind and heart in synch.”-Shmuel Klatzkin, Rabbi

The document Chemical Process Simulation and the Aspen HYSYS v8.3 Software is a self-paced instructional manual that aids students in learning

how to use a chemical process simulator and how a process simulator models material balances, phase equilibria, and energy balances for chemical process units. The student learning is driven by the development of the material and energy requirements for a specific chemical process flowsheet. This semester-long, problem-based learning activity is intended to be a student-based independent study, with about two-hour support provided once a week by a student teaching assistant to answer any questions. Chapter 1 of this HYSYS manual provides an overview of the problem assignment to make styrene monomer from toluene and methanol. Chapter 2 presents ten tutorials to introduce the student to the HYSYS simulation software. The first six of these tutorials can be completed in a two-week period for the introductory chemical engineering course. The other four are intended for the senior-level design course. Chapter 3 provides five assignments to develop the student's abilities and confidence to simulate individual process units using HYSYS. These five assignments can be completed over a three-week period. Chapter 4 contains seven assignments to develop the styrene monomer flowsheet. These seven assignments can be completed over a seven-week period. In Chapter 4, each member of a four-, five-, or six-member team begins with the process reactor unit for a specifically-assigned temperature, molar conversion, and yield. Subsequent assignments increase the complexity of the flowsheet by adding process units, one by one, until the complete flowsheet with recycle is simulated in HYSYS. The team's objective is to determine the operating temperature for the reactor, such that the net profit is maximized

before considering federal taxes. Finally, eleven appendices provide mathematical explanations of how HYSYS does its calculations for various process units- process stream, stream tee, stream mixer, pump, valve, heater/cooler, chemical reactor, two-phase separator, three-phase separator, component splitter, and simple distillation. This HYSYS manual can be used with most textbooks for the introductory course on chemical engineering, like Elementary Principles of Chemical Processes (Felder and Rousseau, 2005), Basic Principles and Calculations in Chemical Engineering (Himmelblau and Riggs, 2004), or Introduction to Chemical Processes: Principles, Analysis, Synthesis (Murphy, 2007). It can also be used as a refresher for chemical engineering seniors in their process engineering design course. Because the HYSYS manuscript was compiled using Adobe Acrobat(r), it contains many web links. Using a supplied web address and Acrobat Reader(r), students can electronically access the web links that appear in many of the chapters. These web links access Aspen HYSYS(r), Acrobat PDF(r), Microsoft Word(r), and Microsoft Excel(r) files that appear in many of chapters. Students can view but not copy or print the electronic version of the HYSYS manual.

This book is designed to accompany the Introduction to Salesforce Analytics - Building Reports and Dashboards class offered by Stony Point. A person reading this book or a student in this class will to build reports and dashboards utilizing basic and advanced concepts . Although the book is designed as a supplement to the class, it contains valuable exercises that will be useful for someone wishing to learn on their own. This online, five

hour class is delivered by a live instructor and is specifically designed to teach administrators, business analysts or report writers how to utilize the basic and advanced analytic capabilities of Salesforce. A student in this class or reading this workbook will learn the basic Salesforce object model, and how to create and secure reports and dashboards. The instructor will lead students through exercises to create tabular, summary, matrix and join reports. Students will learn advanced reporting functionality such as charting, report summary fields, bucket fields, conditional highlighting, advanced report filters and building custom report types. Finally, the student will learn how to create and run dashboards and schedule and email reports and dashboards. Each student will be given a practice learning environment to participate in hands-on exercises during the class. The student will be able to use that learning environment indefinitely after the class without any additional fee. Stony Point is a leading provider of Salesforce training for sales people, customer service personnel, marketers, system administrators, developers and consultants. Stony Point delivers public and private classes virtually and in-person at locations throughout the world. Please visit www.stonyp.com for more information on the classes and services offered.

Here is a description of "More Than A Game" in the words of the protagonist, Carter Mason: I know what I look like: a stereotype; a fatherless black kid pinning his hopes on a football scholarship. But I've got the skills and the smarts to back it up. One night, and an innocent dance with a white girl, and my whole world

and all my dreams start to unravel. The killing begins. People are looking at me. And the circle of people I can trust is getting smaller by the day. I can feel the net closing in. I have to find the killer before he finds me. I have to play the best football of my life. I have to stay alive long enough to get a ticket out of hell.

Are you and your messages often misunderstood? Do your messages inspire action or add confusion? Although technology now provides multiple channels to communicate on, getting your message understood and acted upon still depends upon your proficiency using the most important communication tools available, your body and emotions. Kurt Larsson's Sensational Presentation Skills is a powerful guide for your journey toward communication mastery. The first in a series of Sensational Soft Skills Toolbox handbooks by Larsson, this practical

how-to guide offers twenty steps that highlight the importance of being fully engaged—mind and body—when you communicate. Larsson emphasizes it's equally about the words used and what your body language demonstrates. As more people turn to technology to mediate their human interactions, your ability to engage listeners in person will increase in value. Learn to powerfully handle your fears while expressing yourself fully to "move" others into action. Take a conscious step forward with this toolbox of soft skills and set yourself ahead of the curve, in both your work and your personal life. As your skills increase, you'll appreciate the layers of wisdom Larsson has packed into this guide, and you'll find yourself returning to it again and again.

This engaging historical novel introduces the reader to the viscount, Lord James Winthrop, known as 'Win' to friends and family and the charming young lady he falls passionately in love with, Miss Josephine Chambers. Lord Winthrop's parents, The Earl and Countess, are vehemently opposed to the relationship between their son, who is the heir to Winthrop Manor, and Josephine, who is not of the aristocracy. Win and Josephine

solve their dilemma when England declares war against Germany by eloping to Gretna Green before Win enlists in the military. After surviving numerous battles and the horrific gassing by the Germans, Win eventually finds himself in a POW camp. Josephine gives birth to a cherished son, while

praying for Win's safe return. As she struggles with the heartache of a husband who is missing in action, her infant son, Andrew, disappears. Josephine strongly suspects that a vile member of the Winthrop family has concocted a scheme to kidnap the child.
