History of the Donner Party University Press of Colorado

"This new edition of one of the masterworks of twentieth-century anthropology is more than welcome...enduringly significant insights."—Marilyn Strathern, emerita, University of Cambridge
In the field of anthropology, few books manage to maintain both historical value and contemporary relevance. Roy Wagner's *The Invention of Culture*, originally published in 1975, is one that does.

Wagner breaks new ground by arguing that culture arises from the dialectic between the individual and the social world. Rooting his analysis in the relationships between invention and convention, innovation and control, and meaning and context, he builds a theory that insists on the importance of creativity, placing people-as-inventors at the heart of the process that creates culture. In an elegant twist, he also shows that this very process ultimately produces the discipline of anthropology itself. Tim Ingold's foreword to the new edition captures the exhilaration of Wagner's book while showing how the reader can journey through it and arrive safely—though transformed—on the other side.

Imagining the American West as the Orient
University of Chicago Press

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the

first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat. Submissive in Love Secret Narrative

In 1846, a band of California-bound pioneers took a fateful shortcut that left them stranded in the frigid Sierras—horrifyingly, some resorted to cannibalism to survive. Newspaperman Charles F. more terrible than fiction."

His gripping account reveals not only a stark tale of desperation but also many inspiring acts of heroism. Reprint of the A. L. Bancroft, San Francisco, 1880 edition. Mozaika LLC
