smart location based services and big data applications, bioinformatics, multimedia, smartphones, etc

Proceedings : 4-7 April 2017, Vancouver, Canada

The conference provides an opportunity for researchers, professors, academicians, scientists and professional engineers to present their work, publish their results, exchange ideas and network for scientific and industrial collaborations  
The main topics are related to the power

systems and electrical engineering with particular interest to new technologies  
The general scope of the I and CPS Europe conference is to provide practical information about the planning, design, construction, operation and analysis of industrial and commercial power systems for Europe
