*Supplement Oways*

Port work is still considered an occupation with very high accident rates. This essential code of practice, intended to replace both the second edition of the ILO Code of Practice on Safety and Health in Dock Work (1977) and the ILO Guide to Safety and Health in Dock Work (1976), provides valuable advice and assistance to all those charged with the management, operation, maintenance and development of ports and their safety. Offering many detailed technical illustrations and examples of good practice, the provisions of this code cover all aspects of port work where goods or passengers are loaded or unloaded to or from ships. It is not limited to international trade but applies equally to domestic operations, including those on inland waterways. New topics are: traffic and vehicular movements of all types; activities on shore and on ship; amended levels of lighting provision; personal protective equipment; ergonomics; provisions for disabled persons; and the specific handling of certain cargoes, for example logs, scrap metal and dangerous goods.

Innovations and developments in the types of cargoes carried in freight containers have allowed heavy, bulky items which were traditionally loaded directly into the ships' hold to be carried in cargo transport units (CTUs). The IMO/ILO/UNECE Code of Practice for Packing of Cargo Transport Units (CTU Code) gives advice on the safe packing of cargo transport units to those responsible for the

packing and securing of the cargo and by those whose task it is to train people to pack such units. This publication outlines theoretical details for packing and securing as well as giving practical measures to ensure the safe packing of cargo onto or into CTUs.

*Commercial Vessel Safety* International Labour Organization

This publication shows designated first-aid providers how to diagnose, treat, and prevent the health problems of seafarers on board ship. This edition contains fully updated recommendations aimed to promote and protect the health of seafarers, and is consistent with the latest revisions of both the WHO Model List of Essential Medicines and the International Health Regulations.--Publisher's description.

Ships operating in the Arctic and Antarctic environments are exposed to a number of unique risks. Poor weather conditions and the relative lack of good charts, communication systems and other navigational aids pose challenges for mariners. The remoteness of the areas makes rescue or clean-up operations difficult and costly. Cold temperatures may reduce the effectiveness of numerous components of the ship, ranging from deck machinery and emergency equipment to sea suction. When ice is present, it can impose additional loads on the hull, propulsion system and appendages. The Guidelines for ships operating in polar waters aim at mitigating the additional risk imposed on shipping in the harsh environmental and climatic conditions that exist in polar waters. This publication should be of interest to maritime administrations, ship manufacturers, shipping companies, cruise and tour operators, education institutes and others concerned with the safe operation of ships in polar waters.

Code of Safe Practice for Cargo Stowage and Securing (CSS Code)  
The Code of Safe Practice for Cargo Stowage and Securing (CSS Code) provides an international standard for the safe stowage and securing of cargoes to promote the safety of life both at sea, and during loading and discharge. The 2021 edition incorporates all amendments up to and including 2020. In particular, this edition includes amendments to annex 13 on Methods to assess the efficiency of securing arrangements for semi-standardized and non-standardized cargo (MSC.1/Circ.1623), appendix 2 on Revised guidelines for the preparation of the Cargo Securing Manual (MSC.1/Circ.1353/Rev.2) and appendix 4 on Revised guidelines for securing arrangements for the transport of road vehicles on ro-ro ships (MSC.479(102)), which supersedes resolution A.581(14), as amended. Also included in this 2021 edition of the Code are amendments to annex 14 on Guidance on providing safe working conditions for securing of containers on deck

International Maritime Dangerous Goods Code : Incorporating Amendment 35-10 Oways Ideal for Merchant Navy Officers from Cadet rank to Master Mariner, the fifth edition of this highly respected book is in full colour, and has been updated to include more information on topics as diverse as electronic navigation and AIS technology whilst still including essential information on subjects such as safety at sea, rescue operations, watchkeeping duties and pollution control. It covers international standards and works well on courses throughout the world. Seamanship Techniques is written for serving mariners and nautical students from cadet to master level, studying for professional marine qualifications under the International Maritime Organization as per STCW requirements. Used by training establishments around the world, this best seller is the only reference to both shipboard practice and ship operations that seafarers will need.

Selected papers from 2012 International Conference on Software Engineering, Knowledge Engineering and Information Engineering (SEKEIE 2012) World Health Organization

In Global Maritime Safety & Security Issues and East Asia, Suk Kyoon Kim offers a multi-disciplinary perspective on various issues of maritime safety and security, focusing on East Asia. Ranging from the definitions of maritime safety and security, this book provides insights on a wide range of maritime safety and security regimes and issues.

Code of Safe Practice for Cargo Stowage and Securing (CSS Code) IMO Publishing

The International Maritime Dangerous Goods Code relates to the safe carriage of dangerous goods by sea, but does not include all details of procedures for packing of dangerous goods or actions to take in the event of an emergency or accident involving personnel who handle goods at sea. Within

a continuing process of revision of publications that are relevant to the IMDG Code, the EmS Guide: Emergency Response Procedures for Ships Carrying Dangerous Goods was further amended at the eighty-seventh session of MSC in May 2010, and the details are described in MSC.1/Circ.1360. Also at the at the ninetieth session of MSC in May 2012 and ninety-third session of MSC in May 2014, and the details are described in MSC.1/Circ.1438 and MSC.1/Circ.1476 respectively. The Supplement also includes texts of the Medical First Aid Guide, descriptions of the reporting procedures for incidents involving dangerous goods, harmful substances and/or marine pollutants, the International Code for the Safe Carriage of Packaged Irradiated Nuclear Fuel, Plutonium and High-Level Radioactive Wastes on board Ships and other appropriate Assembly resolutions, resolutions and circulars of the Maritime Safety Committee and circulars of the Facilitation Committee and of the Sub-Committee on Dangerous Goods, Solid Cargoes and Containers. The following circulars have been added to the present edition: MSC.1/Circ.1439: Conversion table (record of amendments) for part 7 requirements of the IMDG Code concerning transport operations; MSC.1/Circ.1440: Illustrations of segregation of cargo transport units on board containerships and ro-ro ships; MSC.1/Circ.1442: Inspection programmes for cargo transport units carrying dangerous goods

A Guide for Loading, Handling, Stowage, Securing, and Transportation of Different Types of Cargoes, Except Liquid Cargoes and Gas

This guide takes the reader through the basic rules to be remembered on every occasion during the loading and securing of cargo, and describes where regulations, recommendations and general guidance can be found. It also describes recommended methods to be used for particular items and types of cargo, and gives guidance upon the points to be remembered during passage-planning and the voyage itself.

*Cargo Stowage and Securing*

A Guide for Loading, Handling, Stowage, Securing, and Transportation of Different Types of Cargoes, Except Liquid Cargoes and Gas. The most common cargoes and their stowage and calculation are described - Container Cargoes, Reefer Cargoes, Bulk Cargoes including Grain and Grain products, Heavy Lift Cargoes, Timber Cargoes, Steel Cargoes and Ro-Ro Cargoes. For each cargo the stowage and loading principles are described as well as the securing of these cargoes which includes all necessary calculations.
