 Motorcycles and Motorcycling in the USSR from 1939 provides the first accessible English language account of motorcycles in the Soviet Union. Concentrating on the wartime and postwar period until 1990, prior to the dissolution of the USSR in 1991, it covers the motorcycles produced, and looks at the way in which they were used at home and exported abroad. Chapters cover wartime, models produced, the social character of Soviet era motorcycling, and wide-ranging sport. With planned rather than market-led production based around copies of pre-war German BMW and DKW models, the industry churned out hundreds of thousands of utilitarian and rugged machines that were very different from the more fashion-orientated machines produced in the West. These motorcycles went under the place names of the producing factories: Ishevsk, Kovrov, Moskva, Minsk and, of course, the large flat twins produced in Irbit and Kiev under the Ural and Dnepr names. With a strong emphasis on Soviet era illustrations, the book provides an insight into a life, based on idealism and ideology that has now passed. Photographs and images, many of them from private family collections, show Soviet bikes as well as popular imports Jawa from Czechoslovakia, and Pannonia from Hungary.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival.

Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the

text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Everything you need to know to restore or customize your classic Japanese motorcycle. Whether you want to correctly restore a classic Japanese motorcycle or create a modified, custom build, you need the right information about how to perform the mechanical and cosmetic tasks required to get an old, frequently neglected, and often long-unridden machine back in working order. How to Rebuild and Restore Classic Japanese Motorcycles is your thorough, hands-on manual, covering all the mechanical subsystems that make up a motorcycle. From finding a bike to planning your project to dealing with each mechanical system, How to Rebuild and Restore Classic Japanese Motorcycles includes everything you need to know to get your classic back on the road. Japanese motorcycles have been the best-selling bikes in the world since the mid-1960s, driven by the "big four": Honda, Yamaha, Suzuki, and Kawasaki. Of course certain bikes have always had a following - Honda CB750, 305 Hawk, CB400-4, Benly; Suzuki GT750, Katana, GS1000S; Yamaha XS650, RD400 Daytona, TZ; Kawasaki H1, H2, Z1R - and these have now become the blue-chip Japanese bikes leading collectors to seek out more common (and now more affordable) alternatives. This is the perfect book for anyone interested in classic Japanese motorcycles, as well as prepping a bike to build a cafe racer, street tracker, or other custom build.
