Passover and Easter
constitute for Jews and
Christians respectively
two of the most important
religious festivals of the
year. This volume
concentrates on the
contexts in which they
occur - the periods of
preparation for the feasts
and their connection to
Shavuot and Pentecost.

On Men Unwittingly
Turned Divine Harper
Perennial

Tired of Cold War political
analysis about post-Cold
War events, zero-sum
game theories, and world
history as only one war
after another?

Disobedient Histories in
Ancient and Modern
Times: Regionalism,
Governance, War and
Peace breaks tradition by
considering some
alternative Western and
non-Western international
relations theories found in
historical, anthropological,
literary, archaeological,

genetic and physical
evidence from some
ancient and modern
societies in Europe, Africa
and Asia. Chapters in this
comparative history book
explore the deep
backstory of the South
Asian Association for
Regional Cooperation, the
Association for Southeast
Asian Nations,
Scandinavian
Progressivism in
international
development, Welsh
cultural preservation,
North African feminism
and political traditions in
Tunisia, and the Gulf
Cooperation Council.
Other chapters explore
the backstory of ideas
leading to the rise of the
ultranationalist National
Front political party and
the Charlie Hebdo
magazine attack in France
and also the zombie
economics behind Boko
Haram in Nigeria. The
international relations
theories in these
disobedient histories
suggest that the global
peace, prosperity and
dignity present in the
United Nations Millennium
and Sustainable
Development Goals are
viable.

A New History of the

Middle Ages CUP Archive
Revealing the central yet
intentionally obliterated
role of Africa in the
creation of modernity,
Born in Blackness vitally
reframes our
understanding of world
history. Traditional
accounts of the making of
the modern world afford a
place of primacy to
European history. Some
credit the fifteenth-
century Age of Discovery
and the maritime
connection it established
between West and East;
others the accidental
unearthing of the "New
World." Still others point
to the development of the
scientific method, or the
spread of Judeo-Christian
beliefs; and so on, ad
infinitem. The history of
Africa, by contrast, has
long been relegated to
the remote outskirts of
our global story. What if,
instead, we put Africa and
Africans at the very
center of our thinking
about the origins of
modernity? In a sweeping
narrative spanning more
than six centuries,
Howard W. French does
just that, for Born in
Blackness vitally reframes
the story of medieval and
emerging Africa,

demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the "dark" continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe's yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who

liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-forgotten peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—silenced and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic "rise of the West" theories that have endured to this day. "Capacious and compelling" (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest "commodity" of them all, the twelve

million people who were brought in chains from Africa to the "New World," whose reclaimed lives shed a harsh light on our present world.

Contemporary World History Cambridge University Press

This third book in the four-volume narrative history series for elementary students will transform your study of history. The *Story of the World* has won awards from numerous homeschooling magazines and readers' polls—over 150,000 copies of the series in print! Now more than ever, other cultures are affecting our everyday lives—and our children need to learn about the other countries of the world and their history. Susan Wise Bauer has provided a captivating guide to the history of other lands. Written in an engaging, straightforward manner, *The Story of the World: History for the Classical Child; Volume 3: Early Modern Times* weaves world history into a story book format. Who was the Sun King? Why did the Luddites go around England smashing machines? And how did samurai become sumo wrestlers? *The Story of the World* covers the sweep of human history

from ancient times until the present. Africa, China, Europe, the Americas—find out what happened all around the world in long-ago times. Designed as a read-aloud project for parents and children to share together, *The Story of the World* includes each continent and major people group. Volume 3: *Early Modern Times* is the third of a four volume series and covers the major historical events in the years 1600 to 1850, as well as including maps, illustrations, and tales from each culture. Each *Story of the World* volume provides a full year of history study when combined with the *Activity Book*, *Audiobook*, and *Tests*—each available separately to accompany each volume of *The Story of the World Text Book*. Volume 3 Grade Recommendation: Grades 3-8.

United States History and Geography, Student Edition Cambridge University Press

With today's popular television programs about criminal justice and crime scene investigation and the surge of detective movies and books, students often have a passion for exploring forensic science. Now you can guide that excitement into a profitable learning experience with the help of the innovative, new **FORENSIC SCIENCE: FUNDAMENTALS AND INVESTIGATIONS, 2E**. This dynamic, visually powerful text has been carefully crafted to ensure solid scientific content and an approach that delivers precisely what you need for your high school course. Now an established best-seller, **FORENSIC SCIENCE: FUNDAMENTALS AND INVESTIGATIONS, 2E**

offers a truly experiential approach that engages students in active learning and emphasizes the application of integrated science in your course. Student materials combine math, chemistry, biology, physics, and earth science with content aligned to the National Science Education Standards, clearly identified by icons. This book balances extensive scientific concepts with hands-on classroom and lab activities, readings, intriguing case studies, and chapter-opening scenarios. The book's exclusive Gale Forensic Science eCollection™ database provides instant access to hundreds of journals and Internet resources that spark the interest of today's high school students. The new edition includes one new chapter on entomology and new capstone projects that integrate the concepts learned throughout the text. Comprehensive, time-saving teacher support and lab activities deliver exactly what you need to ensure that students receive a solid, integrated science education that keeps readers at all learning levels enthused about science. **FORENSIC SCIENCE: FUNDAMENTALS**

AND INVESTIGATIONS, 2E sets the standard in high school forensic science . . . case closed. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Mcdougal Littell Middle School World History
McGraw-Hill Education
The Middle East in Modern World History focuses on the history of this region over the past 200 years. It examines how global trends during this period shaped the Middle East and how these trends were affected by the region's development. Three trends from the past two centuries are highlighted: The region as a strategic conduit between East and West
The development of the region's natural resources, especially oil
The impact of a rapidly globalizing world economy on the Middle East

A New History of Humanity Farrar, Straus and Giroux
"Not only an engrossing read about the distant past, both informative and entertaining, but also a profoundly thought-provoking view of our not-really-so-'new' present . . . All medieval history is

here, beautifully narrated . . . The vision takes in whole imperial landscapes but also makes room for intimate portraits of key individuals, and even some poems."—Wall Street Journal "A lively history . . . [Jones] has managed to touch every major topic. As each piece of the puzzle is placed into position, the modern world gradually comes into view . . . Powers and Thrones provides the reader with a framework for understanding a complicated subject, and it tells the story of an essential era of world history with skill and style."—The New York Times
The New York Times bestselling author returns with an epic history of the medieval world—a rich and complicated reappraisal of an era whose legacy and lessons we are still living with today. When the once-mighty city of Rome was sacked by barbarians in 410 and lay in ruins, it signaled the end of an era--and the beginning of a thousand years of profound transformation. In a gripping narrative bursting with big names—from Sts Augustine and Attila the Hun to the Prophet Muhammad and Eleanor of Aquitaine—Dan Jones

charges through the history of the Middle Ages. Powers and Thrones takes readers on a journey through an emerging Europe, the great capitals of late Antiquity, as well as the influential cities of the Islamic West, and culminates in the first European voyages to the Americas. The medieval world was forged by the big forces that still occupy us today: climate change, pandemic disease, mass migration, and technological revolutions. This was the time when the great European nationalities were formed; when the basic Western systems of law and governance were codified; when the Christian Churches matured as both powerful institutions and the regulators of Western public morality; and when art, architecture, philosophical inquiry and scientific invention went through periods of massive, revolutionary change. The West was rebuilt on the ruins of an empire and emerged from a state of crisis and collapse to dominate the world. Every sphere of human life and activity was transformed in the thousand years covered by Powers and Thrones. As we face a critical

turning point in our own millennium, Dan Jones shows that how we got here matters more than ever.

How the Word Is Passed
Western Reserve Historical
Duiker's comprehensive, balanced history of the world in the twentieth and twenty-first centuries provides you with context for interpreting the events that you hear about in the news each day. You'll view history from the broader global perspective, while at the same time gaining insight into the distinct character of individual civilizations and regions. To ensure that you'll have a well-rounded understanding of the most decisive moments in recent times, Duiker integrates political, economic, social, and cultural history into a smoothly written narrative. The Fifth Edition text includes a special insert that guides you in using the text's many detailed maps and helps you learn how to make important connections between geography and the turn of historic events. Additional tools include timelines that highlight and contrast different cultures and nations--giving you an "at-a-glance," holistic

perspective on eras and their defining events; photos from William Duiker's own collection for a closer, more personal look at the world we live in; and primary-source documents that illustrate and clarify key points. *The Symbolic Structuring of Sacred Seasons*
Glencoe/McGraw-Hill
Provides sample questions and answers, recommended readings, maps, and activities. *A Reckoning with the History of Slavery Across America* Penguin
The impersonality of social relationships in the society of strangers is making majorities increasingly nostalgic for a time of closer personal ties and strong community moorings. The constitutive pluralism and hybridity of modern living in the West is being rejected in an age of heightened anxiety over the future and drummed up aversion towards the stranger. Minorities, migrants and dissidents are expected to stay away, or to conform and integrate, as they come to be framed in an optic of the social as interpersonal or communitarian. Judging these developments as dangerous, this book offers a counter-argument by looking to relations

that are not reducible to local or social ties in order to offer new suggestions for living in diversity and for forging a different politics of the stranger. The book explains the balance between positive and negative public feelings as the synthesis of habits of interaction in varied spaces of collective being, from the workplace and urban space, to intimate publics and tropes of imagined community. The book proposes a series of interventions that make for public being as both unconscious habit and cultivated craft of negotiating difference, radiating civilities of situated attachment and indifference towards the strangeness of others. It is in the labour of cultivating the commons in a variety of ways that Amin finds the elements for a new politics of diversity appropriate for our times, one that takes the stranger as there, unavoidable, an equal claimant on ground that is not pre-allocated.

a lower grade level, making it perfect for struggling readers and ELL students.

The Global Cold War

Basic Books

This major work by Laurence Lampert provides a new interpretation of modern philosophy by developing Nietzsche's view that genuine philosophers set out to determine the direction of culture through their ideas and that they conceal the radical nature of their thought by their esoteric style. From this Nietzschean perspective, Francis Bacon and René Descartes can be considered the founders of modernity. Lampert argues that Bacon's positive claims for science aimed to destroy the dominance of Christianity. Descartes continued Bacon's radical program while providing it with the mathematical physics required for its success. Far from being solely an epistemological and metaphysical thinker, says Lampert, Descartes was a master writer whose comic ridicule helped bring down the Church to which he paid lip service. Both Bacon and Descartes used the Platonic art of dissimulation to achieve

their ends by making their revolutionary aims appear compatible with Christianity. Once we recognize Bacon and Descartes as legislators of modern times in a specifically Nietzschean sense, we can also see Nietzsche in a new way-- as the first thinker to have understood modern times and transcended it in a postmodern worldview. According to Lampert, Nietzsche provides a new foundation for culture, a joyous science that reveals the grandeur and purposeless play of the cosmic whole and yet avoids enervating despair or destructive, dogmatic belief.

The Dawn of

Everything Routledge
The Roman architect and engineer Vitruvius declared *firmitas, utilitas, and venustas*-firmness, commodity, and delight-to be the three essential attributes of architecture. These qualities are brilliantly explored in this book, which uniquely comprises both a detailed survey of Western architecture, including Pre-Columbian America, and an introduction to architecture from the Middle East, India, Russia, China, and Japan. The text encourages readers to examine closely the

pragmatic, innovative, and aesthetic attributes of buildings, and to imagine how these would have been praised or criticized by contemporary observers. Artistic, economic, environmental, political, social, and technological contexts are discussed so as to determine the extent to which buildings met the needs of clients, society at large, and future generations.

Story of the World, Vol. 3: History for the Classical Child: Early Modern Times (Revised Edition) (Vol. 3) (Story of the World) World History &

Geography Contemporary World History

Is the history of the modern world the history of Europe? Or is it possible to situate the history of modernity as a world historical process apart from its origins? This text challenges adherents of Eurocentrism and multiculturalism to rethink the roles of Europe and Islamic civilization in world history.

Land of Strangers

Liveright Publishing
INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental

assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and

perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations
Modern Times: California Edition Peace Hill Press
A leading ecologist argues that if humankind is to survive on a fragile planet, we must understand and obey its iron laws Our species has amassed unprecedented

knowledge of nature, which we have tried to use to seize control of life and bend the planet to our will. In *A Natural History of the Future*, biologist Rob Dunn argues that such efforts are futile. We may see ourselves as life's overlords, but we are instead at its mercy. In the evolution of antibiotic resistance, the power of natural selection to create biodiversity, and even the surprising life of the London Underground, Dunn finds laws of life that no human activity can annul. When we create artificial islands of crops, dump toxic waste, or build communities, we provide new materials for old laws to shape. Life's future flourishing is not in question. Ours is. As ambitious as Edward Wilson's *Sociobiology* and as timely as Elizabeth Kolbert's *The Sixth Extinction*, *A Natural History of the Future* sets a new standard for understanding the diversity and destiny of life itself.
History of the Jews of Cleveland John Wiley & Sons
'Expansive and accessible, Peter Stearns' *Sexuality in World History* offers a much needed introduction to histories of

sexuality from a global perspective.' – Mary Spongberg- Head of Department of Modern History, Macquarie University, USA This book examines sexuality in the past, and explores how it helps explain sexuality in the present. The subject of sexuality is often a controversial one, and exploring it through a world history perspective emphasises the extent to which societies, including our own, are still reacting to historical change through contemporary sexual behaviours, values, and debates. The study

uses a clear chronological structure to focus on major patterns and changes in sexuality – both sexual culture and sexual behaviours – in the main periods of world history, with comparison and discussion across cultures and societies. Topics covered include: issues involved in studying the history of sexuality the sexual implications of the transition from hunting and gathering economies to agricultural economies sexuality in Classical societies the post-Classical period and the spread of the world

religions sex in an age of trade and colonies changes in sexual behaviours and sexual attitudes between 1750 and 1950 sex in contemporary world history. The book is a vital contribution to the study of world history, and is the perfect companion for all students of the history of sexuality.
