The medical examiner has determined that the victims died from drinking coffee laced with rat poison. The owner of the house, Professor Thaddeus Huntgardner, isn't suspected, but his claim that a piece of the debris from Roswell's 1947 UFO crash was hidden in Flagler might be true. Enter Luther "Luke" Stephens McWhorter, a Yale Divinity School-educated West Texas sheriff with all the right questions. Is the fragment real? If so, who is trying to locate it? And what has fueled the byzantine activities of Abbot County's two secret societies for the past 70 years? Working with FBI agent and girlfriend, Angie Steele, Sheriff Luke begins to put together all the pieces and come to understand the connection between seemingly unrelated phenomena.

Faced with climate change, many counsel "going green," encouraging us to buy organic food or a "clean" car, for example. But can we rely on consumerism to provide a solution to the very problems it has helped cause? Heather Rogers travels from Paraguay to Indonesia, via the Hudson Valley, Detroit, and Germany's Black Forest, to investigate green capitalism, and argues for solutions that

are not mere palliatives or distractions, but ways of engaging with how we live and the kind of world we want to live in. A new afterword considers various ways in which national development might be freed from its dependence on economic growth, allowing for a decent standard of living without exhausting the planet's resources.

Criminal investigators need broad knowledge of such topics as criminal law, criminal procedure, and investigative techniques. The best resource for these professionals will distill the needed information into one practical volume.

Written in an accessible style, the fourth edition of *Criminal Investigation* maintains the same reader friendly approach that made its predecessors so popular with students, professionals, and practitioners. Beginning with an overview of the history of criminal investigation, the book explores current investigative practices and the legal issues that constrain or guide them. It discusses the wide range of sources of information available, including the internet, individuals, state and local sources, and federal agencies and commissions. Next, the book discusses other investigative techniques, including interviewing and interrogation, informants, surveillance, and undercover operations. A chapter on report writing provides explicit instructions on how to capture the most critical information needed in an investigation. Additional chapters cover the crime scene investigation and the crime laboratory. The remainder of the book delves into the specific investigative protocols for individual crimes, including sex offenses, homicide, mass and serial murder, assault and robbery, property crimes, cybercrime, and narcotics. Concluding chapters focus on the

police/prosecutor relationship and investigative trends. Each chapter includes a summary, a list of key terms, and review questions so that readers can test their assimilation of the material. Clear and concise, this book is an essential resource for every criminal investigator's toolbox.
