They are invincible warriors of steel, silky-skinned enticers, stealers of jobs and lovable goofball sidekicks. Legions of robots and androids star in the dream factories of Hollywood and leer on pulp magazine covers, instantly recognizable icons of American popular culture. For two centuries, we have been told tales of encounters with creatures stronger, faster and smarter than ourselves, making us wonder who would win in a battle between machine and human. This book examines society's introduction to robots and androids such as Robby and Rosie, Elektro and Sparko, Data, WALL-E, C-3PO and the Terminator, particularly

before and after World War II when the power of technology exploded. Learn how robots evolved with the times and then eventually caught up with and surpassed them.

Shortlisted for the Sainsbury's Book Award This is a thrill-ride of an adventure, with illustrations by Ben Mantle bringing Boot's world to life. Fans of Toy Story and Charlie Changes into a Chicken will love this hilarious, warm-hearted story about a small robot on a big adventure: full of fun, friendship ... and Boot's quest to find out why humans are so leaky and weird. 'Fast, funny and furious. These are definitely my favourite robots.' Eoin Colfer When toy robot, Boot, wakes up at a scrapyard, it has no idea how it got there and why it isn't with its owner, Beth. It only has two and a half glitchy memories, but it knows it was loved, which means something important to humans. Boot soon realises its emotions make it different to other robots, who just function and don't think. Boot is scared but tries to be brave, which is hard when its screen keeps showing a wobbly, worried face. Luckily Boot meets Noke and Red - other 'advanced' robots who have learned to survive in secret. With new friends by its side, Boot is determined to find Beth and the gang set off on a dangerous adventure. Everything Boot thought it knew about the world is changing, and things aren't as simple as it remembers . . .

Illustrated throughout in glorious black and white by the award-winning Ben Mantle, this is an unforgettable tale of resilience and hope. It will take you by surprise and make you think about the world around you. Read more of Boot's adventures in The Rusty Rescue and The Creaky Creatures!

Dear Reader, This is the first Novel I wrote in the Novo Nation of Water Worlds series and I wrote it to keep me from going crazy is what I was thinking when I started. I was dating a girl and things were going crazy, so to really calm myself I started writing and I have not stopped. It has been edited for spelling is all I've done with it. William *Star Crusader* Hachette UK
