NINE-SOLUTION PROBLEM. INTRODUCTION This experiment is an exercise in observation and deduction, both critical skills for productive scientific study. The experiment is divided into two parts. During the first part, which will take at least one lab period, you will be making observations on the results of binary mixing
NINE-SOLUTION PROBLEM
The Nine-Bottle Challenge Name _____

Background: Almost all salts ("salt" is a name for an ionic compound) exist in water solutions as separated ions. For example, a solution of sodium chloride contains Na^+ ions and Cl^- ions, and no NaCl species. When solutions of different salts are mixed, the ionic species present may be different.
The Nine-Bottle Challenge
Chemical Reactions: The Nine Bottle Problem Pre-Lab Rb Name Section Number Date: PRE-LAB QUESTIONS e using 9 different chemicals for this laboratory experiment. For each possible 1. You are to perform a reaction between the 9 chemicals, predict the products and write a balanced, complete molecular equation.

equation. Look at the products you predicted for the first ...Chemical Reactions: The Nine Bottle Problem Pre-La ...Nine Bottles Experiment By: Jenna, Bailey, and Claire Unknown #4 and #6 The data from the first weeks lab showed that these compounds would form a white precipitate, the data from week two's lab agreed The chemical equation supports this because AgNO_3 and NaCl would combine toNine Bottles Experiment by jenna boyle on PreziView Lab Report - Lab 5_The Nine Solution Problem_F2009 from SCIENCE 124 at Hagersville Secondary School.
