The intent of Canadian Essentials of Pediatric Nursing is to provide the nurse with the basis needed for sound nursing care of children in Canada. The main objective is to aid the students in building a strong knowledge base that reflects the Canadian context as well as to assist with the development of critical thinking skills. The book covers a broad scope of topics, placing emphasis on common issues and pediatric-specific content. The text presents the important differences when caring for children as compared to caring for adults. Rather than repeating medical-surgical content, the text builds upon that knowledge base. A nursing process approach provides relevant information in a concise and non-redundant manner. In Unit IV, specific nursing process content is discussed as appropriate for given disorders.
