This collection of essays reflects on the ways in which writing centres in South Africa are working in and across disciplines. Institutional constraints and challenges that arise from these collaborations are addressed and opportunities for transforming teaching and learning spaces are explored. The chapters speak to the global move in higher education to reconsider how

knowledge is made, who makes it, and how support and development opportunities for students and lecturers should be created and sustained across the disciplines. This volume contributes to the body of knowledge in the growing field of the scholarship of teaching and learning in higher education in South Africa. It builds on the work of the first collection of such essays: *Changing Spaces: Writing Centres and Access to Higher Education* (Eds. A Archer and R Richards, 2011, SUN PReSS) to understand why working within the disciplines is so critical for writing development in a South African context. *LSAT Logic Games Bible Workbook* Kaplan Use Various Contrastive Tactics to Clarify These Tensions. Conclusion: Opening Critical Spaces.

Leapfrogging Simon and Schuster From the author of the classic *The Wizards of Armageddon* and Pulitzer Prize finalist comes the definitive history of American policy on nuclear war—and Presidents' actions in nuclear crises—from Truman to Trump. Fred Kaplan, hailed by *The New York Times* as “a rare combination of defense intellectual and pugnacious reporter,” takes us into the White House

Situation Room, the Joint Chiefs of Staff's “Tank” in the Pentagon, and the vast chambers of Strategic Command to bring us the untold stories—based on exclusive interviews and previously classified documents—of how America's presidents and generals have thought about, threatened, broached, and just barely avoided nuclear war from the dawn of the atomic age until today. Kaplan's historical research and deep reporting will stand as the permanent record of politics. Discussing theories that have dominated nightmare scenarios from Hiroshima and Nagasaki, Kaplan presents the unthinkable in terms of mass destruction and demonstrates how the nuclear war reality will not go away, regardless of the dire consequences.

Writing Technologies and Critical Research Practices Simon and Schuster

Power has been compared to the weather: people discuss it all the time, but very few really understand it. This book seeks to demystify this complex concept by providing students with an incisive and engaging introduction to the shifting configurations of power in the contemporary global order. Drawing on the work of leading international relations scholars, philosophers and sociologists,

the analysis goes beyond simplistic views of power as material capability, focusing also on its neglected social dimensions. These are developed and explored through a detailed examination of the changing international role, status and capacities of the United States, Russia and China since the end of the Cold War. Far from achieving multipolarity, the book concludes that the contemporary world remains essentially unipolar; America having moved to correct the mistakes of George W. Bush's first term in office, while China and Russia have, in different ways, limited their own abilities to challenge American primacy. This book will be essential reading for students of international relations and politics, as well as anyone with an interest in the shifting balance of power in the global system.

This book examines the writing practices of three adult multilingual writers through the prism of their writing in English as an additional language. It illustrates some of the social, cultural and political contexts of the writers' literacy activities and discusses how these impact their literate and intellectual lives. It reflects on the para- and meta-textual dimensions of writing because organic writing practices are almost always performed within sociocultural and power-relational contexts. In our highly compartmentalized educational structures, writing education has been severed from those organic components, focusing mainly on writing stylistics. This book proposes creating

space for organic writing practices in our everyday writing pedagogies, and argues for a writing pedagogy that acknowledges the complex interactions of social, emotional and identity-related layers of writing.

Provides leaders with a simple strategy to improve the performance of their teams through the calculating of “priorities,” “who” and “relationships” and by increasing that total, realize more value, impact, earnings and overall success.

Kaplan PRAXIS John Wiley & Sons

* Challenges the idea that business success requires leaders to create predictability and maximize control* Demonstrates how embracing, cultivating, and harnessing uncertainty and unexpected events can inspire breakthroughs in all areas of business* Filled with real-world examples of what companies such as Intuit, Gatorade, Four Seasons, and Colgate have achieved through the power of surprise How did Gatorade revitalize itself in the wake of Red Bull and Starbucks? How did Etsy come to be? What makes one company or

brand thrive while others languish in today's fast-paced, ever-changing marketplace? There's no doubt hard work is involved, but Soren Kaplan shows you can't do it by simply creating a big vision and implementing a set plan. In his trailblazing debut, Kaplan gives business leaders the tools to do exactly what they're taught to avoid: embrace surprise—the new key to business innovation. For Kaplan, breakthrough success is all about "leapfrogging." Instead of fighting against uncertainty, Kaplan reveals how to use it to break down limiting mindsets and barriers to change the game. Using his LEAPS process (Listen, Explore, Act, Persist, and Seize), leaders learn to recognize and harness surprising experiences and events as a way to create solutions that leap beyond the current expectations of customers, partners, employees, and the competition. By highlighting specific ways to transform both good and bad surprises into unique opportunities, Kaplan encourages leaders to compete by embracing counterintuitive ideas, managing paradoxes, and even welcoming failure. Now is the time to challenge assumptions and reinvent what

is possible. All organizations—from large corporations to those just starting out—have the potential to take a significant leap forward by turning today's increasingly uncertain environment into a tool for unprecedented success. Kaplan's Leapfrogging is the new handbook for the modern leader.
