STRICKLAND KEITH

Integrated Circuits. Linear Integrated Circuits Temple University Press

After examining 100 separate media and network industries in detail, Noam provides a powerful summary and analysis of concentration trends across industries and major media sectors. He also looks at local media power, vertical concentration, and the changing nature of media ownership through financial institutions and private equity.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Television Digest, with Consumer Electronics Jorge Carrillo Viveros Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Popular Science Oxford University Press on Demand

East Asia is now one of the most dynamic parts of the increasingly regionalized world economy. This book explores the structure and upgrading mechanism of the highly integrated economy, reviewing the previous paradigm centered on Japan. The focal points are on the flying geese paradigm, the regional production networks, a reinterpretation of the East Asian crisis, the post-crisis transformation of the regional economy and a search for further

regional cooperation. This volume aims at presenting, through these analyses, an alternative view for and a perspective on future East Asian regionalism.

High Technology Routledge

The economic crisis of 1997 called East Asia's economic miracle into question and generated widespread criticism of the region's developmental models. However, the crisis did little to alter the growing economic integration of American, Japanese and Chinese firms who have created cross-border production networks. This book addresses the changing nature of high-tech industries in Asia, particularly in the electronics sector, where such networks are increasingly designed to foster and to exploit the region's highly heterogeneous technology, skills and know-how.

Educational and Industrial Television

A revealing look at the dark side of the electronics industry and global efforts to move it toward greater sustainability and accountability.

This text offers a wide-ranging treatment of entrepreneurial management including: start-up, buyouts and buy-ins, managing rapid growth including venture capital and financing, crisis management, and preserving and instilling entrepreneurship.

InfoWorld

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Predicasts F & S Index International Annual

This book explains the political origins and evolution of capitalist institutions in developing countries by looking at distinct patterns in the electronics industry in three Southeast Asian countries:

Thailand, Malaysia, and Singapore. An analysis of the political determinants of these patterns has a number of theoretical and practical implications. It includes a new explanation for family business behavior, a unified framework for explaining capitalist varieties, a guide for institutional reform, and a comparative examination of three dynamic Asian economies that provides important insights to students, scholars, and people in business.
