The Hunger Games meets Matched in this high-concept thriller where citizens must prove their worth by defeating the other version of themselves—their twin. Two of you exist. Only one will survive. West Grayer is ready. She's trained for years to confront her Alternate, a twin raised by another family. Survival means a good job, marriage—life. But then a tragic misstep leaves West questioning: Is she the best version of herself, the version worthy of a future? If she is to have any chance of winning, she must

stop running not only from herself, but also from love . . . though both have the power to destroy her. Elorie Shaw, steeped in the traditions of the Nova Scotia witching community, but not a witch. Travel to Fisher's Cove, where Moira is matriarch and the old ways are nurtured and passed to the next generation. Where a crotchety old witch makes small children cry and builds walls around the silent pain in his heart. And where Elorie - sea-glass artist, inn owner, and Moira's granddaughter - makes her home. The old magics are strong here. Which is all fine and good until the fetching spell pulls Elorie into Witches' Chat. Because she's not a witch. Or at least not any kind of witch the old ways recognize..." -- Back cover.

This volume is a collection of cutting-edge research papers written by well-known researchers in the field of Romance phonetics and phonology. An important goal of this book is to bridge the gap between traditional Romance linguistics □ with its long and rich tradition in data collection, cross-language comparison, and phonetic variation □ and laboratory phonology

work. The book is organized around three main themes: segmental processes, prosody, and the acquisition of segments and prosody. The various articles provide new empirical data on production, perception, sound change, first and second language learning, rhythm and intonation, presenting a state-of-the-art overview of research in laboratory phonology centred on Romance languages. The Romance data are used to test the predictions of a number of theoretical frameworks such as gestural phonology, exemplar models, generative phonology and optimality theory. The book will constitute a useful companion volume for phoneticians, phonologists and researchers investigating sound structure in Romance languages, and will serve to generate further interest in laboratory phonology.

Work on the human brainstem has been impeded by the unavailability of a comprehensive diagrammatic and photographic atlas. In the authors' preliminary work on the morphology of the human brainstem (The Human Nervous System, 1990), Paxinos et al demonstrated that it is possible to use chemoarchitecture to establish a number of human homologs in structures known to exist in the rat, the most extensively studied species. Now, with the first detailed atlas on the human brainstem in more than forty years, the authors present an accurate, comprehensive, and convenient reference for students, researchers, and pathologists. Key Features * The first detailed atlas on the human brainstem in more than forty years * Delineated as accurately as The Rat Brain in Stereotaxic Coordinates, Second Edition (Paxinos/Watson, 1986), the most cited book in neuroscience * Based on a single brain from a 59-

year-old male with no medical history of neurological or psychiatric illness * Represents all areas of the medulla, pons, and midbrain in the plane transverse to the longitudinal axis of the brainstem * Consists of 64 plates and 64 accompanying diagrams with an interplate distance of half a millimeter * The photographs are of Nissl and acetylcholinesterase (AChE) stained sections at alternate levels * Establishes systematically the human homologs to nuclei identified in the brainstem of the rat Reviewed by leading neuroanatomists * An accurate and convenient guide for students, researchers, and pathologists

Her crack squad of 15 grannies will be contributing their 'purls' of wisdom and patterns to help the new knitting generation in this attractive book. MES Guide for Executives Adam Publishers

From the New York Times bestselling author of *American Fascists* and the NBCC finalist for *War Is a Force That Gives Us Meaning* comes this timely and compelling work about new atheists: those who attack religion to advance the worst of global capitalism, intolerance and imperial projects. Chris Hedges, who graduated from seminary at Harvard Divinity School, has long been a courageous voice in a world where there are too few. He observes that there are two radical, polarized and dangerous sides to the debate on faith and religion in America: the fundamentalists who see religious faith as their prerogative, and the new atheists who brand all religious belief as irrational and dangerous. Both sides use faith to promote a radical agenda, while the religious majority, those with a commitment to tolerance and compassion as well as to their faith, are caught in the middle. The new atheists, led by Richard Dawkins, Christopher Hitchens and Sam Harris, do not make moral arguments about religion. Rather, they have created a new form of fundamentalism that attempts to permeate society with ideas

about our own moral superiority and the omnipotence of human reason. *I Don't Believe in Atheists* critiques the radical mindset that rages against religion and faith. Hedges identifies the pillars of the new atheist belief system, revealing that the stringent rules and rigid traditions in place are as strict as those of any religious practice. Hedges claims that those who have placed blind faith in the morally neutral disciplines of reason and science create idols in their own image -- a sin for either side of the spectrum. He makes an impassioned, intelligent case against religious and secular fundamentalism, which seeks to divide the world into those worthy of moral and intellectual consideration and those who should be condemned, silenced and eradicated. Hedges shatters the new atheists' assault against religion in America, and in doing so, makes way for new, moderate voices to join the debate. This is a book that must be read to understand the state of the battle about faith.
